About This Document

Naming of Author

As we've done in many documents, for brevity we'll refer to our company, Frontier Strategies, Inc., as "Frontier" and will refer to ourselves in the first rather than the third person (i.e. "we").

References within this Document

We have strived to minimize the cross-references within this document so readers won't have to forward- and back-reference content, which can be cumbersome.

Appendices

We have made extensive use of appendices, some of which are required information for the deliverable, while others simply augment the findings and recommendations within. All others are optional.

Audience

The primary audience for this report and recommendations are the Washington State Department of Veterans Affairs (WDVA) management team stakeholders for the *Mapping Business Processes for Washington State's Interagency Veteran Programs* project (herein "project").

The secondary audience are both DSHS and HCA management, staff and other entities having an interest in the topics presented in this document and who may have an interest resulting from this project's tie-in and funding via the CAHBI Interlocal Agreement and the SAMHSA grant which has partially funded this project.

Any tertiary audience is at the careful discretion of these stakeholders.

Acknowledgement

Many people contributed their knowledge, wisdom and advice in the development of this document, its findings and recommendations. It would be far less substantial, and credible, without their help and, in many cases, the documents they maintain or produce.

1. INTRODUCTION

1.1. Document Provenance

This document represents two formal deliverables of the *Mapping Business Processes for Washington State's Interagency Veteran Programs* project. They are two of nine total project deliverables:

- Detailed Work Plan and Schedule
- DVA-HCA DVA-DSHS Data Exchange Report
- Federal Authoritative Data Report
- Veteran Homeless Programs Assessment and Recommendations
- **Data Infrastructure Report (this document)**
- **Crosswalk Report (this document)**
- Process Assessment and Recommendations
- Business Process Management Requirements
- Implementation Recommendations and Plan

1.2. Purpose

The purpose of this document is as follows:

- To catalog the current (as-is) state of business information that is utilized to support current business operations at WDVA's Veterans Services and Behavioral Health Services organizations;
- To catalog what business information will be needed to support future Veteran Services and Behavioral Health Services business operations (per business requirements) when deploying a to-be-purchased Enterprise Veterans Case Management System (EVCMS).
- To associate both current and future state (per the bullets above) business information, known as *entity attributes*, with a grouping of classes known as a *Business Entities*.
- To graphically elaborate current and future system Business Entities into *Business Entity Models*.

2. OVERVIEW OF DATA INFRASTRUCTURE

2.1. Introduction

This report was developed from numerous analyses of business processes and documents (over 200) that are the core of the business operations for the Veterans Services (VS) and Behavioral Health Services (BHS) organizations. Data captured during the execution of one or more processes is the primary source of most of the as-is data that is documented in this report.

Though this is fairly common among many business organizations, it's worth identifying the key scenarios where data (business information) is created, modified and in some cases deleted. In WDVA's context, this occurs in the following:

- Data is created when:
 - A new program is created
 - A new client enters into WDVA's domain
 - A client begins participating in a program
 - A client is participating in a program and the case manager (or equivalent) enters follow-up information
 - The program requires reporting back to the funding source (the grantor, or another State agency)
 - Contracting professional providers bill for services and expenses
 - Employees incur expenses, either directly related to their responsible programs, or in the service of the agency
- Data is modified when:
 - Clients change their participation in a program
 - Clients have changes in their status
 - Employees, monitoring their client in a program, change the client's status
- Data is deleted when:
 - Errors are made

It is a fair statement to say that data is somewhat decentralized within VS and BHS, owing primarily to the following factors:

- Lack of a cohesive enterprise-wide data management tool—as such an Enterprise Veterans Case Management System (EVCMS) might represent—leaves WDVA organizations on their own to determine their data management strategy, or more appropriately, day-to-day tactics. At the program level, basic tools like Word, Excel and Outlook are utilized, which are not purpose-built for sharing data easily.
- Similarly, absent an EVCMS, there exists no enterprise collaboration technology, such as Microsoft SharePoint, which would offer version control, file access authority, audit trails, and basic collaboration capabilities. Such a tool, if ever implemented, could possibly allow

one VBS to serve another VBS' client in the case of the latter's absence due to vacation, business trips, training or illness.

- There are only rudimentary methods for sharing data, such as shared network file folders.
- Programs are largely independent of each other. Autonomy is fueled by the nature of the program's funding—funding sources are often wholly independent. Even if funding sources, such as SAMHSA, were to sponsor and manage two separate programs, the programs are often so different that any opportunity for sharing data is lost.
- Some programs, such as Vet Corps, are required to manage their clients (known as *members* in AmeriCorps parlance) via external tools, such as *eGrants* and *America Learns*. Such clients and the data about them are not “owned” by WDVA.

Considering the business climate, work culture, and the lack of good tooling (i.e. applications and technology), the current state of data infrastructure is fragmented. The word *infrastructure* itself implies some sense of data organization with a data governance program overseeing its management, upkeep and growth. This is not the case for now. In the future, an EVCMS will enforce data quality and establish a robust data infrastructure. However, as we will be recommending in the last project deliverable, *Implementation Recommendations and Plan*, a data governance capability is sorely needed now and will be in the future. A data governance program must be established to ensure good data quality, data security and, ultimately, the best service we can render for our veterans.

2.2. Organization of this Report

This report is a composite document that includes two of the contractual deliverables for this project:

- **Data Infrastructure Report** – This is referred to in the RFP as a Data Dictionary (deliverable F5). As inferred by the RFP, the Data Dictionary is documented in Section 3 and is subsequently divided into two sections: the as-is data (Section 3.3 on page 15); and the to-be data (Section 3.4 on page 91).
- **Crosswalk Report** – This is referred to in the RFP as a “cross-walk of the Data Dictionary” (deliverable F6). We have taken the same approach as with the Data Dictionary: separating the as-is data (Section 4.4 on page 164) from the to-be data (Section 4.5 on page 231). Data is further categorized by program.

3. DATA DICTIONARY

3.1. Approach to Organization

The primary sources for mining data were:

- Interviews
- Intake Forms
- Applications
- Follow-Up Notes and Outcomes
- Program Reports
- Other documents

Data was first modeled as part of one or more *business entity models*. (See Section 4.3 Business Entity Modeling Primer on page 155 for more information on the business entity model.) The current state (as-is) data was initially modeled. Once the current state was validated, a series of incremental future state (to-be) business entity models were designed, based on the known business requirements and the over-arching desire to use common business information concepts for all programs.

Once the data was mined, modeled and validated, it was then divided into two sets: current state (as-is) and future state (to-be). Each of the 109 as-is entities and the 83 to-be entities were transferred to an Excel workbook in Reference Document 3 (Worksheet: Business Entities). Data elements that were captured were:

- ID
- Entity Attribute Name
- Description
- Datatype
- Belongs to Entity
- Belongs to BEM
- Program
- Data Owner (Organization)
- As-Is or To-Be

A virtual copy of both as-is and to-be data was then replicated to another worksheet: Internal Data. Next, all data was sorted using the following sort criteria:

- Level 1: Sort by As-Is To-Be (A → Z)
- Level 2: Sort by Entity Attribute Name (A → Z)
- Level 3: Sort by Business Entity (A → Z)

Then, manual analysis of duplicates commenced. Approximately 27% of the data was considered true duplication. Another 12% had identical names but were indeed different

data¹ utilized in the context of two or more specific programs, or even two attributes of the same name used within the same program.

This formed the Current State (As-Is) and Future State (To-Be) Data Dictionaries.

3.2. Other Considerations

Two considerations were entertained and subsequent decisions were made:

- The Veterans Estate Management Program (VEMP) was not modeled because it's operating using spreadsheets and the QuickBooks account application. There was not a significant amount of as-is business information generated internally that was not of a federal nature and was new and/or unique to WDVA. Further, it will be migrating to a new, purpose-built commercial off-the-shelf (COTS) financial application, *eGuardianship*, this fall. This does not suggest that VEMP management and program staff will not one day use EVCMS to view their client's program status²; no doubt they will.
- The Corporation for National and Community Service is the data owner of Vet Corps data and is included because it may influence future state data requirements for inclusion into the EVCMS.

3.3. As-Is Data Dictionary

Table 1: As-Is WDVA Data Dictionary for Veterans Services and Behavioral Health Services

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities	Belongs to BEMs	Program	Data Owner
ID1	Accessed Other VA Ben Entitle Indicator	Accessed other VA benefits entitlement indicator.	YesNo	Benefit and Entitlement Summary	Veterans Innovations Program Application	Veterans Innovations Program (VIP)	WDVA
ID2	Action Description	Action description.	String	Action Plan	King County (KC) IVRS Intake	King County Homeless and Incarcerated Services	WDVA
ID3	Action Taken	Action taken.	String	Legal Action	Vet Corps Application	Vet Corps	Corporation for National and Community Service

¹ For example, there were numerous instances of *Start Date* and *End Date*. While the names were the same, these attributes were used in entirely different contexts with different raw data.

² VEMP clients may certainly be eligible for other WDVA services; and in a future EVCMS, it may be reasonable (in support of the 360° view of the client) to add the VEMP participation of that same client.

4. DATA CROSSWALK

4.1. Overview

“Crosswalk” is probably not the most accurate term in the context of this project. Also known as a *schema crosswalk*, it is usually referred to as a table that allows for references to be built that allow the way data is stored in one database to be matched up with data in another database, as shown in Figure 1. This is critical when either building a messaging interface between two applications (retaining their own autonomous database schemas), or when migrating data from one database to another (in which case the Extract-Transform-Load³ routines would need to know how a data element is persisted⁴ in the source database and how it needs to be persisted in the target database).

Database A			Database B		
Common Name	Datatype	Example Values	Common Name	Datatype	Example Values
Soc_Sec_No	VARCHAR(11)	123-45-6789	SSN	VARCHAR(9)	123456789
Gender	VARCHAR(1)	{M, F}	Sex	VARCHAR(10)	{Male; Female; Transgender}

Figure 1: Example of a typical crosswalk specification

So though this project is not utilizing a crosswalk structure in a traditional sense, it is categorizing the data in use today as well as the future state (to-be) of business information relationships that need to be supported tomorrow. In using the term *business information relationships*, we must be careful to point out that the data infrastructure of any future EVCMS purchased by WDVA is completely unknown at this time. All we can really specify is that certain business information be related to other business information. As you will see in this report, typical examples may be:

- A *Client* must be able to be associated with zero or more *Program*.
- A *Professional Provider* (i.e. contractor) must be able to be associated with a *Contract*.

There are thirty business entity models that document in detail the exact business information (business entities and their entity attributes) and relationships required by WDVA today and in the future. Will vendors offering EVCMS solutions actually have database tables named *Client* and *Program*? We can’t speculate, but probably not, nor should we worry about how they will implement the requirements. We just need to document the business information and the relationships needed to support business operations, and ultimately, to better serve veterans and their families.

³ For more information on Extract-Transform-Load, see: https://en.wikipedia.org/wiki/Extract,_transform,_load

⁴ Persistence considers both the table and column names and the datatype.

That is what this section endeavors to do: document in detail and by program the business information required to support operations today and then a more idealized (and de-duplicated) view of the business information we'll need to serve veterans in the future.

4.2. Approach to Organization

The approach to building and organizing the crosswalk specifications in this section was introduced in Section 3.1 on page 14 since building the data dictionary and the crosswalk was interconnected.

Instead we will elaborate our approach to scoping the range of business entity models for the current state (as-is) and then discuss our approach to designing the future state (to-be).

4.2.1. As-Is Business Entity Models

Our general approach to modeling was introduced in Section 3.1 on page 14. For the current state, we wished to model the most significant slice of WDVA business operations at a program level. To that end, practically all programs were modeled.

Our guiding principle was to view a typical program as having a life of its own—and thus, a corresponding lifecycle. We then built a model of this lifecycle, *Program Lifecycle State Model*, so we could understand how clients are served at the program level. This resulted in the model as illustrated in Figure 2 on page 152⁵. A *state model* depicts the various states that an object, in this case a *Program*, may be in and the transitions (actions that cause the transitions) between those states.

⁵ A full-size 11"x17" rendering of the Program Lifecycle State Model is contained in Appendix O on page 308.

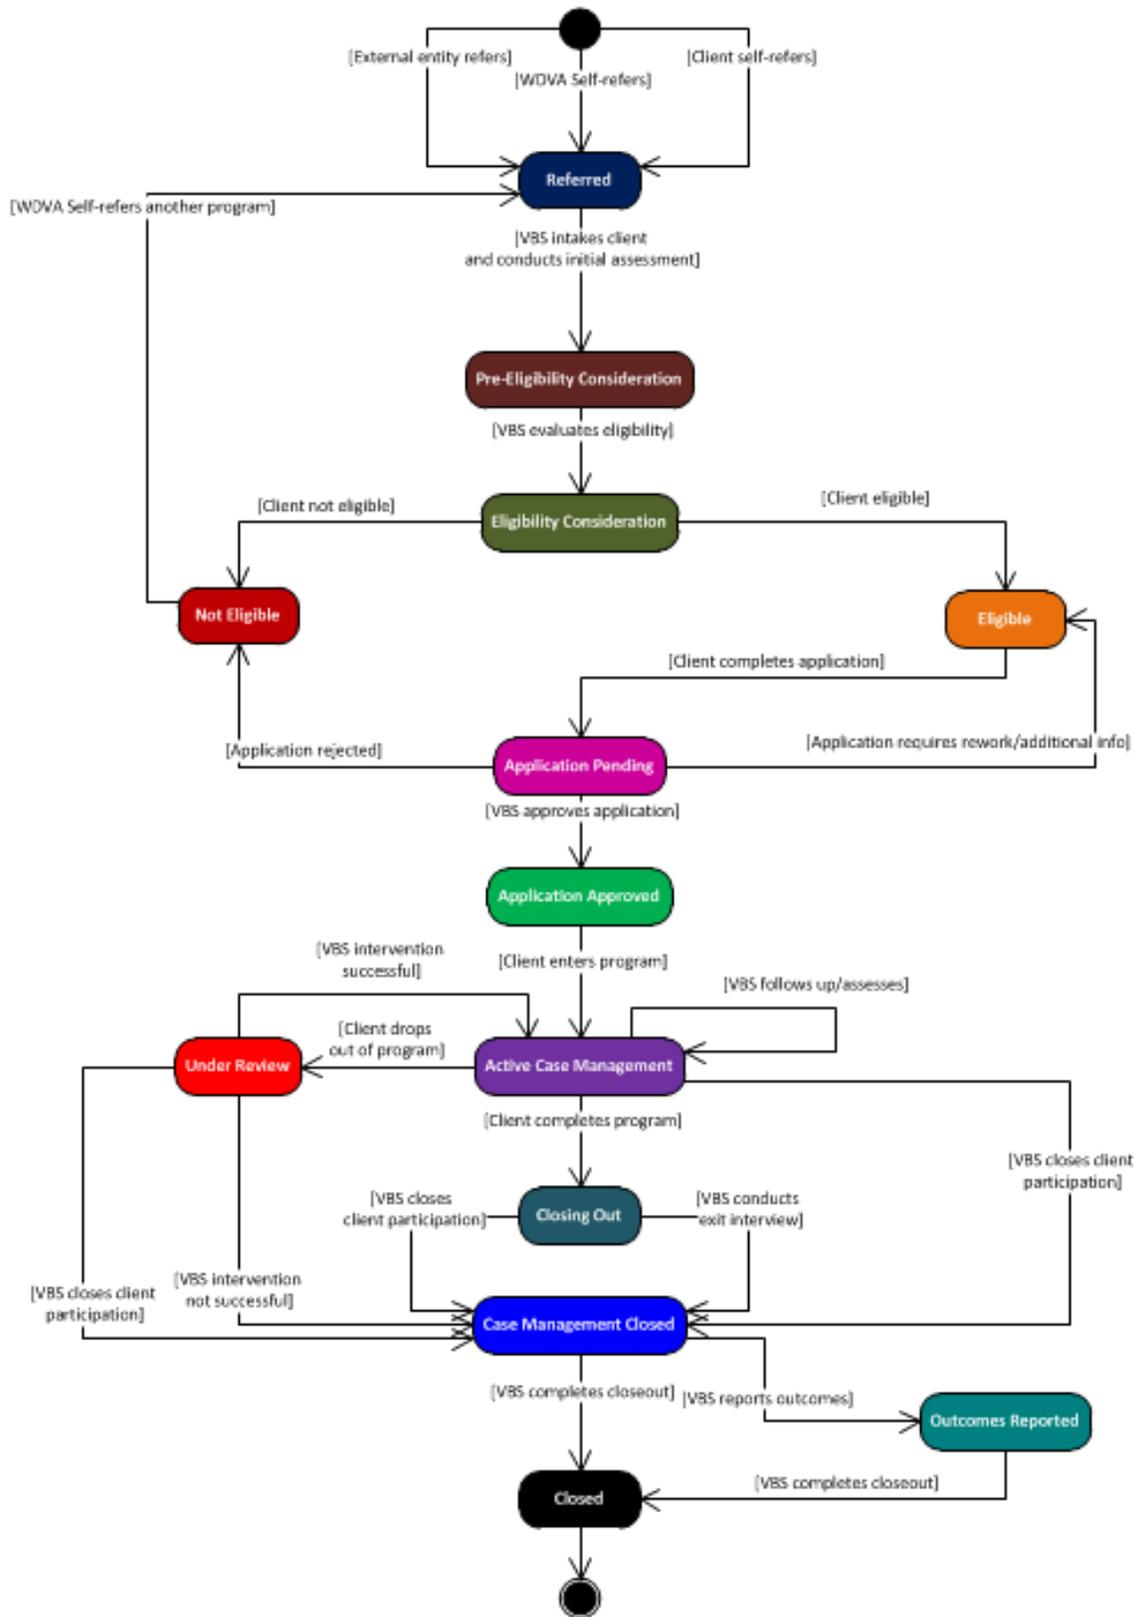

Figure 2: Program Lifecycle State Model

This was the key to capturing each program’s business information. Another practical consideration was what raw material we had to work with. As stated earlier in Section 3.1, our primary sources for mining data were:

- Intake Forms
- Applications
- Follow-Up Notes and Outcomes
- Program Reports

Add to that the knowledge we gained from our stakeholder interviews, from capturing and mapping 80 business processes, and from notes and subsequent discussions with program managers.

We feel the twenty business entity models of the current state make up a detailed but composite view of what each program leverages as far as business information is concerned. By studying the diagrams, it’s possible to see that there is consistent variability among the programs in terms of what information is captured, how it is used to make determinations, such as eligibility, and what information is needed when clients end participation in a program. As we have stated earlier, much of this is due to the design and requirements of the programs in question, but there are also elements of personal style and preferences (as there were in the business processes) that drive the use of information.

All but two as-is business entity models are program related. The two outliers are:

- As-Is Certificate of Discharge (DD214 and DD215) Business Entity Model
- A19 Voucher Distribution (Services) Business Entity Model

The Certificate of Discharge Business Entity Model was included because it is a current capability at WDVA (by way of the SQL database *SQL2014CertificateOfDischarges*) and it is a pivotal instrument in identifying clients and determining their eligibility for programs.

The A19 was chosen for elaboration because it is a prevalent document in the two VS and BHS divisions that is required to keep the funds flowing in most all programs. The A19 has also influenced how the to-be Provider Services Perspective business entity model was designed since we need to persist billing data for WDVA accounting to consume.

4.2.2. To-Be Business Entity Models

The approach for designing the future state was to focus on the Pain Points, existing Business Requirements, and eliminating as much variability in how business information was conceived, managed and valued. We used the same Program Lifecycle State Model to guide our quest for a common set of business information that any program could use.

Design themes that we tried to incorporate were:

- **Use a Separation of Concerns** – Break out the overall future state into different *views*, or *perspectives*:
 - Client Identity Perspective – Everything and anything about a client’s identity, demographics, and history.

- Client Program Participation Perspective – All there is to know about a client’s relationship with a WDVA program.
 - Program Design Perspective – If we’re to associate a client with a program, including reporting on his/her outcomes, we must know something about the structure of the program, including its services offered, and its management and reporting requirements.⁶
 - Provider Identity Perspective – The same applies for the contracting professional within WDVA as it does for the client, though less information is required.
 - Provider Services Perspective – If we intend to have contractors bill and submit expenses through EVCMS (a requirement), then we need to structure how this information will be managed.
 - Project Management Perspective – Though somewhat obscure—VCC is the only program using the project concept—having this perspective about the myriad ways to structure and manage a project is important.
- **State Model** – Use the Program Lifecycle concept to structure business information around the various stages of a program, such as: referral; pre-eligibility assessment; eligibility determination; case management; follow-up; and closeout.
 - **Abstraction** – Because many programs have tweaked information to suit their program’s needs and, as was stated above, personal preferences, attempt to abstract the most variable information into general “containers”, such as *Program Pre-Eligibility Evaluation*; *Program Eligibility*; *Program Milestone*; and *Program Outcome*. *Program Pre-Eligibility Evaluation* is especially worth commenting on. In the Veterans Innovations Program, there are perhaps 10 business information elements—*Unemployment Insurance Indicator* and *Registered DVOP or LVER Indicator* are just two—that the program manager relies on to determine a good client fit for VIP. Similarly, the Veterans Conservation Corps program has six or more specialized data elements it wants to know about. To accommodate this inherent variability, the general purpose “container”-like function of *Program Pre-Eligibility Evaluation* is purpose-built for that reason. We should be able to define any and all specific information (i.e. pre-eligibility evaluations) we need to track, and whether a client meets each requirement.

In all, these six to-be business entity models represent the best picture of the business information needs and relationships that must be supported by an EVCMS solution. We expect these models to evolve past the current version of this report, particularly since there are three additional project deliverables following this one, including further elaboration and elicitation of business requirements, which will likely result in a richer understanding of the business information needs.

⁶ There requirements are obviously documented in the official program definition as specific by the grantor, but it’s important to have the program information resident in a future EVCMS for tracking and reporting purposes.

4.3. Business Entity Modeling Primer

We make liberal use of business entity models in this project and especially in this report. The next few sections introduce business entity modeling (what it is and why it's used) and discuss some common and special modeling notations.

4.3.1. Defined

Note: Some of the content in this section is derived from a Business Analyst course in business entity modeling that we have designed and delivered in past engagements. Examples are from the insurance industry but readers should have no problem internalizing the examples for WDVA-related business.

Next to the *Business Process Model*, the *Business Entity Model* ("BEM") is probably the single most valuable diagram for an organization (and its business analyst) when in the early stages of a project's analysis (and even discovery) work.

The Business Entity Model is an organized collection of *Business Entities* using associations between one another to demonstrate business information relationships. It is a cohesive concept within a *Business Domain* that has recognized characteristics (*Business Attributes*, or *Entity Attributes*) and relationships to other *Business Entities*.

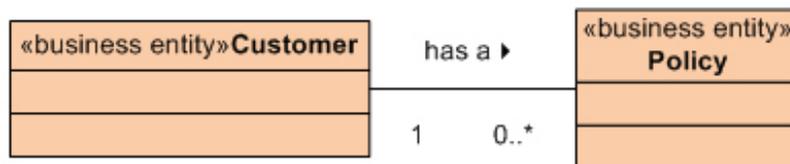

Figure 3: A simple Business Entity Model shows the relationship between "Customer" and "Policy."

Business Entities represent business concepts, usually in the form of a noun, such as *Customer* or *Policy*. *Customer* and *Policy*, of course, have different meaning depending on the Business Domain they are within. The concept of *Customer* at WDVA is completely different than, say, what it may mean to a marketing team at McDonald's Corporation. *Policy* at WDVA has an altogether different connotation at the World Bank, and even at another State agency. This is why it's important to understand the context (i.e. the Business Domain) within which a Business Entity is defined and modeled.⁷ Figure 3 shows a simple Business Entity Model using these two Business Entities.

⁷ It's also a good time to plug the idea of developing and maintaining a Glossary of terms, which is invaluable for large organizations where definition of terms is often informal, rife with acronyms and many times inconsistent.

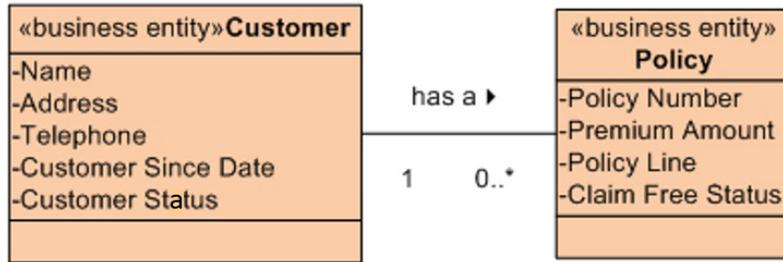

Figure 4: The same Business Entity Diagram as Figure 3 with the addition of Entity Attributes.

Business Attributes can be considered “qualifiers” of Business Entities. If you were to further elaborate, or describe your Customer Business Entity, you would likely give the following attributes (or characteristics):

Name, Address, Telephone, Customer Since Date, Customer Status

while Policy might have:

Policy Number, Premium Amount, Policy Line, Claim Free Status

(Note: For all practical purposes, Business Attributes and Entity Attributes are synonyms—they are the same concept.)

Business Entity Models may actually be more than one physical diagram, depending usually on space and complexity considerations.

Last, Business Entities can be thought of as the “vocabulary” of the business while Business Entities Models can be considered the “language.”

4.3.2. Reasons to Use

Business Entity Models help organizations overcome barriers and problems as analysis just gets underway, and then later as analysis matures and more artifacts are produced. Unless you have been working in a specific business domain or application platform area, chances are you need to understand how the business runs. Too, vendors answering the Phase 3 RFP will need to know how the business runs. Business Process Models do a good job of this at a high level. But process models only document what organizations, and sometimes people, do at high levels and often from a conceptual viewpoint.

What is needed is a mechanism for capturing business information, Entity Attributes, and a way of assembling those characteristics into logically organized containers, Business Entities. Identifying and organizing Business Entities provides value to the organization for the following reasons:

- It provides a consistent, organized approach for collecting and analyzing business information.
- Business Entities provide logical containers for organizing Entity Attributes of like affinity.

- Associating one Business Entity to another documents business relationships and dependencies.
- The visual and spatial orientation of a Business Entity Model conveys richer understanding of business relationships that are difficult to grasp in tabular or narrative form.
- Other semantics such as multiplicities, role and relationship names further enhance the meaning of a Business Entity Model.

EU Rent Business Entity Diagram

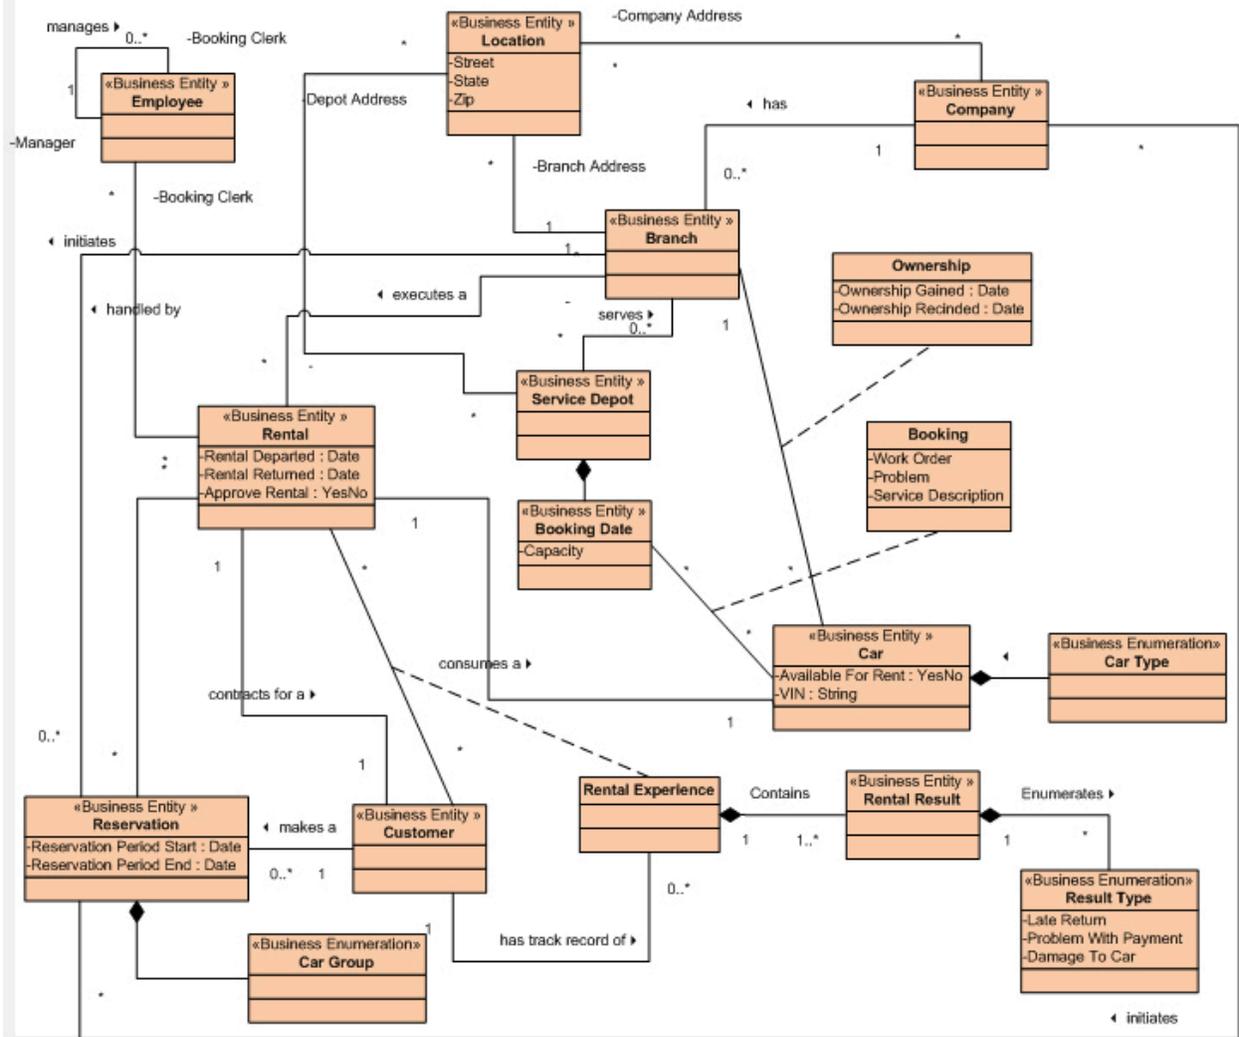

Figure 5: A Business Entity Diagram in the making for the fictitious EU Rent rental car company. This diagram is only as complete as the Business Analyst understands the requirements. He or she will likely probe for additional information, especially about Entity Attributes that are missing.

4.3.3. Special Modeling Concepts

Many of the business entity models in this report—especially those in the To-Be sections beginning on page 235—utilize several specialized UML⁸ class modeling concepts. It is important for the reader to understand these concepts so you can properly understand the somewhat intricate business information relationships that are contained in many of the future state (to-be) models in this section and in the appendices.

⁸ UML is Unified Modeling Language. For more information, see: <http://www.uml.org/>

Four specific modeling conventions are discussed here:

- Enumeration of an entity attribute
- Use of Generalizations
- Use of Association Classes
- Multiplicities

4.3.3.1. Enumeration of an Entity Attribute

One modeling technique that is used in this report is the use of *Business Enumerations*. Business enumerations are self-contained enumerated lists of an entity attribute. Figure 6 illustrates the entity *Identity* with eight attributes: the first six are listed in the attributes section of the business entity, while the seventh and eighth attributes, *Identity Type* and *Gender Type*, are modeled separately as business enumerations so the reader can view the fixed list of enumerated values for each attribute.

A business enumeration is associated (or linked) to its business entity using a composition association, a small solid black diamond-headed line running between the two classes as shown twice in Figure 6.

The alternative is to not enumerate an entity attribute, as shown in Figure 7. Semantically, the model snippet in Figure 6 is exactly the same as the one in Figure 7.

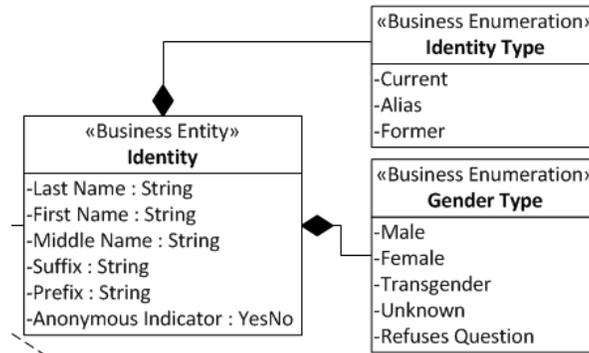

Figure 6: Business Enumerations *Gender Type* and *Identity Type*, both attributes of *Identity*

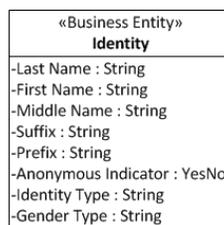

Figure 7: Business Entity *Identity* with *Gender Type* and *Identity Type* not enumerated.

4.3.3.2. Use of Generalizations

Some of the business entity models in this report utilize a modeling concept called a *generalization*. It indicates that one of the two related entities (the *subclass*) is considered to be a specialized form of the other (the *superclass*) and the *superclass* is considered a 'Generalization' of the *subclass*. In practice, this means that any instance of the subclass is also an instance of the superclass. An exemplary tree of generalizations of this form is found in biological classification: human beings are a subclass of simian, which are a subclass of mammal, and so on. The relationship is most easily understood by the phrase 'an A is a B' (a human is a mammal, a mammal is an animal).

The UML graphical representation of a Generalization is a hollow triangle shape on the superclass end of the line (or tree of lines) that connects it to one or more subclasses.

The generalization relationship is also known as an *inheritance* relationship. Figure 8 shows the hollow triangle association. The correct semantic way of interpreting this is: A *Client* is a kind of *Person* is a kind of *Entity*. (Entity in Figure 8 is labeled in italics because it's an abstract entity as noted above.) We use the *Client-Person* generalization because we also have another relationship: the *Provider Professional-Person*. In this case, we have specialized information we want to capture about a *Provider Professional* that is wholly different from the (more detailed) information we want to capture for the veteran *Client*.

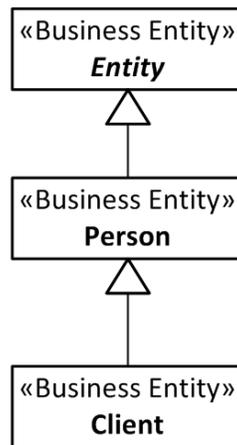

Figure 8: Notation example of a generalization relationship.

Figure 9 is another example of generalization using vehicles.

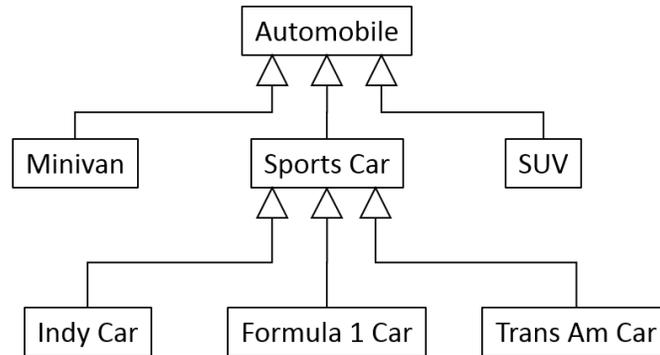

Figure 9: Example of generalization.

4.3.3.3. Use of Association Classes

An association class is a method of characterizing the nature of an association between one entity and another entity. In this instance, we are associating one instance or *Person* with another instance of *Person*. This is called a *self-referencing* or *recursive* association. In the Visio diagram as shown in Figure 10, the recursive relationship is shown via the diagonal line in the *Person* entity. This is merely a limitation of Visio’s UML modeling feature—it can’t draw a self-referencing rectangular association.

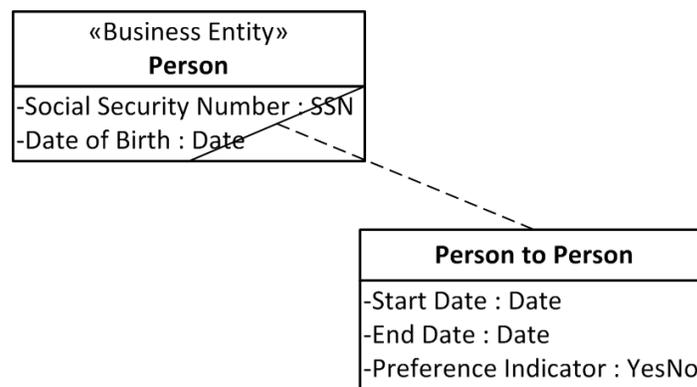

Figure 10: Illustrating the recursive relationship of one Person to another Person (the diagonal line in the Person entity).

Figure 11 illustrates the proper placement of the Person-to-Person association (the thinner line connecting the right side of *Person* to the underside of *Person*). The Person to Person entity is the association’s set of attributes describing the association, namely:

- Start Date of the association (we can’t presume an association will last forever—does a husband and wife stay married for eternity?)
- End Date of the association

- Preference Indicator – this is a specialized attribute to support a business requirement that a client be able to identify a favorite, or trusted, VBS they have worked with in the past.
- Relationship Type – as noted above this is an enumerated attribute that captures the nature of the relationship, i.e. child, father, case manager, etc.

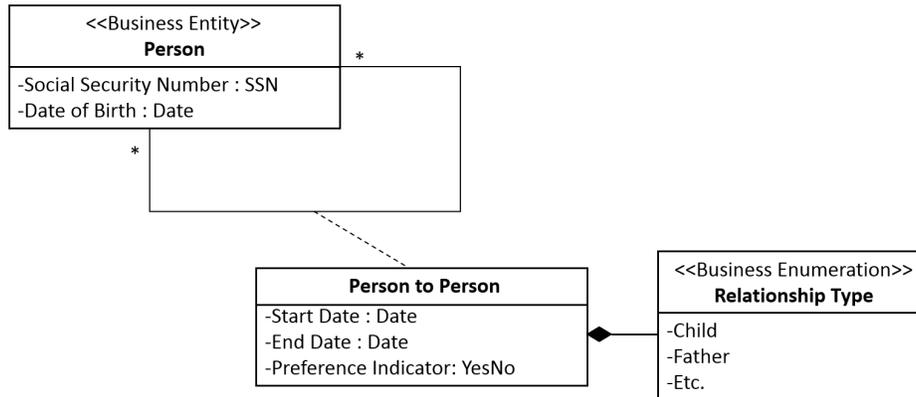

Figure 11: Properly drawn recursive Person-to-Person relationship

Another example that illustrates a recursive association of an entity is shown in Figure 12. In this example, Jane is the supervisor of Thomas and has been so since November 10, 2012. This is semantically the same as the examples in Figure 10 and Figure 11.

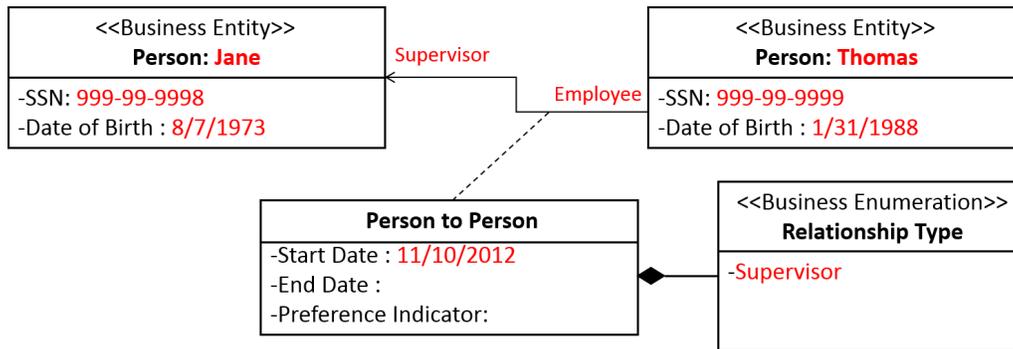

Figure 12: Alternate instantiated representation of a Person to Person relationship.

4.3.3.4. Multiplicities

Practically all thirty business entity models in this report use *multiplicities*. You will see them adjacent to the associations (the lines) between one business entity and another.

In a business entity model, multiplicity specifies the range of instances of a business entity at the association end where the multiplicity is specified. Generic examples of multiplicities, expressed in the narrative form of business requirements, are:

- An order should accommodate at least one item and not more than 50.
- There is no limit to the number of items that can be ordered.
- Four vehicles is the limit for a single rental contract.

Multiplicity enhances meaning of the business entity model since it allows more specificity about the number of instances one business entity can have related to another business entity, and vice versa.

Symbols acceptable are whole numbers and the asterisk (“*”), which stipulates there is no upper limit. The series of periods (“..”) indicates a range is defined.

Examples are:

- 1 (one instance)
- 0..1 (zero or one instance)
- 0..4 (zero to four instances)
- 1..10 (one to ten instances)
- 0..* (zero to many instances)
- 1..* (one to many instances)
- 2..6 (two to six instances)

Figure 13 illustrates multiplicity. Reading the diagram from left to right, one would conclude:

- For every instance of *Housing* (meaning for every record of *Housing*), there can be only one instance of *Client*; and,
- For every one *Client*, there can be zero to many instances of *Period of Military Service*.

You could read the diagram from right to left as well.

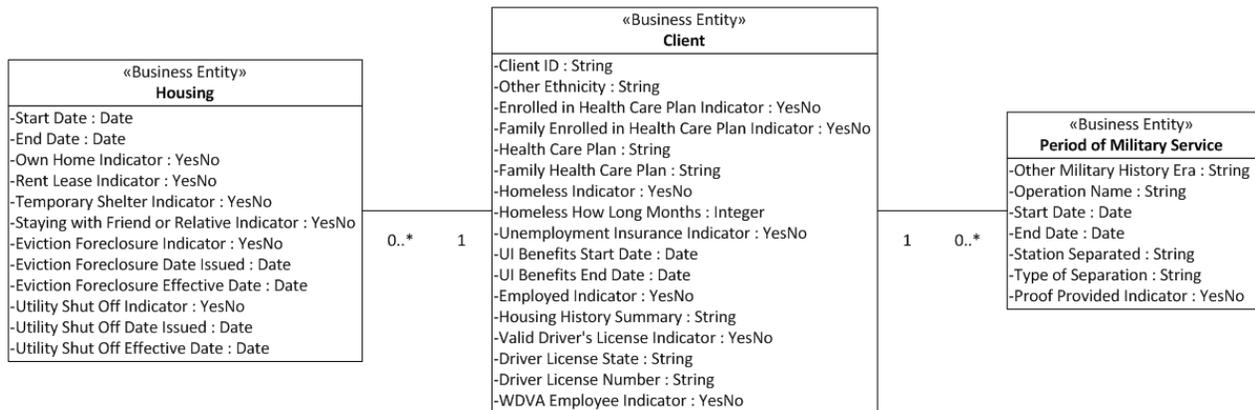

Figure 13: Example of multiplicity between *Client* and, respectively, *Housing* and *Period of Military Service*

4.4. As-Is Data Crosswalk

This section documents the current state of how the Veterans Services and Behavioral Health Services divisions use the business information they own. The following programs are represented:

- As-Is Certificate of Discharge (DD214 and DD215) Business Entity Model
- Transitional Housing Services Program Intake (Building 9) Business Entity Model
- Veterans Innovations Program Application Business Entity Model
- Behavioral Health PTSD Providers Business Entity Model
- PTSD Client Intake Business Entity Model
- Behavioral Health VTSC Report Business Entity Model
- Veterans Conservation Corps Client Intake Business Entity Model
- Veterans Conservation Corps Project Management Business Entity Model
- Homeless Veterans Reintegration Project (HVRP) Application Business Entity Model
- A19 Voucher Distribution (Services) - Business Entity Model
- Traumatic Brain Injury (TBI) Business Entity Model
- King County (KC) Call Center Intake Business Entity Model
- King County (KC) Walk-In Intake Business Entity Model
- King County (KC) IVRS Intake Business Entity Model
- Statewide IVP Intake Business Entity Model
- Service Center Log Business Entity Model
- Vet Corps Application Business Entity Model
- Vet Corps Member Performance Evaluation Business Entity Model
- Vet Corps Coordinator Performance Evaluation Business Entity Model
- Claims Quality Assurance Business Entity Model
- CABHI/BRIDGES Business Entity Model

4.4.1. As-Is Certificate of Discharge (DD214 and DD215) Business Entity Model

This model is derived from the entity relationship diagram (ERD) submitted to us by Dale Cain. It represents the logical data relationships contained in the *Certificate of Discharge* database⁹. The application that accesses the database is implemented in Access 2010 and is called *SQL2014CertificateOfDischarges*¹⁰. This database holds information received from veterans' Certificate of Release or Discharge from Active Duty forms—known as *DD Form 214* (herewith

⁹ The database is a Microsoft SQL Server instance.

¹⁰ File name: G:\COMMON\SQL2014\SQL2014CertificateOfDischarges.accdb

DD214)—that WDVA receives from the Department of Defense’s (DoD’s) Defense Manpower Data Center (DMDC). DMDC sends hardcopy DD214s to WDVA on a constant basis. Forms are mailed via US Postal Service when a sufficient number of forms are in the WDVA queue. (Plans are in place to begin accepting electronic comma-separated value (CSV) files containing DD214s and DD215s from the DMDC sometime in late 2015 or early 2016.)

4.4.1.1. Entity Descriptions

The following entities are contained in this business entity model:

- WashingtonMilitaryVeterans – Contains primary identity information for the Certificate of Discharge.
- RecordsofService – Contains zero or more records of service for the veteran.
- RecordOfOperations – Contains zero or more military campaigns for the veteran.
- BranchofService – Contains the branch of service for each record of service: Army; Air Force; Navy; Marine Corps; Coast Guard.
- TypeMilitaryService – Contains the type of military service: Active; National Guard; Reserve.
- Gender – Contains the sex of the veteran: Male; Female.
- MilitaryOperations – Code table¹¹ for military campaigns.
- WashingtonCities – Code table for Washington cities that contain a VA-related facility.
- CharacterOfService – Contains the Character of Service—the discharge status—of the veteran for the period of service.
- County – Code table for a list of Washington State counties.
- CountryZipCode (sic) – Code table for zip codes of counties.

4.4.1.2. Entity Attributes

Please see Table 3.

Table 3: As-Is Certificate of Discharge (DD214) Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1	SSN	Social Security Number.	String	Records of Service

EA41	County	County name.	String	CountyZipCode

4.4.1.3. Business Entity Model

The business entity model is documented in Appendix B on page 270.

4.4.2. Transitional Housing Services Program Intake (Building 9) Business Entity Model

The primary instrument for capturing the client identity, demographics, living situation and current needs and issues is the client intake form. And though there are incidental workbooks and case management tools in use, from a business information perspective, this form has comprehensive information that Building 9 staff must utilize during the client’s stay and (optionally) follow-up.

4.4.2.1. Entity Descriptions

The following entities are contained in this business entity model:

- Education – Contains summary information regarding a client’s educational history.
- Employment History – Contains summary information regarding a client’s work history.
- Job History – Contains zero or more records of jobs held by the client.
- Intake – General information about the intake itself.
- Client – Identity and demographics about the client.
- Income – Summarizes total monthly income for client.
- Income Item – Contains zero or more instances of income amount and income type.
- Expense Item – Contains zero or more instances of expense amount and expense type.
- Location – Contains zero or more known addresses relevant to the client.
- Homelessness – Summary information on the client’s homelessness history.
- Referral – Identity and contact information of the referral source for the client.
- Health Concern Type – Summary information about specific health concerns of the client, such as meal preferences, diabetes, hypertension, etc.

4.4.2.2. Entity Attributes

Please see Table 4.

4.4.2.1. Business Entity Model

The business entity model is documented in Appendix Con page 273.

4.4.3. Veterans Innovations Program Application Business Entity Model

This model captures identity, demographics, history and specific needs of veterans (and family members) that may be eligible for the Veterans Innovations Program.

4.4.3.1. Entity Descriptions

The following entities are contained in this business entity model:

- Employment – Contains zero to many instances of client (and optionally, spouse) employment information.
- Benefit and Entitlement Summary – Contains summary information of VA benefits and entitlements, as well as general claim filing information.

- Benefit and Entitlement – Contains zero or more specific benefit/entitlement types.
- Application – Contains general information about the VIP application status itself.
- Client – Contains identity and demographics about the client.
- Income Expense – Summarizes total monthly income and expenses for client.
- Income Item – Contains zero or more instances of income amount and income type.
- Expense Item – Contains zero or more instances of expense amount and expense type.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.
- Award – Contains zero or more military awards bestowed upon the client.
- Military Occupational Specialty – Contains one or more of the client’s military occupational specialties while serving.
- Family Member – Contains contact and relationship information of the client’s family member(s) or other close relationship.
- Immediate Need – Contains zero or more instances of a client’s immediate need for a service or benefit.
- Resource Applied For – Contains zero or more instances of a client having applied for resources through channels other than WDVA (e.g. Salvation Army, Minutemen).

4.4.3.2. Entity Attributes

Please see Table 5.

Table 5: Veterans Innovations Program Application Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA187	Employer Name	Employer name.	String	Employment
EA188	Employer Address	Employer address.	String	Employment
EA189	Hours per Week	Hours per week.	Integer	Employment
EA190	Salary	Salary.	Money	Employment
EA191	Salary Frequency	Salary frequency.	String	Employment
EA192	Job Title	Job title.	String	Employment
EA193	Job Duties	Job duties.	String	Employment

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA194	Registered DVOP or LVER Indicator	Registered DVOP or LVER indicator.	YesNo	Employment
EA195	Reason No DVOP or LVER	Reason no DVOP or LVER.	String	Employment
EA196	Unemployment Insurance Indicator	Unemployment insurance indicator.	YesNo	Employment
EA197	Date UI Benefits Began	Date UI benefits began.	Date	Employment
EA198	Date UI Benefits Expire	Date UI benefits expire.	Date	Employment
EA199	Full Time Student Indicator	Full time student indicator.	YesNo	Employment
EA200	College	College.	String	Employment
EA201	Receiving VA Education Benefits Indicator	Receiving VA education benefits indicator.	YesNo	Employment
EA202	Other VA Education Benefit	Other VA education benefit.	String	Employment
EA203	WorkStudy Program Indicator	Work-study program indicator.	YesNo	Employment
EA204	WorkStudy Location	Work-study location.	String	Employment
EA205	Employment Person Type	Employment person type (e.g. spouse, veteran).	String	Employment
EA206	Employment Status Type	Employment status type (e.g. Full-Time, Retired).	String	Employment
EA207	VA Education Benefit Type	VA education benefit type (i.e. MGIB).	String	Employment
EA208	Post 9/11 or Voc Rehab Benefit Type	Post 9/11 or vocational rehabilitation benefit type (e.g. BHA).	String	Employment
EA209	Job Title	Job title.	String	Benefit and Entitlement Summary
EA210	Job Duties	Job duties.	String	Benefit and Entitlement Summary
EA211	Filed Claim VA Disability Indicator	Filed claim VA disability indicator.	YesNo	Benefit and Entitlement Summary
EA212	Date VA Claim Filed	Date VA claim filed.	Date	Benefit and Entitlement Summary

EA286	Resource Type	Resource type (e.g. Salvation Army).	String	Resource Applied For

4.4.3.1. Business Entity Model

The business entity model is documented in Appendix D on page 276.

4.4.4. Behavioral Health PTSD Providers Business Entity Model

Behavioral Health Services must keep track of its contractors, those provider professionals—mental health, trauma counseling—that are under contract to provide services that are either funded by the State’s Revised Code of Washington (RCW, legislative action) or by a King County tax levy. This model captures the relevant information.

4.4.4.1. Entity Descriptions

The following entities are contained in this business entity model:

- Provider Professional – Contains a WDVA contractor’s (i.e. provider) identity information and effective dates of the contract with WDVA.
- Provider – Contains the identity of the contractor’s organization or employer, if relevant.
- County – Contains one or more counties where the contractor provides service.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the provider.
- Location – Contains zero or more known addresses relevant to the provider.

4.4.4.2. Entity Attributes

Please see Table 6.

Table 6: Behavioral Health PTSD Providers Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA287	Last Name	Last name.	String	Provider Professional
EA288	First Name	First name.	String	Provider Professional

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA289	Middle Name	Middle name.	String	Provider Professional
EA290	Date of Birth	Date of birth.	Date	Provider Professional
EA291	Degree Certification Suffix	Degree certification suffix.	String	Provider Professional
EA292	Contract Effective Date	Contract effective date.	Date	Provider Professional
EA293	Contract Expiration Date	Contract expiration date.	Date	Provider Professional
EA294	Provider Firm Name	Provider Firm Name.	String	Provider
EA295	County Name	County name.	String	County
EA296	Special Location Designation	Special location designation.	String	County
EA297	Street Address 1	Street address 1.	String	Location
EA298	Street Address 2	Street address 2.	String	Location
EA299	City	City.	String	Location
EA300	State Province	State province.	String	Location
EA301	Zip Postal Code	Zip postal code.	String	Location
EA302	Location Type	Location type (e.g. Office.)	String	Location
EA303	Phone Number	Phone number.	String	Contact Info
EA304	Email Address	Email address.	String	Contact Info
EA305	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info

4.4.4.3. Business Entity Model

The business entity model is documented in Appendix E on page 278.

4.4.5. PTSD Client Intake Business Entity Model

The identities of PTSD clients and others¹² are only known to the professional providers delivering services; WDVA only knows identity basics: an anonymous client ID; Zip Code of residence; date of birth; and diagnoses. However, other information is also captured in this model.

¹² Military War Trauma and other services.

4.4.5.1. Entity Descriptions

The following entities are contained in this business entity model:

- Client – Contains anonymous identity and various demographics about the client.
- Counseling Agency – Contains identity of provider professional (or agency) treating the client.
- Counselor Comments – Contains the counselor’s DSM-IV (Diagnostic and Statistical Manual of Mental Disorders) findings, as well as other assessment data and dates.
- Period of Service – Contains general military era period of service (zero or more).
- Income Expense – Summarizes total monthly income and expenses for client.
- Income Item – Contains zero or more instances of income amount and income type.
- Other Resident – Contains zero or more instances of basic information about other individuals in the client’s home setting.

4.4.5.2. Entity Attributes

Please see Table 7.

Table 7: PTSD Client Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA306	County of Residence	County of residence.	String	Client
EA307	Zip Code of Residence	Zip code of residence.	String	Client
EA308	Client Number	Client number.	String	Client
EA309	Veterans Number	Veteran’s number.	String	Client
EA310	Date of Birth	Date of birth.	Date	Client
EA311	DD214 On File Indicator	DD214 on file indicator.	YesNo	Client
EA312	DD214 Ordered Indicator	DD214 ordered indicator.	YesNo	Client
EA313	DD214 Approved Indicator	DD214 approved indicator.	YesNo	Client
EA314	Other Ethnicity	Other ethnicity.	String	Client
EA315	Single Parent Household Indicator	Single parent household indicator.	YesNoNA	Client
EA316	Number of Marriages	Number of marriages.	Integer	Client
EA317	Referral Source	Referral source.	Integer	Client
EA318	Other Program Information Status	Other program information status.	String	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA319	Occupational Code Highest Lifetime	Occupational code highest lifetime.	Integer	Client
EA320	Occupational Code Current Recent	Occupational code current recent.	Integer	Client
EA321	Total Months Spent in War Zone	Total months spent in war zone.	Integer	Client
EA322	Receiving VA Compensation PTSD	Receiving VA compensation PTSD.	YesNo	Client
EA323	PTSD Compensation Percentage	PTSD compensation percentage.	Percent	Client
EA324	Receiving Compensation for Other Disabilities Indicator	Receiving compensation for other disabilities indicator.	YesNo	Client
EA325	Other Disabilities Compensation Percentage	Other disabilities compensation percentage.	Percent	Client
EA326	Receiving SSI or SSDI Indicator	Receiving SSI or SSDI indicator.	YesNo	Client
EA327	Receiving L&I or Other Indicator	Receiving L and I or other indicator.	YesNo	Client
EA328	Receiving GA-U Indicator	Receiving GA-U indicator.	YesNo	Client
EA329	Client Type	Client type (e.g. Male Veteran).	String	Client
EA330	Homeless Status Type	Homeless status type (e.g. Potentially Homeless).	String	Client
EA331	Marital Status Type	Marital status type (e.g. Widowed).	String	Client
EA332	Ethnicity Type	Ethnicity type.	String	Client
EA333	Employment Status Type	Employment status type (e.g. Unemployed - Not Seeking).	String	Client
EA334	Education Level Type	Education level type (e.g. Associate Degree).	String	Client
EA335	Character of Service Type	Character of service type.	String	Client
EA336	Intake Date	Intake date.	Date	Counseling Agency
EA337	Agency Name	Agency name.	String	Counseling Agency
EA338	Counselor Name	Counselor name.	String	Counseling Agency
EA339	Other Funding Program	Other funding program.	String	Counseling Agency
EA340	Funding Source Type	Funding source type.	String	Counseling Agency

EA358	Currently Active Duty	Currently Active Duty	YesNoNA	Counselor Comments
EA359	Date of Discharge	Date of Discharge	Date	Counselor Comments
EA360	Veteran Discharged Medically	Veteran Discharged Medically	YesNoNA	Counselor Comments
EA361	Other Military History Era	Other military history era.	String	Period of Service
EA362	Military History Era Type	Military history era type (e.g. Vietnam Era).	String	Period of Service
EA363	Total Monthly Income	Total monthly income.	Money	Income
EA364	Amount	Amount.	Money	Income Item
EA365	Other Type of Income	Other type of income.	String	Income Item

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA366	Income Item Type	Type of income (i.e. Annual Veteran Earned Income).	String	Income Item
EA367	Age	Age.	Integer	Other Resident
EA368	Relationship	Relationship.	String	Other Resident

4.4.5.3. Business Entity Model

The business entity model is documented in Appendix E on page 278.

4.4.6. Behavioral Health VTSC Report Business Entity Model

4.4.6.1. Entity Descriptions

The following entities are contained in this business entity model:

-

4.4.6.2. Entity Attributes

Please see Table 9.

Table 8: Behavioral Health VTSC Report Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities	Belongs to BEMs	Program	Data Owner

4.4.7. Veterans Conservation Corps Client Intake Business Entity Model

This model captures detailed information about clients who may be eligible for participation in the Veterans Conservation Corps.

4.4.7.1. Entity Descriptions

The following entities are contained in this business entity model:

- Application – Contains general information about the VCC application status itself.
- Client – Contains identity and demographics about the client.
- Period of Service – Contains the zero or more military periods of service.

- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.
- Income – Summarizes total monthly income for client.
- Income Item – Contains zero or more instances of income amount and income type.
- Other Resident – Contains zero or more instances of identity information about other individuals in the client’s home setting.

4.4.7.2. Entity Attributes

Please see Table 9.

Table 9: Veterans Conservation Corps Client Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA369	Intake Date	Intake date.	Date	Application
EA370	Intake Coordinator	Intake coordinator.	String	Application

EA417	Age	Age.	Date	Other Resident
EA418	Relationship	Relationship.	String	Other Resident

4.4.7.3. Business Entity Model

The business entity model is documented in Appendix F on page 283.

4.4.8. Veterans Conservation Corps Project Management Business Entity Model

Much activity that makes up the fabric of the VCC program lies in the many eco-therapy projects that are planned and run by VCC staff and volunteers. Capturing project data is critical. VCC does not currently use a planning tool, such as MS Project, but does maintain basic project information using Excel and Word. This model is a protracted collection of business information that may be captured when planning and tracking the progress of a VCC project.

4.4.8.1. Entity Descriptions

The following entities are contained in this business entity model:

- Project – Contains general information about the project being planned.
- Project Phase – If a project is broken into various phases, this contains information about each phase.
- Project Phase Goal – Contains stated goals (zero or more) of the project.
- Project Task – If the project has organized specific tasks to execute and in what order, this contains information about each task (zero or more).
- Labor Item – Contains any labor needs that must be available for the project.
- Labor Person (Association Class) – If persons are donating the labor, this entity tracks the relationship to the person to the identified labor need.

- Material Item – Contains and material needs (i.e. wood, hardware, sod) that are required to complete the project.
- Calendar Event – Contains one or more calendar events that are associated with the project.
- Person or Company – Identifies the person(s) or company that is participating in the project either as a volunteer or a donor.
- Person Material Donation (Association Class) – If persons are donating material, this entity tracks the relationship to the person to the identified material need.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the project.
- Location – Contains zero or more known addresses relevant to the project.

4.4.8.2. Entity Attributes

Please see Table 10.

Table 10: Veterans Conservation Corps Project Management Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA419	Project Name	Project name.	String	Project
EA420	Planned End Date	Planned end date.	Date	Project
EA421	Total Project Labor Cost	Total project labor cost.	Money	Project
EA422	Total Project Material Cost	Total project material cost.	Money	Project
EA423	Project Grand Total Cost	Project grand total cost.	Money	Project
EA424	Phase Number	Phase number.	String	Project Phase

EA490	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info

4.4.8.3. Business Entity Model

The business entity model is documented in Appendix F on page 283.

4.4.9. Homeless Veterans Reintegration Project (HVRP) Application Business Entity Model

This model is the main application capture instrument for the Homeless Veterans Reintegration Project (HVRP). It captures the majority of information needed to case manage a client. Follow-Up is another area but its model was not documented since the Assessment Enrollment Placement, and Direct Client Service entities address the basic information.

4.4.9.1. Entity Descriptions

The following entities are contained in this business entity model:

- Client – Contains identity and demographics about the client.
- Application – Contains general information about the HVRP application status itself.
- Employment – Contains summary employment information of the client.
- Legal Information – Contains any legal issues that client is facing or has experienced.
- Income Expense – Summarizes total monthly income and expenses for client.
- Income Item – Contains zero or more instances of income amount and income type.
- Expense Item – Contains zero or more instances of expense amount and expense type.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.
- Assessment Enrollment Placement – Contains follow-up information on a client’s job placement and other relevant assessment factors.
- Award – Contains zero or more military awards bestowed upon the client.

- Immediate Need – Contains zero or more instances of a client’s immediate need for a service or benefit.
- Direct Client Service – Contains zero or more instances of a client’s delivered service to a client, such as training (i.e. Counseling/Vocational Guidance, Job Search Assistance, etc.).
- Permission Item – Contains zero or more aspects of program and personal information that the client may grant (or deny) permission to share with WDVA or other WDVA interested parties.

4.4.9.2. Entity Attributes

Please see Table 11.

Table 11: Homeless Veterans Reintegration Project (HVRP) Application Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA491	HVRP Client ID	HVRP client ID.	String	Client
EA492	Last Name	Last name.	String	Client
EA493	First Name	First name.	String	Client
EA494	Middle Name	Middle name.	String	Client
EA495	Social Security Number	Social security number.	SSN	Client
EA496	Date of Birth	Date of birth.	Date	Client
EA497	Age	Age.	Integer	Client
EA498	Name of Contact or Representative	Name of contact or representative.	String	Client
EA499	Other Ethnicity	Other ethnicity.	String	Client
EA500	Enrolled in DVOP	Enrolled in DVOP.	YesNo	Client
EA501	Enrolled in Health Care Plan Indicator	Enrolled in health care plan indicator.	YesNo	Client
EA502	Need Immediate Medical Treatment Indicator	Need immediate medical treatment indicator.	YesNo	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA503	Medical Treatment Needed	Medical treatment needed.	String	Client
EA504	Homeless Indicator	Homeless indicator.	YesNo	Client
EA505	Homeless Frequency Last 3 Years	Homeless frequency last 3 years.	Integer	Client
EA506	Place Slept Last Night	Place slept last night.	String	Client
EA507	US Citizen Indicator	Us citizen indicator.	YesNo	Client
EA508	Country City State Born In	Country city state born in.	String	Client
EA509	Other Living Situation	Other living situation.	String	Client
EA510	Number of Dependents	Number of dependents.	Integer	Client
EA511	Gives Permission to Share Information Indicator	Gives permission to share information indicator.	YesNo	Client
EA512	Share Information with HVRP Indicator	Share information with HVRP indicator.	YesNo	Client
EA513	HVRP Partner Exceptions	HVRP partner exceptions.	String	Client
EA514	HVRP Partner Exclusives	HVRP partner exclusives.	String	Client
EA515	Gender Type	Gender type (e.g. Male).	String	Client
EA516	Character of Service Type.	Character of service type.	String	Client
EA517	Marital Status Type	Marital status type (e.g. Widowed).	String	Client
EA518	Ethnicity Type	Ethnicity type.	String	Client
EA519	Current Living Situation Type	Current living situation type (e.g. No Residence).	String	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA520	Education Level Type	Education level type (e.g. Associate Degree).	String	Client
EA521	Military Era Type	Military era type (e.g. 4 - 7 Years Ago).	String	Client
EA522	Date Submitted	Date submitted.	Date	Application
EA523	Client Name	Client name.	String	Application
EA524	Client Signature Date	Client signature date.	Date	Application
EA525	Representative Name	Representative name.	String	Application
EA526	Representative Signature Date	Representative signature date.	Date	Application
EA527	Primary Work Skills and Abilities	Primary work skills and abilities.	String	Employment
EA528	Number Jobs Last Two Years	Number jobs last two years.	Integer	Employment
EA529	Reasons Left Jobs	Reasons left jobs.	String	Employment
EA530	Last Date Worked	Last date worked.	Date	Employment
EA531	Employment Status Type	Employment status type (e.g. Day Labor).	String	Employment
EA532	Outstanding Warrants Indicator	Outstanding warrants indicator.	YesNo	Legal Information
EA533	Civil Issues Pending Indicator	Civil issues pending indicator.	YesNo	Legal Information
EA534	Criminal Issues Pending Indicator	Criminal issues pending indicator.	YesNo	Legal Information
EA535	Child Support Indicator	Child support indicator.	YesNo	Legal Information
EA536	Child Support Payment	Child support payment.	Money	Legal Information

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA537	Valid Driver's License Indicator	Valid driver's license indicator.	YesNo	Legal Information
EA538	Driver's License State	Driver's license state.	String	Legal Information
EA539	Driver's License Number	Driver's license number.	String	Legal Information
EA540	Total Monthly Income	Total monthly income.	Money	Income Expense
EA541	Total Monthly Expenses	Total monthly expenses.	Money	Income Expense
EA542	Amount	Amount.	Money	Income Item
EA543	Other Type of Income	Other type of income.	Money	Income Item
EA544	Income Item Type	Income item type (e.g. Employment Self).	String	Income Item
EA545	Amount	Amount.	Money	Expense Item
EA546	Other Type of Expense	Other type of expense	Money	Expense Item
EA547	Expense Item Type	Expense item type (e.g. Rent).	String	Expense Item
EA548	Street Address 1	Street address 1.	String	Location
EA549	Street Address 2	Street address 2.	String	Location
EA550	City	City.	String	Location
EA551	State Province	State province.	String	Location
EA552	Zip Postal Code	Zip postal code.	String	Location
EA553	Location Type	Location type (e.g. Office.)	String	Location

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA554	Phone Number	Phone number.	String	Contact Info
EA555	Email Address	Email address.	String	Contact Info
EA556	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info
EA557	Enrollment Date	Enrollment date.	Date	Assessment Enrollment Placement
EA558	Placement Date	Placement date.	Date	Assessment Enrollment Placement
EA559	Quarter Exited	Quarter exited.	Integer	Assessment Enrollment Placement
EA560	Hourly Wage at Placement	Hourly wage at placement.	Money	Assessment Enrollment Placement
EA561	Hours Per Week	Hours per week.	Integer	Assessment Enrollment Placement
EA562	Other Job Description	Other job description.	String	Assessment Enrollment Placement
EA563	Quarter Placed in Trans or Perm Housing	Quarter placed in trans or perm housing.	Integer	Assessment Enrollment Placement
EA564	Quarter Referred to VA for Benefits	Quarter referred to VA for benefits.	Integer	Assessment Enrollment Placement
EA565	Referred By	Referred by.	String	Assessment Enrollment Placement
EA566	Award Type	Award type (i.e. Ribbon)	String	Award
EA567	Description	Description of award (e.g. Purple Heart).	String	Award
EA568	Other Need Description	Other need description.	String	Immediate Need
EA569	Immediate Need Type	Immediate need type (e.g. Food).	String	Immediate Need

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA570	Other Training	Other training.	String	Direct Client Service
EA571	Date First Provided	Date first provided.	Date	Direct Client Service
EA572	Contract Number	Contract number.	String	Direct Client Service
EA573	Direct Client Service Type	Direct client service type.	String	Direct Client Service
EA574	Permission Type	Permission type (e.g. Personal Data and Demographics).	String	Permission Item

4.4.9.3. Business Entity Model

The business entity model is documented in Appendix G on page 286.

4.4.10. A19 Voucher Distribution (Services) - Business Entity Model

Though this is not associated with any one organization or program, the A19 is omnipresent in the business operations of Veterans Services and Behavioral Health Services, whether to provide a means for BHS contractors to report their time and expenses (VCC and Vet Corps does as well), or to document expenses associated with the HVRP and VIP programs (i.e. gift cards), to name two. Modeling the form is important since we wish to incorporate future billing and reporting needs in the EVCMS.

4.4.10.1. Entity Descriptions

The following entities are contained in this business entity model:

- State Agency – Contains the identity of the agency submitting the report (i.e. WDVA).
- Contractor – Contains the identity of the contractor, if applicable.
- Contract – Contains basic contractual information associated with the services or expenses.
- Voucher – Contains basic payment information.
- Transaction – Contains accounting transaction information, such a Program Index Code and other specific accounting data,
- Session – Contains information on the sessions run by the contractor in delivering counseling services.
- Session Event – Contains information on the session event identities run by (or participating with) the contractor in delivering group counseling services.

- Billable Item – Contains specific billing information for each discrete service rendered.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the contractor.
- Location – Contains zero or more known addresses relevant to the contractor.

4.4.10.2. Entity Attributes

Please see Table 12.

Table 12: A19 Voucher Distribution (Services) - Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA575	Date	Date.	Date	State Agency
EA576	Agency Name	Agency name.	String	State Agency
EA577	Approval Name	Approval name.	String	State Agency
EA578	Contractor Name	Contractor name.	String	Contractor
EA579	Last Name	Last name.	String	Contractor
EA580	First Name	First name.	String	Contractor
EA581	PR or Authorization Number	PR or authorization number.	String	Contractor
EA582	Federal Tax ID	Federal tax id.	String	Contractor
EA583	Vendor Number	Vendor number.	String	Contractor
EA584	Vendor Suffix	Vendor suffix.	String	Contractor
EA585	PR or Authorization Number	PR or authorization number.	String	Contract
EA586	Contract Amount	Contract amount.	Money	Contract
EA587	Contract Start Date	Contract start date.	Date	Contract
EA588	Contract End Date	Contract end date.	Date	Contract
EA589	Billing Month	Billing month.	String	Voucher
EA590	Period From	Period from.	Date	Voucher
EA591	Period To	Period to.	Date	Voucher
EA592	Vendor Message	Vendor message.	String	Voucher
EA593	Document Input Date	Document input date.	Date	Voucher
EA594	Current Document Number	Current document number.	String	Voucher
EA595	Reference Document Number	Reference document number.	String	Voucher
EA596	Preparer Signature Date	Preparer signature date.	Date	Voucher
EA597	Approval Signature Date	Approval signature date.	Date	Voucher
EA598	Warrant Total Amount	Warrant total amount.	Money	Voucher
EA599	Warrant Number	Warrant number.	String	Voucher
EA600	Transaction Code	Transaction code.	String	Transaction
EA601	Transaction Modified Indicator	Transaction modified indicator.	YesNo	Transaction
EA602	Funding Line	Funding line.	String	Transaction
EA603	Appn Index	Apportion index code.	String	Transaction
EA604	PGM Index	Program index code.	String	Transaction
EA605	SUB OBJ	Sub obj.	String	Transaction
EA606	SUB SUB OBJ	Sub sub obj.	String	Transaction

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA607	GL Account	General Ledger (GL) account.	String	Transaction
EA608	Subsidiary DR/CR	Subsidiary DR/CR.	String	Transaction
EA609	Invoice Date	Invoice date.	Date	Transaction
EA610	Amount	Amount.	Money	Transaction
EA611	Invoice Number	Invoice number.	String	Transaction
EA612	Client Number	Client number.	String	Session
EA613	Location of Service	Location of service.	String	Session
EA614	Organization or Group Name	Organization or group name.	String	Session
EA615	Number of Participants	Number of participants.	Integer	Session
EA616	Total Hours	Total hours.	Integer	Session
EA617	Session Type	Session type (e.g. Individual).	String	Session
EA618	Service Type	Service type (e.g. Couple).	String	Session
EA619	Group Type	Group type (e.g. Women).	String	Session
EA620	Event Name	Event name.	String	Session Event
EA621	Event Date	Event date.	String	Session Event
EA622	Hours	Hours.	Integer	Session Event
EA623	Billing Code	Billing code.	String	Billable Item
EA624	Billable Description	Billable description.	String	Billable Item
EA625	Quantity	Quantity.	Integer	Billable Item
EA626	Unit	Unit.	String	Billable Item
EA627	Unit Price	Unit price.	Money	Billable Item
EA628	Amount	Amount.	Money	Billable Item
EA629	Billable Item Type	Billable item type (e.g. Professional Service).	String	Billable Item
EA630	Street Address 1	Street address 1.	String	Location
EA631	Street Address 2	Street address 2.	String	Location
EA632	City	City.	String	Location
EA633	State Province	State province.	String	Location
EA634	Zip Postal Code	Zip postal code.	String	Location
EA635	Location Type	Location type (e.g. Office.)	String	Location
EA636	Phone Number	Phone number.	String	Contact Info
EA637	Email Address	Email address.	String	Contact Info
EA638	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info

4.4.10.3. Business Entity Model

The business entity model is documented in Appendix H on page 288.

4.4.11. Traumatic Brain Injury (TBI) Business Entity Model

This TBI model captures self-assessment information and follow-up information.

4.4.11.1. Entity Descriptions

The following entities are contained in this business entity model:

- Self-Assessment Summary – Contains a client’s TBI self-assessment summary information, including identity.
- Self-Assessment Question – Contains self-assessment questions and the clients answers to those questions.
- Follow-Up – Contains documented follow-up milestones and results of the follow-up.

4.4.11.2. Entity Attributes

Please see Table 13.

Table 13: Traumatic Brain Injury (TBI) Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA639	Client Full Name	Client full name.	String	Self-Assessment Summary
EA640	Client Contact Method(s)	Client contact method(s).	String	Self-Assessment Summary
EA641	Vet Corps Representative	Vet corps representative.	String	Self-Assessment Summary
EA642	Total Yes Answers 1-5	Total yes answers 1-5.	Integer	Self-Assessment Summary
EA643	Total Yes Answers 6-20	Total yes answers 6-20.	Integer	Self-Assessment Summary
EA644	Question Text	Question for self-assessment.	String	Self-Assessment Question
EA645	Self-Assessment Answer Type	Answer to question (e.g. Yes; No; N/A).	String	Self-Assessment Question
EA646	Milestone Follow-Up	Milestone follow-up.	String	Follow-Up
EA647	Follow-Up Date	Follow-up date.	Date	Follow-Up
EA648	Completed Date	Completed date.	Date	Follow-Up
EA649	Completed By	Completed by.	String	Follow-Up
EA650	Working Indicator	Working indicator.	YesNo	Follow-Up
EA651	Working Full or Part Time Indicator	Working full or part time indicator.	YesNo	Follow-Up
EA652	School Full or Part Time Indicator	School full or part time indicator.	YesNo	Follow-Up
EA653	School Name	School name.	String	Follow-Up
EA654	Need Additional Assistance Indicator	Need additional assistance indicator.	YesNo	Follow-Up
EA655	Additional Assistance Description	Additional assistance description.	String	Follow-Up

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA656	Program Has Helped Description	Program has helped description.	String	Follow-Up
EA657	Notes or Comments	Notes or comments.	String	Follow-Up

4.4.11.3. Business Entity Model

The business entity model is documented in Appendix E on page 278.

4.4.12. King County (KC) Call Center Intake Business Entity Model

King County’s WDVA team captures incoming calls for service or information. This model identifies relevant client information resulting from the call.

4.4.12.1. Entity Descriptions

The following entities are contained in this business entity model:

- Client – Contains identity and demographics about the client.
- Call – Contains general information about the call and caller.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.

4.4.12.2. Entity Attributes

Please see Table 14.

Table 14: King County (KC) Call Center Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA658	Last Name	Last name.	String	Client
EA659	First Name	First name.	String	Client
EA660	Middle Name	Middle name.	String	Client
EA661	Social Security Number	Social security number.	SSN	Client
EA662	Date of Birth	Date of birth.	Date	Client
EA663	Age	Age.	Integer	Client
EA664	Registered with VAMC Indicator	Registered with VA Medical Center indicator.	YesNo	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA665	Uses VAMC Indicator	Uses VA Medical Center indicator.	YesNo	Client
EA666	Filed Disability Claim Indicator	Filed disability claim indicator.	YesNo	Client
EA667	Received Rating Yet Indicator	Received rating yet indicator.	YesNo	Client
EA668	Disability Rating	Disability rating.	Percent	Client
EA669	Represented by VSO Indicator	Represented by Veterans Service Organization indicator.	YesNo	Client
EA670	Enrolled in KC Veterans Program Indicator	Enrolled in kc veterans' program indicator.	YesNo	Client
EA671	KC Veterans Program Caseworker Name	Kc veterans program caseworker name.	String	Client
EA672	Enrolled in KC WDVA Program Indicator	Enrolled in KC WDVA program indicator.	YesNo	Client
EA673	KC WDVA Program Caseworker Name	KC WDVA program caseworker name.	String	Client
EA674	Persons with Disabilities Indicator	Persons with disabilities indicator.	YesNoUnknown	Client
EA675	Refugee Immigrant Indicator	Refugee immigrant indicator.	YesNoUnknown	Client
EA676	Limited English Proficiency Indicator	Limited English proficiency indicator.	YesNoUnknown	Client
EA677	General Notes	General notes.	String	Client
EA678	Gender Type	Gender type (e.g. Male).	String	Client
EA679	Character of Service Type.	Character of service type.	String	Client
EA680	Race Type	Race type (e.g. Asian or Asian American).	String	Client
EA681	Household Composition Type	Household composition type (e.g. Single Person).	String	Client
EA682	Household Composition Sub-Type	Household composition sub-type (e.g. Male Adult).	String	Client
EA683	Employment Status Type	Employment status type.	String	Client
EA684	Age Group Type	Age group type (e.g. 0-5).	String	Client
EA685	Branch of Service Type	Branch of service type (e.g. Marine Corps).	String	Client
EA686	Military Status Type	Military status type (e.g. Military Minor dependents).	String	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA687	Household Income Level Type	Household income level type (e.g. Low (<50% Median) \$1517-2529 per Month)	String	Client
EA688	Education Level Type	Education level type (e.g. Certificate).	String	Client
EA689	Date of Call	Date of call.	Date	Call
EA690	Caller Name	Caller name.	String	Call
EA691	Where Found CC Number	Where found cc number.	String	Call
EA692	Calling Within City Limits Indicator	Calling within city limits indicator.	YesNo	Call
EA693	SSN Last Four	SSN last four.	String	Call
EA694	Street Address 1	Street address 1.	String	Location
EA695	Street Address 2	Street address 2.	String	Location
EA696	City	City.	String	Location
EA697	State Province	State province.	String	Location
EA698	Zip Postal Code	Zip postal code.	String	Location
EA699	Location Type	Location type (e.g. Office.)	String	Location
EA700	Phone Number	Phone number.	String	Contact Info
EA701	Email Address	Email address.	String	Contact Info
EA702	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info

4.4.12.3. Business Entity Model

The business entity model is documented in Appendix I on page 290.

4.4.13. King County (KC) Walk-In Intake Business Entity Model

Similar to the call center operation and the information gathered, King County's WDVA team captures walk-in clients asking for service or information. This model identifies relevant client information resulting from the in-person visit.

4.4.13.1. Entity Descriptions

The following entities are contained in this business entity model:

- Client – Contains identity and demographics about the client.
- Walk-In – Contains general information about the walk-in client.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.

4.4.13.2. Entity Attributes

Please see Table 15.

Table 15: King County (KC) Walk-In Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA703	Last Name	Last name.	String	Client
EA704	First Name	First name.	String	Client
EA705	Middle Name	Middle name.	String	Client
EA706	Social Security Number	Social security number.	SSN	Client
EA707	Date of Birth	Date of birth.	Date	Client
EA708	Age	Age.	Integer	Client
EA709	Registered with VAMC Indicator	Registered with VA Medical Center indicator.	YesNo	Client
EA710	Receiving Disability Benefits Indicator	Receiving disability benefits indicator.	YesNo	Client
EA711	Filed Disability Claim Indicator	Filed disability claim indicator.	YesNo	Client
EA712	Received Rating Yet Indicator	Received rating yet indicator.	YesNo	Client
EA713	Disability Rating	Disability rating.	Percent	Client
EA714	Enrolled in KC Veterans Program Indicator	Enrolled in KC veteran’s program indicator.	YesNo	Client
EA715	KC Veterans Program Caseworker Name	KC veterans program caseworker name.	String	Client
EA716	Enrolled in KC WDVA Program Indicator	Enrolled in KC WDVA program indicator.	YesNo	Client
EA717	KC WDVA Program Caseworker Name	KC WDVA program caseworker name.	String	Client
EA718	Represented by VSO Indicator	Represented by Veterans Service Organization indicator.	YesNo	Client
EA719	VSO Name	Veterans Service Organization name.	String	Client
EA720	Persons with Disabilities Indicator	Persons with disabilities indicator.	YesNoUnknown	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA721	Refugee Immigrant Indicator	Refugee immigrant indicator.	YesNo	Client
EA722	Limited English Proficiency Indicator	Limited English proficiency indicator.	YesNo	Client
EA723	Military Service Start Date	Military service start date.	Date	Client
EA724	Military Service End Date	Military service end date.	Date	Client
EA725	Possess DD214 or statement of Service Indicator	Possess DD214 or statement of service indicator.	YesNo	Client
EA726	Recently Incarcerated Indicator	Recently incarcerated indicator.	YesNo	Client
EA727	Incarceration Location	Incarceration location.	String	Client
EA728	Incarceration Timeframe	Incarceration timeframe.	String	Client
EA729	Arson or Sex Offense Conviction Indicator	Arson or sex offense conviction indicator.	YesNo	Client
EA730	General Notes	General notes.	String	Client
EA731	How Can We Help	How can we help?	String	Client
EA732	Referrals Made	Referrals made.	String	Client
EA733	Homeless or At Risk Indicator	Homeless or at risk indicator.	YesNo	Client
EA734	Long Term Homeless Indicator	Long term homeless indicator.	YesNo	Client
EA735	Chronically Homeless Indicator	Chronically homeless indicator.	YesNo	Client
EA736	Disabled Indicator	Disabled indicator.	YesNo	Client
EA737	Hispanic, Latino Ethnicity Indicator	Hispanic, Latino ethnicity indicator.	YesNo	Client
EA738	Character of Service Type.	Character of service type.	String	Client
EA739	Race Type	Race type (e.g. Asian or Asian American).	String	Client
EA740	Household Composition Type	Household composition type (e.g. Single Person).	String	Client
EA741	Household Composition Sub-Type	Household composition sub-type (e.g. Male Adult).	String	Client
EA742	Employment Status Type	Employment status type.	String	Client
EA743	Age Group Type	Age group type (e.g. 0-5).	String	Client
EA744	Branch of Service Type	Branch of service type (e.g. Marine Corps).	String	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA745	Military Status Type	Military status type (e.g. Military Minor dependents).	String	Client

EA747	Education Level Type	Education level type (e.g. Certificate).	String	Client
EA748	Date of Walk-In	Date of walk-in.	Date	Walk-In
EA749	How Found Us	How found us.	String	Walk-In
EA750	SSN Last Four	SSN last four.	String	Walk-In
EA751	County	County.	YesNo	Walk-In
EA752	Street Address 1	Street address 1.	String	Location
EA753	Street Address 2	Street address 2.	String	Location
EA754	City	City.	String	Location
EA755	State Province	State province.	String	Location
EA756	Zip Postal Code	Zip postal code.	String	Location
EA757	Location Type	Location type (e.g. Office.)	String	Location
EA758	Phone Number	Phone number.	String	Contact Info
EA759	Email Address	Email address.	String	Contact Info
EA760	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info

4.4.13.3. Business Entity Model

The business entity model is documented in Appendix I on page 290.

4.4.14. King County (KC) IVRS Intake Business Entity Model

King County has a dedicated, funded Incarcerated Veterans Reintegrated Services program. This model captures the business information required to support incarcerated clients (both present and former).

4.4.14.1. Entity Descriptions

The following entities are contained in this business entity model:

- Intake Summary – Contains general information about the IVRS application status itself.
- Client – Contains identity and demographics about the client.
- Incarceration – Contains information on client’s incarceration background.
- Period of Service – Contains one or more periods of military service of client.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.
- VA Referral – Contains client’s referral history within the VA system.
- Re-Entry – Contains a summary of stipulations and services the case manager identifies as part of a client’s successful re-entry into society.
- Potential Need – Contains zero or more potential needs as part of the re-entry stipulations noted above.
- Veteran Need – Contains zero or more specific veteran’s needs as part of the potential needs identified above.
- Action Plan – Contains zero or more specific actions that are identified as supporting the potential needs identified above.

4.4.14.2. Entity Attributes

Please see Table 16.

Table 16: King County (KC) IVRS Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA761	Contact Date	Contact date.	Date	Intake Summary
EA762	New Intake Indicator	New intake indicator.	YesNo	Intake Summary
EA763	Interviewed By Name	Interviewed by name.	String	Intake Summary
EA764	Case Manager Name	Case manager name.	String	Intake Summary
EA765	No Contact Order Indicator	No contact order indicator.	YesNo	Intake Summary
EA766	Last Name	Last name.	String	Client
EA767	First Name	First name.	String	Client
EA768	Middle Name	Middle name.	String	Client
EA769	Social Security Number	Social security number.	SSN	Client
EA770	Date of Birth	Date of birth.	Date	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA771	Age	Age.	Integer	Client
EA772	Veterans Health Admin Eligibility Indicator	Veterans health admin eligibility indicator.	YesNo	Client
EA773	Receiving Disability Benefits Indicator	Receiving disability benefits indicator.	YesNo	Client
EA774	VBA Disability or Non-Service-Connected Pension Indicator	VBA disability or non-service-connected pension indicator.	YesNo	Client
EA775	Disability Rating	Disability rating.	Percent	Client
EA776	Refugee Immigrant Indicator	Refugee immigrant indicator.	YesNo	Client
EA777	Limited English Proficiency Indicator	Limited English proficiency indicator.	YesNo	Client
EA778	Military Service Start Date	Military service start date.	Date	Client
EA779	Military Service End Date	Military service end date.	Date	Client
EA780	Possess DD214 or statement of Service Indicator	Possess DD214 or statement of service indicator.	YesNo	Client
EA781	General Notes	General notes.	String	Client
EA782	How Can We Help	How can we help?	String	Client
EA783	Referrals Made	Referrals made.	String	Client
EA784	Homeless or At Risk Indicator	Homeless or at risk indicator.	YesNo	Client
EA785	Long Term Homeless Indicator	Long term homeless indicator.	YesNo	Client
EA786	Chronically Homeless Indicator	Chronically homeless indicator.	YesNo	Client
EA787	Persons with Disability	Persons with disability.	YesNo	Client
EA788	Veterans POD Eligibility Indicator	Veterans pod eligibility indicator.	YesNo	Client
EA789	Veterans Court Eligibility Indicator	Veterans court eligibility indicator.	YesNo	Client
EA790	Case Notes	Case notes.	String	Client
EA791	Marital Status Type	Marital status type (e.g. Single).	String	Client
EA792	Race Type	Race type (e.g. White Caucasian).	String	Client
EA793	Gender Type	Gender type (e.g. Transgender).	String	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA794	Character of Service Type	Character of service type(e.g. Dishonorable).	String	Client
EA795	Household Composition Type	Household composition type (e.g. Households with Minors Under 18).	String	Client
EA796	Household Composition Sub-Type	Household composition sub-type (e.g. Two Parent).	String	Client
EA797	Resident Type	Resident type (e.g. Inside City Limits).	String	Client
EA798	Employment Status Type	Employment status type (e.g. Part-Time).	String	Client
EA799	Branch of Service Type	Branch of service type (e.g. Navy).	String	Client
EA800	Education Level Type	Education level type (e.g. Less Than High School Grad).	String	Client
EA801	Military Status Type	Military status type (e.g. US Military Present).	String	Client
EA802	Jail Location	Jail location.	String	Incarceration
EA803	Referred By	Referred by.	String	Incarceration
EA804	In Date	In date.	Date	Incarceration
EA805	Projected Release Date	Projected release date.	Date	Incarceration
EA806	Release Date	Release date.	Date	Incarceration
EA807	Charge(s)	Charge(s).	String	Incarceration
EA808	Attorney/CCO/PO Name	Attorney, community corrections officer, or probation officer name.	String	Incarceration
EA809	Agency Point of Contact Name	Agency point of contact name.	String	Incarceration
EA810	Other Military History Era	Other military history era.	String	Period of Service
EA811	Military History Era Type	Military history era type (e.g. Vietnam Era).	String	Period of Service
EA812	Street Address 1	Street address 1.	String	Location
EA813	Street Address 2	Street address 2.	String	Location
EA814	City	City.	String	Location
EA815	State Province	State province.	String	Location
EA816	Zip Postal Code	Zip postal code.	String	Location

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA817	Location Type	Location type (e.g. Office.)	String	Location
EA818	Phone Number	Phone number.	String	Contact Info
EA819	Email Address	Email address.	String	Contact Info
EA820	Contact Info Type	Contact info type (e.g. Home Email).	String	Contact Info
EA821	VA Referrals Type	VA referrals type (e.g. Primary Care).	String	VA Referral
EA822	VIP Case Manager	VIP case manager.	String	Re-Entry
EA823	Signed ROI Indicator	Signed Release of Information indicator.	YesNo	Re-Entry
EA824	Reason Why Not Signed	Reason why not signed.	String	Re-Entry
EA825	Referred By	Referred by.	String	Re-Entry
EA826	Referral Date	Referral date.	Date	Re-Entry
EA827	First Face-to-Face Date	First face-to-face date.	Date	Re-Entry
EA828	Dept of Corrections Involved Indicator	Dept. of corrections involved indicator.	YesNoUnknown	Re-Entry
EA829	Other Court Involved Indicator	Other court involved indicator.	YesNoUnknown	Re-Entry
EA830	Other Court	Other court.	String	Re-Entry
EA831	Next Court Date	Next court date.	Date	Re-Entry
EA832	Client Release Signature Date	Client release signature date.	Date	Re-Entry
EA833	Currently Connected or Receiving Indicator	Currently connected or receiving indicator.	YesNoUnknown	Potential Need
EA834	Eligibility Indicator	Eligibility indicator.	YesNoUnknown	Potential Need
EA835	Proof of Service Indicator	Proof of service indicator.	YesNoUnknown	Potential Need
EA836	Location of Service	Location of service.	String	Potential Need
EA837	Counselor Name	Counselor name.	String	Potential Need
EA838	Counselor Phone	Counselor phone.	String	Potential Need
EA839	Check with Jail Health Indicator	Check with jail health indicator.	YesNoUnknown	Potential Need
EA840	Plan for Meds Leaving Facility Indicator	Plan for meds leaving facility indicator.	YesNoUnknown	Potential Need
EA841	Substance Abuse History	Substance abuse history.	String	Potential Need

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA842	Substance Abuse Current	Substance abuse current.	String	Potential Need
EA843	Veterans Tx Court Eligibility Indicator	Veterans treatment court eligibility indicator.	YesNoUnknown	Potential Need
EA844	Veterans Tx Court Referred Indicator	Veterans treatment court referred indicator.	YesNoUnknown	Potential Need
EA845	Veterans Tx Court Referral Name	Veterans treatment court referral name.	String	Potential Need
EA846	Private Insurance Indicator	Private insurance indicator.	YesNoUnknown	Potential Need
EA847	VHA Insurance Indicator	VHA insurance indicator.	YesNoUnknown	Potential Need
EA848	Medicaid Indicator	Medicaid indicator.	YesNoUnknown	Potential Need
EA849	Unknown Insurance Indicator	Unknown insurance indicator.	YesNoUnknown	Potential Need
EA850	Shelter Needed Indicator	Shelter needed indicator.	YesNo	Potential Need
EA851	Transitional Housing Needed Indicator	Transitional housing needed indicator.	YesNo	Potential Need
EA852	Permanent Housing Needed Indicator	Permanent housing needed indicator.	YesNo	Potential Need
EA853	Currently Employed Indicator	Currently employed indicator.	YesNo	Potential Need
EA854	Referred to KCVP Indicator	Referred to KVCP indicator.	YesNo	Potential Need
EA855	Potential Need Type	Potential need type (e.g. Clothing).	String	Potential Need
EA856	Need Description	Need description.	String	Veteran Need
EA857	Action Description	Action description.	String	Action Plan
EA858	Next Step Description	Next step description.	String	Action Plan

4.4.14.3. Business Entity Model

The business entity model is documented in Appendix I on page 290.

4.4.15. Statewide IVP Intake Business Entity Model

Similar to the King County IVRS program, the Statewide Incarcerated Veterans Program helps incarcerated veterans (both present and past) get back on track. This model captures both the intake and follow-up of clients involved in the State’s Department of Corrections.

4.4.15.1. Entity Descriptions

The following entities are contained in this business entity model:

- Intake Summary – Contains general information about the IVRS application status itself.
- Client – Contains identity and demographics about the client.
- Incarceration – Contains information on client’s incarceration background.
- Period of Service – Contains one or more periods of military service of client.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.
- Location – Contains zero or more known addresses relevant to the client.
- IVP Contact Info – Contains IVP-specific contact information (i.e. community corrections officer, probation officer) relevant to the client.
- Post-Release Stipulations – Contains a summary of post-release stipulations and services the case manager identifies as necessary for a client’s successful re-entry into society.

4.4.15.2. Entity Attributes

Please see Table 17.

Table 17: Statewide IVP Intake Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA859	Contact Date	Contact date.	Date	Intake Summary
EA860	New Intake Indicator	New intake indicator.	YesNo	Intake Summary
EA861	Referred By Name	Referred by name.	String	Intake Summary
EA862	Interviewed By Name	Interviewed by name.	String	Intake Summary
EA863	Case Manager Name	Case manager name.	String	Intake Summary
EA864	Client Authorization Signature Date	Client authorization signature date.	Date	Intake Summary
EA865	Witness Name	Witness name.	String	Intake Summary
EA866	Witness Date	Witness date.	Date	Intake Summary
EA867	Last Name	Last name.	String	Client
EA868	First Name	First name.	String	Client
EA869	Middle Name	Middle name.	String	Client
EA870	Social Security Number	Social security number.	SSN	Client
EA871	Date of Birth	Date of birth.	Date	Client
EA872	Age	Age.	Integer	Client
EA873	American Lake Enrollment Indicator	American lake enrollment indicator.	YesNo	Client
EA874	Receiving Disability Benefits Indicator	Receiving disability benefits indicator.	YesNo	Client
EA875	VBA Disability Indicator	VBA disability indicator.	YesNo	Client
EA876	Disability Rating	Disability rating.	Percent	Client
EA877	Power of Attorney	Power of attorney.	String	Client
EA878	Military Service Start Date	Military service start date.	Date	Client

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA879	Military Service End Date	Military service end date.	Date	Client
EA880	Possess DD214 or statement of Service Indicator	Possess DD214 or statement of service indicator.	YesNo	Client
EA881	General Notes	General notes.	String	Client
EA882	Homeless Indicator	Homeless indicator.	YesNo	Client
EA883	Persons with Disability	Persons with disability.	YesNo	Client
EA884	Employment Monthly Income	Employment monthly income.	Money	Client
EA885	Household Composition Adults	Household composition adults.	Integer	Client
EA886	Household Composition Minors	Household composition minors.	Integer	Client
EA887	Case Notes	Case notes.	String	Client
EA888	Marital Status Type	Marital status type (e.g. Single).	String	Client
EA889	Race Type	Race type (e.g. White Caucasian).	String	Client
EA890	Gender Type	Gender type (e.g. Transgender).	String	Client
EA891	Character of Service Type	Character of service type (e.g. Dishonorable).	String	Client
EA892	Employment Status Type	Employment status type (e.g. Part-Time).	String	Client
EA893	Branch of Service Type	Branch of service type (e.g. Navy).	String	Client
EA894	Education Level Type	Education level type (e.g. Less Than High School Grad).	String	Client
EA895	Military Status Type	Military status type (e.g. US Military Present).	String	Client
EA896	Other Military History Era	Other military history era.	String	Period of Service
EA897	Military History Era Type	Military history era type (e.g. Vietnam Era).	String	Period of Service
EA898	Work Release Location	Work release location.	String	Incarceration
EA899	Length of Sentence (Days)	Length of sentence (days).	Integer	Incarceration
EA900	Offense(s)	Offense(s).	String	Incarceration
EA901	In Date	In date.	Date	Incarceration
EA902	Early Release Date	Early release date.	Date	Incarceration
EA903	Early Release Savings	Early release savings.	String	Incarceration
EA904	Release Date	Release date.	Date	Incarceration
EA905	Community Corrections Officer Name	Community corrections officer name.	String	Incarceration
EA906	Street Address 1	Street address 1.	String	Location

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA907	Street Address 2	Street address 2.	String	Location
EA908	City	City.	String	Location
EA909	State Province	State province.	String	Location
EA910	Zip Postal Code	Zip postal code.	String	Location
EA911	Location Type	Location type (e.g. Office.)	String	Location
EA912	Phone Number	Phone number.	String	Contact Info
EA913	Email Address	Email address.	String	Contact Info
EA914	Contact Info Type	Contact info type (e.g. Community Corrections Officer).	String	Contact Info
EA915	Person Name	Person name.	String	IVP Contact Info
EA916	Agency Name	Agency name.	String	IVP Contact Info
EA917	Drug and Alcohol Treatment Indicator	Drug and alcohol treatment indicator.	YesNo	Post-Release Stipulations
EA918	Sex Offense Registration Indicator	Sex offense registration indicator.	YesNo	Post-Release Stipulations
EA919	Anger Management Program Indicator	Anger management program indicator.	YesNo	Post-Release Stipulations
EA920	History of Chemical Dependency Indicator	History of chemical dependency indicator.	YesNo	Post-Release Stipulations
EA921	Emergency Contact Name	Emergency contact name.	String	Post-Release Stipulations
EA922	Comments	Comments.	String	Post-Release Stipulations

4.4.15.3. Business Entity Model

The business entity model is contained in Appendix J on page 294.

4.4.16. Service Center Log Business Entity Model

Both the Retsil and Olympia Service Centers capture walk-in registrants.

4.4.16.1. Entity Descriptions

The following entities are contained in this business entity model:

- Walk-In Log – Contains general information about the walk-in.
- Olympia Walk-In Log – Contains specific information about the walk-in at Olympia.
- Retsil Walk-In Log – Contains specific information about the walk-in at Retsil.
- Walk-In Reason – Contains one or more reasons why the walk-in is present.

4.4.16.2. Entity Attributes

Please see Table 18.

Table 18: Service Center Log Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA923	Client Name	Name of walk-in client.	String	Walk-In Log
EA924	Walk-In Date	Walk-in date.	Date	Olympia Walk-In Log
EA925	Walk-In Time	Walk-in time.	TimeStamp	Olympia Walk-In Log
EA926	Person Visited	Person visited.	String	Olympia Walk-In Log
EA927	Last Four SSN	Last four digits of Social Security Number.	String	Retsil Walk-In Log
EA928	Building 9 Client Indicator	Is walk-in a resident of Building 9?	YesNo	Retsil Walk-In Log
EA929	Homeless Indicator	Is walk-in client currently homeless?	YesNo	Retsil Walk-In Log
EA930	Other Reason	Other reason.	String	Walk-In Reason
EA931	Walk-In Reason Type	Walk-in reason type (e.g. Pension).	String	Walk-In Reason

4.4.16.3. Business Entity Model

The business entity model is contained in Appendix K on page 296.

4.4.17. Vet Corps Application Business Entity Model

The Vet Corps program utilizes an exclusive application, eGrants, an online system supported by the federal Corporation for National and Community Service. It's designed to automate the entire grants and project management process from application to closeout. The Vet Corps participants—even before they are hired—utilize eGrants to enter their application, while Vet Corps staff also use the application to track progress and performance. Though this is an external application, we felt it important to document its business entity model because many of the information features in eGrants have partly influenced the future state business information requirements of EVCMS.

4.4.17.1. Entity Descriptions

The following entities are contained in this business entity model:

- Application – Contains application date and signature.
- Member – Contains identity and demographics information on the Vet Corps member.
- Skill – Capture zero or more skills that the member possesses.
- Language – Capture zero or more language speaking and writing skills that the member possesses.
- Legal Information – Contains any legal history of the member.
- Legal Action – Contains and legal actions affecting the member.
- Education Institution – Contains zero or more education experiences of the member.
- Community Service Organization – Contains zero or more volunteer service experiences of the member.

- Employment – Contains zero or more employment positions of the member.
- AmeriCorps Program – Contains zero or more former AmeriCorps experiences of the member.
- Personal or Family Contact – Contains zero or more family or personal contacts that are associated with the member.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the member.
- Location – Contains zero or more known addresses relevant to the member.

4.4.17.2. Entity Attributes

Please see Table 19.

Table 19: Vet Corps Application Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA932	Date Submitted	Date submitted.	Date	Application
EA933	Signature Date	Signature date.	Date	Application
EA934	Last Name	Last name.	String	Member
EA935	First Name	First name.	String	Member
EA936	Middle Name	Middle name.	String	Member
EA937	Social Security Number	Social security number.	SSN	Member
EA938	Date of Birth	Date of birth.	Date	Member
EA939	Earliest Date to Begin Service	Earliest date to begin service.	Date	Member
EA940	Moving Next 6 Months Indicator	Moving next 6 months indicator.	YesNo	Member
EA941	Community Service Summary	Community service summary.	String	Member
EA942	Previously Served in AmeriCorps Indicator	Previously served in AmeriCorps indicator.	YesNo	Member
EA943	Other Education Level	Other education level.	String	Member
EA944	Motivational Statement	Motivational statement.	String	Member
EA945	Valid Driver's License Indicator	Valid driver's license indicator.	YesNo	Member
EA946	Education Level Type	Education level type (e.g. Some College).	String	Member
EA947	Gender Type	Gender (e.g. Female).	String	Member

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA948	Skill Application Description	Skill application description.	String	Skill

EA1004	Contact Info Type	Contact info type (e.g. Community Corrections Officer).	String	Contact Info

4.4.17.3. Business Entity Model

The business entity model is contained in Appendix L on page 298.

4.4.18. Vet Corps Member Performance Evaluation Business Entity Model

Vet Corps staff captures and evaluates member performance on a regular basis. This model captures the relevant information.

4.4.18.1. Entity Descriptions

The following entities are contained in this business entity model:

- Member – Contains basic identity information of the member.
- Member Evaluation – Contains one or more member evaluation summary information (per evaluation milestone).
- Evaluation Comment – For each evaluation milestone, captures one or more comments made by the evaluator (in this case, the regional coordinator and/or Vets Corps staff) in support of the evaluation.
- Evaluation Dimension – For each evaluation milestone, captures one or more evaluation dimension (i.e. aspects) made by the evaluator (in this case, the regional coordinator and/or Vets Corps staff) in support of the evaluation.
- Evaluation Dimension Item – For each evaluation milestone, captures one or more evaluation dimension scores (i.e. aspects) entered by the evaluator (in this case, the regional coordinator and/or Vets Corps staff) in support of the evaluation.

4.4.18.2. Entity Attributes

Please see Table 20.

Table 20: Vet Corps Member Performance Evaluation Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1005	Last Name	Last name.	String	Member
EA1006	First Name	First name.	String	Member
EA1007	Middle Name	Middle name.	String	Member
EA1008	Sponsoring Agency	Sponsoring agency.	String	Member
EA1009	Service Site	Service site.	String	Member
EA1010	Start of Serve Date	Start of serve date.	Date	Member
EA1011	End of Serve Date	End of serve date.	Date	Member
EA1012	Date of Evaluation Review	Date of evaluation review.	Date	Member Evaluation
EA1013	Member Making Progress on Service Hours Indicator	Member making progress on service hours indicator.	YesNo	Member Evaluation
EA1014	Plan for Successful Completion of Hours	Plan for successful completion of hours.	String	Member Evaluation
EA1015	Member Remarks	Member remarks.	String	Member Evaluation
EA1016	Site Supervisor Name	Site supervisor name.	String	Member Evaluation
EA1017	Site Supervisor Signature Date	Site supervisor signature date.	Date	Member Evaluation
EA1018	Regional Coordinator Name	Regional coordinator name.	String	Member Evaluation
EA1019	Regional Coordinator Signature Date	Regional coordinator signature date.	Date	Member Evaluation
EA1020	Member Signature Date	Member signature date.	Date	Member Evaluation
EA1021	Overall Performance Status Type	Overall performance status type (e.g. excellent).	String	Member Evaluation
EA1022	Evaluation Comment Affinity Type	Evaluation comment affinity type (e.g. Improvement Areas).	String	Evaluation Comment
EA1023	Comments	Comments.	String	Evaluation Comment
EA1024	Evaluation Dimension Affinity Type	Evaluation dimension affinity type (e.g. Communication).	String	Evaluation Dimension
EA1025	Comments	Comments.	String	Evaluation Dimension
EA1026	Dimension Score Type	Dimension score type (e.g. Good).	String	Evaluation Dimension Item
EA1027	Dimension Description	Dimension description.	String	Evaluation Dimension Item

4.4.18.3. Business Entity Model

The business entity model is contained in Appendix L on page 298.

4.4.19. Vet Corps Coordinator Performance Evaluation Business Entity Model

Vet Corps staff also captures and evaluates its regional coordinators' performance on a regular basis. This model captures the relevant information.

4.4.19.1. Entity Descriptions

The following entities are contained in this business entity model:

- Coordinator – Contains basic identity information of the regional coordinator.
- Coordinator Evaluation – Contains one or more regional coordinator evaluation summary information (per evaluation milestone).
- Evaluation Comment – For each evaluation milestone, captures one or more comments made by the evaluator (in this case, Vets Corps staff) in support of the evaluation.
- Evaluation Dimension – For each evaluation milestone, captures one or more evaluation dimension (i.e. aspects) made by the evaluator (in this case, the regional coordinator and/or Vets Corps staff) in support of the evaluation.
- Evaluation Dimension Item – For each evaluation milestone, captures one or more evaluation dimension scores (i.e. aspects) entered by the evaluator (in this case, Vets Corps staff) in support of the evaluation.

4.4.19.2. Entity Attributes

Please see Table 21.

Table 21: Vet Corps Coordinator Performance Evaluation Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1028	Last Name	Last name.	String	Coordinator
EA1029	First Name	First name.	String	Coordinator
EA1030	Middle Name	Middle name.	String	Coordinator
EA1031	Sponsoring Agency	Sponsoring agency.	String	Coordinator
EA1032	Region	Region.	String	Coordinator
EA1033	Date of Evaluation Review	Date of evaluation review.	Date	Coordinator Evaluation
EA1034	Evaluator Name	Evaluator name.	String	Coordinator Evaluation
EA1035	Evaluator Signature Date	Evaluator signature date.	Date	Coordinator Evaluation

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1036	Evaluation Comment Affinity Type	Evaluation comment affinity type (e.g. Improvement Areas).	String	Evaluation Comment
EA1037	Comments	Comments.	String	Evaluation Comment
EA1038	Evaluation Dimension Affinity Type	Evaluation dimension affinity type (e.g. Communication).	String	Evaluation Dimension
EA1039	Comments	Comments.	String	Evaluation Dimension
EA1040	Dimension Score Type	Dimension score type (e.g. Excellent).	String	Evaluation Dimension Item
EA1041	Dimension Description	Dimension description.	String	Evaluation Dimension Item

4.4.19.3. Business Entity Model

The business entity model is contained in Appendix L on page 298.

4.4.20. Claims Quality Assurance Business Entity Model

The structure of the Claims QA business entity model mirrors the reporting requirements for that office. Many of the entities have attributes that are merely rollups (derived) of numbers and financial amounts from entities one level below. In future state EVCMS, these functions would likely be accomplished by a reporting function where rollups are features in the report builder of the solution. Still, these relationship in the BEM are important to demonstrate.

4.4.20.1. Entity Descriptions

The following entities are contained in this business entity model:

- WDVA Fiscal Year to Date Claims Sent and Returned – Contains rolled up claims data for WDVA claims effort for fiscal year to date.
- WDVA Monthly Claims Sent or Returned – Contains rolled up claims data for WDVA’s claims effort for the month and year.
- WDVA Service Officer – Contains identity of WDVA community service officer (CSO).
- Fiscal Year to Date Claims Sent and Returned -- Contains rolled up claims data for WDVA claims effort for fiscal year to date for WDVA community service officer.
- Monthly Claims Sent or Returned -- Contains rolled up claims data for WDVA claims effort for month and year for WDVA community service officer.
- Combined Coalition Monthly -- Contains combined rolled up claims data (both service-connected and non-service-connected) for Coalition claims effort for month and year.

- Coalition Monthly -- Contains rolled up claims data separated by service-connected claims and non-service-connected claims for Coalition claims effort for month and year.
- Coalition Member – Contains identity of Coalition member.
- Combined Monthly Claim Summary -- Contains combined rolled up claims data (both service-connected and non-service-connected) for individual Coalition Member claims effort for month and year.
- Monthly Claim Summary -- Contains rolled up claims data separated by service-connected claims and non-service-connected claims for individual Coalition Member claims effort for a given month and year.
- Total FDC Monthly Claim Summary -- Contains rolled up Fully Developed Claims data for all Coalition Members' combined claims effort for a given month and year.
- FDC Monthly Claim Summary -- Contains rolled up Fully Developed Claims data for an individual Coalition Member's claims effort for a given month and year.

4.4.20.2. Entity Attributes

Please see Table 22.

Table 22: Claims Quality Assurance Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1547	Fiscal Year	Fiscal year.	String	WDVA Fiscal Year to Date Claims Sent and Returned

4.4.20.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.4.21. CABHI/BRIDGES Business Entity Model

The CABHI/BRIDGES team uses two external reporting tools¹³ as required by the grant. However, the source for building this business entity model stems from the tracking sheet that is used in day-to-day operations. There is also an extensive 22-page interview/screening document that we felt was inappropriate for a business entity model.

4.4.21.1. Entity Descriptions

The following entities are contained in this business entity model:

- BRIDGES Client – Contains summary data about the client.
- Housing Placement – Documents one or more housing placement events.
- Employment – Documents one or more employment experiences.
- Benefits – Documents client benefits information.

4.4.21.2. Entity Attributes

Please see Table 23.

Table 23: CABHI/BRIDGES Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1626	Last Name	Last name.	String	BRIDGES Client
EA1627	First Name	First name.	String	BRIDGES Client
EA1628	Middle Name	Middle name.	String	BRIDGES Client

4.4.21.3. Business Entity Model

The business entity model is contained in Appendix C on page 273.

4.5. To-Be Data Crosswalk

This section documents the current state of how the Veterans Services and Behavioral Health Services divisions use the business information they own. The following programs are represented:

- To-Be Certificate of Discharge (DD214 and DD215) Business Entity Model
- To-Be WDVA Detailed Business Entity Model 1 of 6 – Client Identity Perspective
- To-Be WDVA Detailed Business Entity Model 2 of 6 – Client Program Participation Perspective
- To-Be WDVA Detailed Business Entity Model 3 of 6 – Program Design and Management Perspective
- To-Be WDVA Detailed Business Entity Model 4 of 6 – Provider Identity Perspective
- To-Be WDVA Detailed Business Entity Model 5 of 6 – Provider Services Perspective
- To-Be WDVA Detailed Business Entity Model 6 of 6 – Project Management Perspective

4.5.1. To-Be Certificate of Discharge (DD214 and DD215) Business Entity Model

We recommend that the Certificate of Discharge structure be enhanced to accommodate more flexibility in reporting and to accommodate future needs, such as the ability to record when (and by whom) DD214/DD215 electronic data from DMDC is imported into the EVCMS.

We also recommend that the future state (to-be) Certificate of Discharge data structure be designed and implemented separately from the balance of business entities that follow this section. We recommend doing so for the following reasons:

- The Certificate of Discharge is the authoritative record for a veteran’s military service. It should be imported and preserved in its original content and relationships. It should also be rendered as a read-only structure so that no one will change it¹⁴.
- There are several business requirements for this project that require the Certificate of Discharge be generated in its original format and block design. Preserving the original

¹⁴ Legitimate errors should be reported to the DMDC and a DD215 (corrected DD214) should be issued.

data structure is critical to guaranteeing the generated document is identical to that issued by the DMDC.

4.5.1.1. Entity Descriptions

The following entities are contained in this business entity model:

- Unique Person – Contains the unique identity of the veteran using the SSN.
- Certificate of Discharge – Contains zero or more Certificate of Discharge summary information of the veteran.
- Record of Service – Contains one or more records of military service (block 12).
- Award – Contains one or more service awards (block 13).
- Import Export Record – Contains a record of when the Certificate of Discharge records were imported and when (one or more) they were exported.
- Location – Contains zero or more known addresses relevant to the Certificate of Discharge (blocks 5b and 19a).
- Military Occupational Specialty – Contains one or more of the client’s military occupational specialties while serving (block 11)
- Remark – Contains general remarks for Certificate of Discharge (block 18).
- Military Education – Contains one or more military education training on Certificate of Discharge (block 14).
- Military Campaign – Contains one or more military campaigns for Certificate of Discharge (block 18).
- Communication – Contains one or more records indicating veteran was sent the Governor’s Letter or a Purple Heart Letter.

4.5.1.2. Entity Attributes

Please see Table 24.

Table 24: To-Be Certificate of Discharge (DD214 and DD215) Business Entity Model List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1042	Social Security Number	Social security number.	String	Unique Person

EA1103	Sent By	Person's name of sender.	String	Communication
EA1104	Communication Type	Communication type (e.g. Governor's Letter).	String	Communication

4.5.1.3. Business Entity Model

The business entity model is documented in Appendix B on page 270.

4.5.2. To-Be WDVA Detailed Business Entity Model 1 of 6 – Client Identity Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Client's Identity Perspective: all information regarding the identity and demographics of the client.

4.5.2.1. Entity Descriptions

The following entities are contained in this business entity model:

- Entity – Contains an abstract entity used in this model to minimize associations (lines between boxes). Several entities, such as Contact Info and Location, are associated with this entity.
- Person – Contains general information about a person, in this case, the Social Security Number and Data of Birth. The SSN is not required of certain persons, such as Provider Professionals.
- Person to Person (association class) – This is a UML modeling device known as an *association class*. It captures information about a relationship between one instance of *Person* with another instance of *Person*. Examples of this relationship are explained in Section 4.3.3.3 Use of Association Classes on page 161.

- Identity – Contains one or more identity instance for a given *Person*. This is by design since unique persons with a social security number sometimes change names (i.e. by preference, by marriage, by divorce, etc.). *Gender Type* and *Identity Type* are included since these may change with the identity of the *Person*.
- Client (generalized up to *Person*). – Contains the demographic information of the client.
- Organization – Contains the identity of an organization that is relevant to a *Person*.
- Org to Person (association class) – This is a UML modeling device known as an *association class*. It captures information about a relationship between one instance of *Organization* with another instance of *Person*. For example, an organization, XYZ Analytics, may have as an employee, Susan Smith, in which case the *Org to Person's* attribute *Role Type* would be *Employer*. However, ABC Community College may also list Susan as a student, in which case the *Org to Person's* attribute *Role Type* would be *Educational Institution*. In a third example, WDVA, an *Organization*, may be the *Power of Attorney* for Susan, a *Client*, which is a kind of *Person*. In all three scenarios, only one *Person* record is required for Susan Smith. This eliminates duplicate records and improves (or maintains) data quality.
- Employment History – Contains summary employment information for the client.
- Job – Contains zero or more job history information for the client.
- Housing – Contains zero or more housing situations for the client.
- Benefit and Entitlement Summary – Contains summary benefits and entitlement information for the client.
- Benefit – Contains zero or more specific benefits—either awarded or applied for (i.e. claims)—the client is anticipating or already receiving.
- Permission – Contains zero or more documented permission types—resources such as “sharing PII”, or sharing a client’s Certificate of Discharge, or sharing mental health records with, say DSHS—that can be defined for the client with the ability to permit or deny the resource.¹⁵
- Education Institution – Contains zero or more education experiences for the client.
- Income Expense – Contains summary income and/or expense information, including derived total amounts.
- Income or Expense Item – Contains zero or more
- Legal – Contains a client’s legal obligations and/or history.
- Incarceration – Contains zero or more incarcerated events for the client.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the client.

¹⁵ Practically any type of permission (sometimes known as a *right*) can be defined and then associated with a client and an accompanying *permit* or *deny*.

- Location – Contains zero or more known addresses relevant to the client.
- Period of Military Service – Contains zero or more periods of military service for the client.
- Military Campaign – Contains zero or more military campaigns for a given instance of period of military service.
- Military Occupational Specialty – Contains one or more of the client’s military occupational specialties while serving.
- Award – Contains zero or more awards conferred to the client during a given instance of period of military service.

4.5.2.2. Entity Attributes

Please see Table 25.

Table 25: To-Be WDVA Detailed Business Entity Model 1 of 6 – Client Identity Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1105	N/A	Abstract entity to ease congestion of entity associations.	N/A	Entity
EA1106	Social Security Number	Social Security Number.	String	Person
EA1107	Date of Birth	Date of birth.	Date	Person
EA1108	Professional Title	Professional title.	String	Person
EA1109	Start Date	State date of relationship.	Date	Person to Person (association class)
EA1110	End Date	End date of relationship.	Date	Person to Person (association class)
EA1111	Preference Indicator	Preference indicator (used to denote one person's preference in associating with another--i.e. a client may wish to work with a specific VBA).	YesNo	Person to Person (association class)
EA1112	Relationship Type	Relationship type (e.g. Spouse).	String	Person to Person (association class)
EA1113	Last Name	Last name.	String	Identity
EA1114	First Name	First name.	String	Identity
EA1115	Middle Name	Middle name.	String	Identity
EA1116	Suffix	Suffix.	String	Identity
EA1117	Prefix	Prefix.	String	Identity
EA1118	Anonymous Indicator	Anonymous indicator.	YesNo	Identity

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1119	Identity Type	Identity type (e.g. Current).	String	Identity
EA1120	Gender Type	Gender type (e.g. Transgender).	String	Identity
EA1121	Other Ethnicity	Other ethnicity.	String	Client (generalized up to Person).
EA1122	Enrolled in Health Care Plan Indicator	Enrolled in health care plan indicator.	YesNo	Client (generalized up to Person).
EA1123	Family Enrolled in Health Care Plan Indicator	Family enrolled in health care plan indicator.	YesNo	Client (generalized up to Person).
EA1124	Health Care Plan	Health care plan.	String	Client (generalized up to Person).
EA1125	Family Health Care Plan	Family health care plan.	String	Client (generalized up to Person).
EA1126	Homeless Indicator	Homeless indicator.	YesNo	Client (generalized up to Person).
EA1127	Homeless How Long Months	Homeless how long months.	Integer	Client (generalized up to Person).
EA1128	Unemployment Insurance Indicator	Unemployment insurance indicator.	YesNo	Client (generalized up to Person).
EA1129	UI Benefits Start Date	UI benefits start date.	Date	Client (generalized up to Person).
EA1130	UI Benefits End Date	UI benefits end date.	Date	Client (generalized up to Person).
EA1131	Employed Indicator	Employed indicator.	YesNo	Client (generalized up to Person).
EA1132	Housing History Summary	Housing history summary.	String	Client (generalized up to Person).
EA1133	Valid Driver's License Indicator	Valid driver's license indicator.	YesNo	Client (generalized up to Person).
EA1134	Driver License State	Driver license state.	String	Client (generalized up to Person).
EA1135	Driver License Number	Driver license number.	String	Client (generalized up to Person).
EA1136	WDVA Employee Indicator	Is this client also a WDVA employee? If so, then most WDVA staff will be barred from viewing the client record.	YesNo	Client (generalized up to Person).
EA1137	Race Type	Race type (e.g. White Caucasian).	String	Client (generalized up to Person).
EA1138	Employment Status Type	Employment status type (e.g. Unemployed).	String	Client (generalized up to Person).
EA1139	Education Level Type	Education level type (e.g. Some High School).	String	Client (generalized up to Person).
EA1140	Current Living Situation Type	Current living situation type (e.g. No Residence).	String	Client (generalized up to Person).

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1141	Marital Status Type	Marital status type (e.g. Widowed).	String	Client (generalized up to Person).
EA1142	Military Status Type	Military status type (e.g. Military minor dependents).	String	Client (generalized up to Person).
EA1143	Household Composition Type	Household composition type (e.g. Single Person).	String	Client (generalized up to Person).
EA1144	Household Composition Sub-Type	Household composition sub-type (e.g. Single Parent Female).	String	Client (generalized up to Person).
EA1145	Name	Name.	String	Organization
EA1146	Tax ID Number	Tax ID number.	String	Organization
EA1147	Business Type	Business type.	String	Organization
EA1148	Start Date	State date of relationship.	Date	Org to Person (association class)
EA1149	End Date	End date of relationship.	Date	Org to Person (association class)
EA1150	Role Type	Role type (e.g. Employer, Educational Institution, Power of Attorney).	String	Org to Person (association class)
EA1151	Hours per Week	Hours per week.	Integer	Job
EA1152	Hourly Wage	Hourly wage.	Money	Job
EA1153	Monthly Gross Salary	Monthly gross salary.	Money	Job
EA1154	Job Title	Job title.	String	Job
EA1155	Job Duties	Job duties.	String	Job
EA1156	Start Date	State date of job.	Date	Job
EA1157	End Date	End date of job.	Date	Job
EA1158	Employed	Employed.	YesNo	Employment History
EA1159	Unemployed and Looking	Unemployed and looking.	YesNo	Employment History
EA1160	Unemployed and Not Looking	Unemployed and not looking.	YesNo	Employment History
EA1161	Retired of Otherwise Not Looking	Retired of otherwise not looking.	YesNo	Employment History
EA1162	Seeking Employment	Seeking employment.	YesNo	Employment History
EA1163	Recently Laid Off or Fired	Recently laid off or fired.	YesNo	Employment History
EA1164	Health Issues	Health issues.	YesNo	Employment History

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1165	Mental Health Issues	Mental health issues.	YesNo	Employment History
EA1166	Lack of Transportation	Lack of transportation.	YesNo	Employment History
EA1167	Discrimination	Discrimination.	YesNo	Employment History
EA1168	Educational Barriers	Educational barriers.	YesNo	Employment History
EA1169	No Training	No training.	YesNo	Employment History
EA1170	Insufficient Job Skills	Insufficient job skills.	YesNo	Employment History
EA1171	Drugs	Drugs.	YesNo	Employment History
EA1172	Alcohol	Alcohol.	YesNo	Employment History
EA1173	Other Reason 1	Other reason 1.	String	Employment History
EA1174	Other Reason 2	Other reason 2.	String	Employment History
EA1175	Start Date	Start date.	Date	Housing
EA1176	End Date	End date.	Date	Housing
EA1177	Own Home Indicator	Own home indicator.	YesNo	Housing
EA1178	Rent Lease Indicator	Rent lease indicator.	YesNo	Housing
EA1179	Temporary Shelter Indicator	Temporary shelter indicator.	YesNo	Housing
EA1180	Staying with Friend or Relative Indicator	Staying with friend or relative indicator.	YesNo	Housing
EA1181	Eviction Foreclosure Indicator	Eviction foreclosure indicator.	YesNo	Housing
EA1182	Eviction Foreclosure Date Issued	Eviction foreclosure date issued.	Date	Housing
EA1183	Eviction Foreclosure Effective Date	Eviction foreclosure effective date.	Date	Housing
EA1184	Utility Shut Off Indicator	Utility shut off indicator.	YesNo	Housing
EA1185	Utility Shut Off Date Issued	Utility shut off date issued.	Date	Housing
EA1186	Utility Shut Off Effective Date	Utility shut off effective date.	Date	Housing
EA1187	Disability Description	Disability description.	String	Benefit
EA1188	Entitlement Description	Entitlement description.	String	Benefit
EA1189	Date VA Claim Filed	Date VA claim filed.	Date	Benefit

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1190	Service-Related Indicator	Service-related indicator.	YesNo	Benefit
EA1191	Issues Submitted Indicator	Issues submitted indicator.	YesNo	Benefit
EA1192	Claims Rated Indicator	Claims rated indicator.	YesNo	Benefit
EA1193	Issues Rated Indicator	Issues rated indicator.	YesNo	Benefit
EA1194	Anticipate Award Indicator	Anticipate award indicator.	YesNo	Benefit
EA1195	Award Granted Indicator	Award granted indicator.	YesNo	Benefit
EA1196	Award Percentage	Award percentage.	Percent	Benefit
EA1197	Benefit Monthly Amount	Benefit monthly amount.	Money	Benefit
EA1198	Date Eligible	Date eligible.	Date	Benefit
EA1199	Benefits Entitlement Type	Benefits entitlement type (e.g. Education and Training).	String	Benefit
EA1200	VA Education Benefit Type	VA education benefit type (e.g. MGIB).	String	Benefit
EA1201	Power of Attorney	Power of Attorney.	String	Benefit and Entitlement Summary
EA1202	Accessed Other VA Ben Entitle Indicator	Accessed other VA benefits entitlement indicator.	YesNo	Benefit and Entitlement Summary
EA1203	Receiving VA Education Benefits Indicator	Receiving VA education benefits indicator.	YesNo	Benefit and Entitlement Summary
EA1204	Other VA Education Benefit	Other VA education benefits.	YesNo	Benefit and Entitlement Summary
EA1205	Registered with VAMC Indicator	Registered with Veterans Affairs Medical Center indicator.	YesNo	Benefit and Entitlement Summary
EA1206	Information Description	Information description.	String	Permission
EA1207	Permission Granted Indicator	Permission granted indicator.	YesNo	Permission
EA1208	Date Granted	Date granted.	Date	Permission
EA1209	Full Time Student Indicator	Full time student indicator.	YesNo	Education Institution
EA1210	WorkStudy Program Indicator	Work-study program indicator.	YesNo	Education Institution
EA1211	WorkStudy Location	Work-study location.	String	Education Institution
EA1212	Start Date	Start date.	Date	Education Institution
EA1213	End Date	End date.	Date	Education Institution

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1214	Degree Type	Degree type (e.g. Associate Degree).	String	Education Institution
EA1215	Total Monthly Income	Total monthly income.	Money	Income Expense
EA1216	Total Monthly Expenses	Total monthly expenses.	Money	Income Expense
EA1217	Amount	Amount.	Money	Income or Expense Item
EA1218	Other Type of Income or Expense	Other Type of Income or Expense.	String	Income or Expense Item
EA1219	Income Item Type	Income item type (e.g. Employment).	String	Income or Expense Item
EA1220	Expense Item Type	Expense item type (e.g. Car Payment).	String	Income or Expense Item
EA1221	Outstanding Warrants Indicator	Outstanding warrants indicator.	YesNo	Legal
EA1222	Civil Issues Pending Indicator	Civil issues pending indicator.	YesNo	Legal
EA1223	Criminal Issues Pending Indicator	Criminal issues pending indicator.	YesNo	Legal
EA1224	Child Support Indicator	Child support indicator.	YesNo	Legal
EA1225	Child Support Payment	Child support payment.	Money	Legal
EA1226	Work Release Location	Work release location.	String	Incarceration
EA1227	Correctional Facility	Correctional facility.	String	Incarceration
EA1228	Length of Sentence (Days)	Length of sentence (days).	Integer	Incarceration
EA1229	Offense(s)	Offense(s).	String	Incarceration
EA1230	In Date	In date.	Date	Incarceration
EA1231	Early Release Date	Early release date.	Date	Incarceration
EA1232	Early Release Savings	Early release savings.	String	Incarceration
EA1233	Release Date	Release date.	Date	Incarceration
EA1234	Community Corrections Officer Name	Community corrections officer name.	String	Incarceration
EA1235	Street Address 1	Street address 1.	String	Location
EA1236	Street Address 2	Street address 2.	String	Location
EA1237	City	City.	String	Location
EA1238	State Province	State province.	String	Location

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1239	Zip Postal Code	Zip postal code.	String	Location
EA1240	Location Type	Location type (e.g. Office.)	String	Location
EA1241	Phone Number	Phone number.	String	Contact Info
EA1242	Email Address	Email address.	String	Contact Info
EA1243	Contact Info Type	Contact info type (e.g. Community Corrections Officer).	String	Contact Info
EA1244	Other Military History Era	Other military history era.	String	Period of Military Service
EA1245	Operation Name	Operation name.	String	Period of Military Service
EA1246	Start Date	Start date.	Date	Period of Military Service
EA1247	End Date	End date.	Date	Period of Military Service
EA1248	Station Separated	Station separated.	String	Period of Military Service
EA1249	Type of Separation	Type of separation.	String	Period of Military Service
EA1250	Proof Provided Indicator	Proof provided indicator.	YesNo	Period of Military Service
EA1251	Character of Service Type	Character of service type.	String	Period of Military Service
EA1252	Branch of Service Type	Branch of service type.	String	Period of Military Service
EA1253	Military History Era Type	Military history era type.	String	Period of Military Service
EA1254	Campaign Type	Name of campaign (e.g. Iraqi Freedom).	String	Military Campaign
EA1255	Number	Number.	Integer	Military Occupational Specialty
EA1256	Title	Title.	String	Military Occupational Specialty
EA1257	Years	Years.	Integer	Military Occupational Specialty
EA1258	Months	Months.	Integer	Military Occupational Specialty
EA1259	MOS Type	MOS type (e.g. Primary).	String	Military Occupational Specialty
EA1260	Description	Award.	String	Award
EA1261	Award Type	Award type (e.g. Ribbon).	String	Award

4.5.2.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.5.3. To-Be WDVA Detailed Business Entity Model 2 of 6 – Client Program Participation Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Client's Program Participation Perspective: all information regarding the client's needs, pre-eligibility, eligibility, program participation, and program follow-up.

4.5.3.1. Entity Descriptions

The following entities are contained in this business entity model:

- Application Intake Summary – Contains program-specific application summary information, such as date of application and whether it was approved or denied.
- Referral – Contains one or more referrals associated with the client.
- Program Pre-Eligibility Evaluation – Contains generic pre-eligibility considerations defined by the program manager that case managers might consider in evaluating a client's readiness for a program. This is needed because, among the 15 existing WDVA programs, there is wide disparity of the number of "data points" that a program manager or case manager considers. Too, this was necessarily a separate entity than *Actual Program Eligibility*. Typical examples of considerations are: VA Benefits Indicator; VHA insurance indicator; and Family Enrolled in Health Care Plan Indicator.¹⁶ These are defined in the entity *Program Pre-Eligibility Evaluation* (Section 4.5.4.2 on page 252).
- Program Pre-Eligibility Consideration – This documents, per each *Program Pre-Eligibility Evaluation*, one or more findings of the case manager (or program manager) as to the client's status regarding the evaluation item.
- Actual Program Eligibility – Contains one or more eligibility requirements of the program that a client must satisfy. These are defined in the entity *Program Eligibility* (Section 4.5.4.2 on page 252).
- Actual Program Eligibility Criterion – In the case of complex eligibility requirements—more than one criterion—documents the client's eligibility criterion status. For example, the Transitional Housing Services Program (THSP, Building 9) has 15 separate

¹⁶ As with the Permission entity noted in Footnote 15, practically any type of pre-eligibility consideration can be defined and then associated with a program.

but related eligibility requirements for admission as a resident. In this case, there would be 15 instances of *Actual Program Eligibility Criterion* for the THSP.

- Assessed Need – Contains zero or more assessed needs of the client (by the case manager, program manager or VBS), classified by three types: potential, immediate or other.
- Resource Applied For – Contains zero or more resources that the client has applied for through channels other than WDVA (e.g. Salvation Army, Minutemen).
- Case Note – Contains one or more generic case notes that can be entered by anyone with an interest in the client (rights and privileges notwithstanding).
- Client Meeting/Contact – Contains one or more instances of the client contacting WDVA, or vice versa, and the nature, time, and outcome of that contact.
- Program Client Assessment Factor – Contains one or more instances where the programs’ design calls for periodic (or one time) assessments to be made of the client’s progress in the program.¹⁷ These are defined in the entity *Program Assessment Factor* (Section 4.5.4.2 on page 252).
- Consumed Program – Contains zero or more instances of a specific program that is *consumed* (i.e. used) by the client.
- Consumed Service – If certain designed programs contain services, contains one or more instances of a client *consuming* a program service.
- Provisioned Item – If certain designed programs contain services that in turn contain provisioned items—such as gift cards—then contains one or more instances of a client receiving a provisioned item.
- Program Client Milestone – If a certain designed program contains one or more milestones—notable events in the life of the program—then contains one or more milestone events that the client will experience with his/her case manager.
- Program Client Outcome – If a certain designed program contains one or more planned outcomes—important measures or metrics gauging the success of the client’s participation in the program—then contains one or more outcome instances that the client’s participation in the program will measure and record. **Note:** Most all of the existing 15 WDVA programs has some outcome criteria or metrics.
- Post-Program Client Stipulations – Contains summary information about a client’s post-program needs or recommendations so the client can continue to be successful.
- Post-Program Client Stipulation – Contains zero or more individual post-program stipulations described in the bullet above.

4.5.3.2. Entity Attributes

Please see Table 26.

¹⁷ As with the Permission entity noted in Footnote 16, practically any type of Program Client Assessment can be defined and then associated with a program.

Table 26: To-Be WDVA Detailed Business Entity Model 2 of 6 – Client Program Participation Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1262	Date Submitted	Date submitted.	Date	Application Intake Summary
EA1263	Date Approved or Denied	Date approved or denied.	Date	Application Intake Summary
EA1264	Approved Indicator	Approved indicator.	YesNo	Application Intake Summary
EA1265	Denial Reason	Denial reason.	String	Application Intake Summary
EA1266	Notes	Notes.	String	Application Intake Summary
EA1267	Signature Date	Signature date.	Date	Application Intake Summary
EA1268	Referral Date	Date referral received by WDVA.	Date	Referral
EA1269	Referral Type	Source of referral.	String	Referral
EA1270	Summary Description	Description of overall impression of case manager of client's presumed eligibility considering all pre-eligibility considerations.	String	Program Pre-Eligibility Evaluation
EA1271	Pre-Eligibility Factor Name	Pre-eligibility factor name.	String	Program Pre-Eligibility Consideration
EA1272	Description	Description.	String	Program Pre-Eligibility Consideration
EA1273	Client Meets Indicator	Client meets indicator.	YesNo	Program Pre-Eligibility Consideration
EA1274	Relevant Start Date	Relevant start date.	Date	Program Pre-Eligibility Consideration
EA1275	Relevant End Date	Relevant end date.	Date	Program Pre-Eligibility Consideration
EA1276	Client Eligible for Program Indicator	Client eligible for program indicator.	YesNo	Actual Program Eligibility
EA1277	Eligibility DateTime	Eligibility DateTime.	TimeStamp	Actual Program Eligibility

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1278	Comments	Comments.	String	Actual Program Eligibility

EA1336	Relevant Quarter	Relevant quarter.	Integer	Program Client Milestone
EA1337	Comments	Comments.	String	Program Client Milestone
EA1338	Stipulation Summary	Case manager's summary description of what client needs to do to become or remain successful.	String	Post-Program Client Stipulations
EA1339	Stipulation Name	Stipulation name.	String	Post-Program Client Stipulation
EA1340	Stipulation Description	Stipulation description.	String	Post-Program Client Stipulation
EA1341	Relevant Date	Relevant date.	Date	Post-Program Client Stipulation
EA1342	Relevant Quarter	Relevant quarter.	Integer	Post-Program Client Stipulation
EA1343	Client Agrees Indicator	Client agrees indicator.	YesNo	Post-Program Client Stipulation
EA1344	Verification Date	Date case manager should contact client to verify that the stipulation is in progress or has been met.	Date	Post-Program Client Stipulation
EA1345	Comments	Comments.	String	Post-Program Client Stipulation

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1346	Stipulation Type	Stipulation type (e.g. Suggested, Required).	String	Post-Program Client Stipulation
EA1347	Stipulation Status Type	Stipulation status type (Planned, Reviewed with Client).	String	Post-Program Client Stipulation

4.5.3.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.5.4. To-Be WDVA Detailed Business Entity Model 3 of 6 – Program Design and Management Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Program Design and Management Perspective: all information regarding the structure, service offerings, eligibility, and recommended steps and milestones in successfully managing almost any program WDVA currently manages, and ones yet conceived.

4.5.4.1. Entity Descriptions

The following entities are contained in this business entity model:

- Program – Contains identity information about the program under design or in production.
- Program Required Resource – Contains zero or more resources (people, FTEs, financials (required for the program to be successfully implemented).
- Program Funding Cycle – Contains zero or more program funding cycles that the grantor or funding source has agreed to with the grantee (WDVA) under contract.
- Program Funding Source – Contains zero or more funding sources—grantors or other sources—that will be funding all or part of the program cost for the associated *Program Funding Cycle*.
- Program Funding Stipulation – Contains zero or more terms of funding (external funding requirements) from the associated *Program Funding Source*.
- Program Cost Item – Contains zero or more real program costs that are identified, classified as either budgeted or actual.
- Program Service Summary – Contains summary information about the program's offered services to clients.

- Program Service – Contains zero or more individual consumable program services.
- Program Document – Programs typically contain use or required documents— assessments, applications, etc.—that the grantee must comply with. Contains zero or more document specifications to be utilized in the running of the program.
- Program Procedure – If the program has documented steps in the running of the program, contains summary information about the program procedures as a whole.
- Program Procedure Step – Contains zero or more individual documented procedure steps that are optionally associated with certain phases of the program.
- Program Assessment Factor – Contains zero or more assessment factors that the program’s design may require. Periodic (or one time) assessments can be made of the client’s progress in the program.¹⁷
- Program Assessment Response Value – Contains zero or more acceptable responses to *Program Assessment Factor*. Examples: Yes, No, Don’t Know.
- Program Milestone – Contains zero or more program milestones as described in the previous section.
- Program Outcome – Contains zero or more program outcomes as described in the previous section.
- Program Pre-Eligibility Evaluation – Contains zero or more program pre-eligibility evaluations as described in the previous section.
- Program Pre-Eligibility Consideration – Contains zero or more program pre-eligibility considerations per the *Program Pre-Eligibility Evaluation* as described in the previous section.
- Program Eligibility – Contains zero or more program eligibility requirements as described in the previous section.
- Program Eligibility Criterion – Contains zero or more program eligibility criteria as described in the previous section.
- Criterion Join (Association Class) – Contains zero or more program eligibility criterion joins (i.e. AND or OR) as described in the previous section. For example: a program may require that the client [(a) be registered with the VA Medical Center OR (b) be enrolled in a metal health program] AND (c) be a King County resident.

4.5.4.2. Entity Attributes

Please see Table 27.

Table 27: To-Be WDVA Detailed Business Entity Model 3 of 6 – Program Design and Management Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1348	Name	Name.	String	Program

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1349	Start Date	Start date.	Date	Program
EA1350	End Date	End date.	Date	Program
EA1351	Accounting Reference	Accounting reference.	String	Program
EA1352	Description	Description.	String	Program Required Resource
EA1353	Planned Start Date	Planned start date.	Date	Program Required Resource
EA1354	Planned End Date	Planned end date.	Date	Program Required Resource
EA1355	Estimated Number of FTE	Estimated number of full-time equivalents.	Double	Program Required Resource
EA1356	Labor Cost	Labor cost.	Money	Program Required Resource
EA1357	Material Cost	Material cost.	Money	Program Required Resource
EA1358	Total Cost	Total cost.	Money	Program Required Resource
EA1359	Name	Name.	String	Program Funding Cycle
EA1360	Start Date	Start date.	Date	Program Funding Cycle
EA1361	End Date	End date.	Date	Program Funding Cycle
EA1362	Accounting Reference	Accounting reference.	String	Program Funding Cycle
EA1363	Total Funding for Cycle	Total funding for cycle.	Money	Program Funding Cycle
EA1364	Total Budget Amount	Total budget amount.	Money	Program Funding Cycle
EA1365	Total Actual Amount	Total actual amount.	Money	Program Funding Cycle

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1366	Calendar Year	Calendar year.	String	Program Funding Cycle
EA1367	WDVA Fiscal Year	WDVA fiscal year.	String	Program Funding Cycle
EA1368	Program Year	Program year.	String	Program Funding Cycle
EA1369	Source Name	Source name.	String	Program Funding Source
EA1370	Funds Available Date	Funds available date.	Date	Program Funding Source
EA1371	Funding Amount	Funding amount.	Money	Program Funding Source
EA1372	Accounting Reference	Accounting reference.	String	Program Funding Source
EA1373	Description	Description.	String	Program Funding Stipulation
EA1374	Relevant Stipulation Date	Relevant stipulation date.	Date	Program Funding Stipulation
EA1375	Stipulation Amount	Stipulation amount.	Money	Program Funding Stipulation
EA1376	Description	Description.	String	Program Cost Item
EA1377	Units	Units.	Integer	Program Cost Item
EA1378	Unit Cost	Unit cost.	Money	Program Cost Item
EA1379	Total Cost	Total cost.	Money	Program Cost Item
EA1380	Face Value Amount	Face value amount.	Money	Program Cost Item
EA1381	Program Cost Type	Kind of cost (e.g. Budgeted, Actual).	String	Program Cost Item
EA1382	General Services Description	Program manager's overall description of services associated with program.	String	Program Service Summary

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1383	Service Description	Service description.	String	Program Service
EA1384	Prerequisite(s)	Prerequisite(s).	String	Program Service
EA1385	Associated Milestone	Associated milestone.	String	Program Service
EA1386	Associated Milestone Date	Associated milestone date.	Date	Program Service
EA1387	Associated Milestone Days After	Associated milestone days after.	Integer	Program Service
EA1388	Name	Name.	String	Program Document
EA1389	Reason to Use	Reason to use.	String	Program Document
EA1390	When to Use	When to use.	String	Program Document
EA1391	Version	Version.	String	Program Document
EA1392	Effective Date	Effective date.	Date	Program Document
EA1393	Obsolete Date	Obsolete date.	Date	Program Document
EA1394	Latest Version	Last valid version number.	String	Program Document
EA1395	Program Document Format Type	Kind of document format (e.g. PDF, Word).	String	Program Document
EA1396	Program Document Type	Nature of document (e.g. Program Report, Evaluation Checklist, Intake Form).	String	Program Document
EA1397	General Procedure Description	Summary description of the set of procedures defined to conduct or manage the program.	String	Program Procedure
EA1398	Step Number	Step number.	String	Program Procedure Step

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1399	Step Description	Step description.	String	Program Procedure Step
EA1400	Procedure Phase Type	What phase step is contained in, if applicable (e.g. Intake, Follow-Up).	String	Program Procedure Step
EA1401	Assessment Factor Number	Assessment factor number.	Integer	Program Assessment Factor
EA1402	Assessment Factor Name	Assessment factor name.	String	Program Assessment Factor
EA1403	Assessment Factor Description	Assessment factor description. What assessment factor(s) (i.e. questions, consideration) is/are called for in this step.	String	Program Assessment Factor
EA1404	Relevant Date	Relevant date.	Date	Program Assessment Factor
EA1405	Relevant Quarter	Relevant quarter.	Integer	Program Assessment Factor
EA1406	Comments	Comments.	String	Program Assessment Factor
EA1407	Response Value	Response value.	Integer	Program Assessment Response Value
EA1408	Response Description	Response description.	String	Program Assessment Response Value
EA1409	Response Free Text Indicator	Response free text indicator.	YesNo	Program Assessment Response Value
EA1410	Milestone Name	Milestone name.	String	Program Milestone
EA1411	Milestone Description	Milestone description.	String	Program Milestone
EA1412	Milestone Target Measurement	Milestone target measurement.	String	Program Milestone
EA1413	Milestone Target Units	Milestone target units.	String	Program Milestone
EA1414	Relevant Days After	Relevant days after.	Integer	Program Milestone

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1415	Comments	Comments.	String	Program Milestone
EA1416	Outcome Name	Outcome name.	String	Program Outcome
EA1417	Outcome Description	Outcome description.	String	Program Outcome
EA1418	Outcome Goal	Outcome goal.	String	Program Outcome
EA1419	Outcome Measurement	Outcome measurement.	String	Program Outcome
EA1420	Outcome Unit	Outcome unit.	String	Program Outcome
EA1421	Relevant Days After	Relevant days after.	Integer	Program Outcome
EA1422	Comments	Comments.	String	Program Outcome
EA1423	Pre-Eligibility Description	Description of overall program pre-eligibility factors.	String	Program Pre-Eligibility Evaluation
EA1424	Pre-Eligibility Factor Name	Pre-eligibility factor name.	String	Program Pre-Eligibility Consideration
EA1425	Description	Description of factor.	String	Program Pre-Eligibility Consideration
EA1426	General Eligibility Description	Description of overall program eligibility factors.	YesNo	Program Eligibility
EA1427	Client Cap	If program is limited to a fixed number of clients due to funding or programmatic constraints, that is documented here.	Integer	Program Eligibility
EA1428	Criterion Description	Criterion description.	String	Program Eligibility Criterion
EA1429	Criterion Join Operator Type	If there are more than one criterion, then the set's elements must be joined by a logical operator (i.e. AND, OR).	String	Criterion Join (Association Class)

4.5.4.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.5.5. To-Be WDVA Detailed Business Entity Model 4 of 6 – Provider Identity Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Provider's Identity Perspective: all information regarding the provider professional under contract to WDVA.

4.5.5.1. Entity Descriptions

The following entities are contained in this business entity model:

- Provider Professional – Contains the identity of the provider professional under contract.
- Contract – Contains one or more instances of summary contractual information.
- Geographical Service Area – Contains one or more geographical provider service areas specified in the contract.
- Qualified Service Offering – Contains one or more service offerings (i.e. PTSD Counseling; Sexual Trauma Counseling) that the provider professional is qualified to deliver.
- Vendor Information – Contains WDVA vendor-specific information.

4.5.5.2. Entity Attributes

Please see Table 28.

Table 28: To-Be WDVA Detailed Business Entity Model 4 of 6 – Provider Identity Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1430	Professional Title	Professional title.	String	Provider Professional
EA1431	License Number	License number.	String	Provider Professional
EA1432	Certificate Number	Certificate number.	String	Provider Professional
EA1433	PR or Authorization Number	PR or authorization number.	String	Contract

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1434	Contract Amount	Contract amount.	Money	Contract
EA1435	Contract Start Date	Contract start date.	Date	Contract
EA1436	Contract End Date	Contract end date.	Date	Contract
EA1437	County Name	County name.	String	Geographical Service Area
EA1438	City Name	City name.	String	Geographical Service Area
EA1439	Special Location Designation	Special location designation.	String	Geographical Service Area
EA1440	Service Name	Service name.	String	Qualified Service Offering
EA1441	Service Start Date	Service start date.	Date	Qualified Service Offering
EA1442	Service End Date	Service end date.	Date	Qualified Service Offering
EA1443	Certified/Licensed in Service Indicator	Certified/licensed in service indicator.	YesNo	Qualified Service Offering
EA1444	Hourly Rate	Hourly billing rate in dollars.	Money	Qualified Service Offering
EA1445	Comments	Comments.	String	Qualified Service Offering
EA1446	Service Type	Service type (e.g. Mental Health Services, PTSD Counseling).	String	Qualified Service Offering
EA1447	Financial Institution Name	Financial institution name.	String	Vendor Information
EA1448	Account Number	Account number.	String	Vendor Information
EA1449	Routing Number	Routing number.	String	Vendor Information
EA1450	Vendor Number	Vendor number.	String	Vendor Information

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1451	Vendor Suffix	Vendor suffix.	String	Vendor Information
EA1452	Date Effective	Date effective.	Date	Vendor Information
EA1453	Date Expired	Date expired.	Date	Vendor Information

4.5.5.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.5.6. To-Be WDVA Detailed Business Entity Model 5 of 6 – Provider Services Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Provider Services Perspective: all information regarding a provider professional's billing and session activity, per the contract with WDVA. This information may ultimately render the A19 obsolete since all billing and service information, provided the future EVCMS supports it, will be entered into EVCMS.

4.5.6.1. Entity Descriptions

The following entities are contained in this business entity model:

- Organization – Omitted from this model. Contained in Section 4.5.5.1 on page 258.
- Person – Omitted from this model. Contained in Section 4.5.5.1 on page 258.
- Provider Professional – Omitted from this model. Contained in Section 4.5.5.1 on page 258.
- Contract – Omitted from this model. Contained in Section 4.5.5.1 on page 258.
- Invoice (Voucher) – Contains zero or more invoice-specific information.
- Transaction Item – Contains zero or more accounting-specific information per a given *Invoice*.
- Session – Contains zero or more sessions delivered per a given *Invoice*.
- Session Event – The zero or more session events associated with a given *Session* delivered per a given *Invoice*.

- Billable Item – Contains zero or more billable items (services and/or expenses) per a given *Invoice*.

4.5.6.2. Entity Attributes

Please see Table 29.

Table 29: To-Be WDVA Detailed Business Entity Model 5 of 6 – Provider Services Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1454	Billing Month	Billing month.	String	Invoice (Voucher)
EA1455	Period From	Period from.	Date	Invoice (Voucher)
EA1456	Period To	Period to.	Date	Invoice (Voucher)
EA1457	Vendor Message	Vendor message.	String	Invoice (Voucher)
EA1458	Document Input Date	Document input date.	Date	Invoice (Voucher)
EA1459	Current Document Number	Current document number.	String	Invoice (Voucher)
EA1460	Reference Document Number	Reference document number.	String	Invoice (Voucher)
EA1461	Preparer Signature Date	Preparer signature date.	Date	Invoice (Voucher)
EA1462	Approval Signature Date	Approval signature date.	Date	Invoice (Voucher)
EA1463	Warrant Total Amount	Warrant total amount.	Money	Invoice (Voucher)
EA1464	Warrant Number	Warrant number.	String	Invoice (Voucher)
EA1465	Transaction Code	Transaction code.	String	Transaction Item
EA1466	Transaction Modified Indicator	Transaction modified indicator.	YesNo	Transaction Item
EA1467	Funding Line	Funding line.	String	Transaction Item

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1468	Appropriation Index Code	Appropriation index code.	String	Transaction Item
EA1469	Program Index Code	Program index code.	String	Transaction Item
EA1470	Sub-Object Code	Sub-object code.	String	Transaction Item
EA1471	Sub-Sub-Object Code	Sub-sub-object code.	String	Transaction Item
EA1472	GL Account	General Ledger account.	String	Transaction Item
EA1473	Subsidiary DR/CR	Subsidiary debit/credit.	String	Transaction Item
EA1474	Invoice Date	Invoice date.	Date	Transaction Item
EA1475	Amount	Amount.	Money	Transaction Item
EA1476	Invoice Number	Invoice number.	String	Transaction Item
EA1477	Client Number	Client number.	String	Session
EA1478	Location of Service	Location of service.	String	Session
EA1479	Organization or Group Name	Organization or group name.	String	Session
EA1480	Number of Participants	Number of participants.	Integer	Session
EA1481	Total Hours	Total hours.	Integer	Session
EA1482	Session Type	Kind of session held (e.g. Individual, Group, Family).	String	Session
EA1483	Service Type	Kind of service rendered (e.g. Individual, Couple, Family).	String	Session
EA1484	Group Type	Kind of group type service (if applicable). (E.g. Men, Women, Children.)	String	Session

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1485	Billing Code	Billing code.	String	Billable Item
EA1486	Billable Description	Billable description.	String	Billable Item
EA1487	Quantity	Quantity.	Integer	Billable Item
EA1488	Unit	Unit.	String	Billable Item
EA1489	Unit Price	Unit price.	Money	Billable Item
EA1490	Amount	Amount.	Money	Billable Item
EA1491	Billable Item Type	Kind of item (e.g. Professional Service, Expense Mileage).	String	Billable Item

4.5.6.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

4.5.7. To-Be WDVA Detailed Business Entity Model 6 of 6 – Project Management Perspective

This model represents one of six perspectives (or views) on the future state (to-be) business entity model that must be supported by the EVCMS. Modeling the business information requirements as different perspective is valuable because it encapsulates a single area of concern for the reader (the perspective or view) such that the reader isn't overwhelmed by an overly cumbersome and potentially confusing master business entity model (just one diagram).

This model represents the Project Management Perspective: all information regarding the defining a project, the resources needed, the steps required for successful completion and the people and skills required. This closely mirrors the VCC project management business entity model.

4.5.7.1. Entity Descriptions

The following entities are contained in this business entity model:

- Project – Contains general information about the project being planned.
- Project Phase – If a project is broken into various phases, this contains information about each phase.

- Project Phase Goal – Contains stated goals (zero or more) of the project.
- Project Task – If the project has organized specific tasks to execute and in what order, this contains information about each task (zero or more).
- Labor Item – Contains any labor needs that must be available for the project.
- Labor Person (Association Class) – If persons are donating the labor, this entity tracks the relationship to the person to the identified labor need.
- Material Item – Contains and material needs (i.e. wood, hardware, sod) that are required to complete the project.
- Calendar Event – Contains one or more calendar events that are associated with the project.
- Person – Identifies the person(s) that is participating in the project either as a volunteer or a donor.
- Person Material Donation (Association Class) – If persons are donating material, this entity tracks the relationship to the person to the identified material need.
- Contact Info – Contains zero or many known contact information (email, phone, etc.) relevant to the project. (Omitted from the business entity model since it is documented in the Client Identity Perspective.)
- Location – Contains zero or more known addresses relevant to the project. (Omitted from the business entity model since it is documented in the Client Identity Perspective.)

4.5.7.2. Entity Attributes

Please see Table 30.

Table 30: To-Be WDVA Detailed Business Entity Model 6 of 6 – Project Management Perspective - List of Entity Attributes

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1492	Project Name	Project name.	String	Project
EA1493	Planned End Date	Planned end date.	Date	Project
EA1494	Total Project Labor Cost	Total project labor cost.	Money	Project
EA1495	Total Project Material Cost	Total project material cost.	Money	Project
EA1496	Project Grand Total Cost	Project grand total cost.	Money	Project
EA1497	Phase Number	Phase number.	String	Project Phase

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1498	Phase Name	Phase name.	String	Project Phase
EA1499	Planned Start Date	Planned start date.	Date	Project Phase
EA1500	Planned End Date	Planned end date.	Date	Project Phase
EA1501	Phase Labor Cost	Phase labor cost.	Money	Project Phase
EA1502	Phase Material Cost	Phase material cost.	Money	Project Phase
EA1503	Total Phase Cost	Total phase cost.	Money	Project Phase
EA1504	Goal Description	Goal description of project.	String	Project Phase Goal
EA1505	Task Number	Task number.	String	Project Task
EA1506	Task Name	Task name.	String	Project Task
EA1507	Task Description	Task description.	String	Project Task
EA1508	Planned Start Date	Planned start date.	Date	Project Task
EA1509	Planned End Date	Planned end date.	Date	Project Task
EA1510	Estimated Number of Person Hours	Estimated number of person hours.	Integer	Project Task
EA1511	Phase Labor Cost	Phase labor cost.	Money	Project Task
EA1512	Phase Material Cost	Phase material cost.	Money	Project Task
EA1513	Total Task Cost	Total task cost.	Money	Project Task
EA1514	Labor Description	Labor description.	String	Labor Item

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1515	Notes on Labor	Notes on labor.	String	Labor Item
EA1516	Number of Days	Number of days.	Integer	Labor Item
EA1517	Heads Per Day	Heads per day.	Integer	Labor Item
EA1518	Clock Hours Per Day	Clock hours per day.	Integer	Labor Item
EA1519	Labor Rate	Labor rate.	Money	Labor Item
EA1520	Labor Cost	Labor cost.	Money	Labor Item
EA1521	Labor Type	Labor type (e.g. VCC Staff).	String	Labor Item
EA1522	Role	Role.	String	Labor Person (Association Class)
EA1523	Labor Rate	Labor rate.	Money	Labor Person (Association Class)
EA1524	Material Description	Material description.	String	Material Item
EA1525	Notes on Material	Notes on material.	String	Material Item
EA1526	Preferred Unit Cost	Preferred unit cost.	Money	Material Item
EA1527	Actual Unit Cost	Actual unit cost.	Money	Material Item
EA1528	Preferred Quantity	Preferred quantity.	Integer	Material Item
EA1529	Actual Quantity	Actual quantity.	Integer	Material Item
EA1530	Preferred Total Material Item Cost	Preferred total material item cost.	Money	Material Item
EA1531	Actual Total Material Item Cost	Actual total material item cost.	Money	Material Item

ID	Entity Attribute Name	Description	Data-type	Belongs to Entities
EA1532	Total Donated Value	Total donated value.	Money	Material Item
EA1533	Partial Donation Indicator	Partial donation indicator.	YesNoNA	Material Item
EA1534	Total Donation Indicator	Total donation indicator.	YesNoNA	Material Item
EA1535	Split Donation Indicator	Split donation indicator.	YesNoNA	Material Item
EA1536	Size Dimension 1	Size dimension 1.	String	Material Item
EA1537	Size Dimension 2	Size dimension 2.	String	Material Item
EA1538	Size Dimension 3	Size dimension 3.	String	Material Item
EA1539	Weight	Weight.	String	Material Item
EA1540	Event Name	Event name.	String	Calendar Event
EA1541	Date	Date.	Date	Calendar Event
EA1542	Day of Week	Day of week.	String	Calendar Event
EA1543	Start Time	Start time.	TimeStamp	Calendar Event
EA1544	End Time	End time.	TimeStamp	Calendar Event
EA1545	Donated Amount	Donated amount.	Money	Person Material Donation (Association Class)
EA1546	Role	Role.	String	Person Material Donation (Association Class)

4.5.7.3. Business Entity Model

The business entity model is contained in Appendix M on page 302.

APPENDIX A. AS-IS BUSINESS ENTITY MODEL INDEX

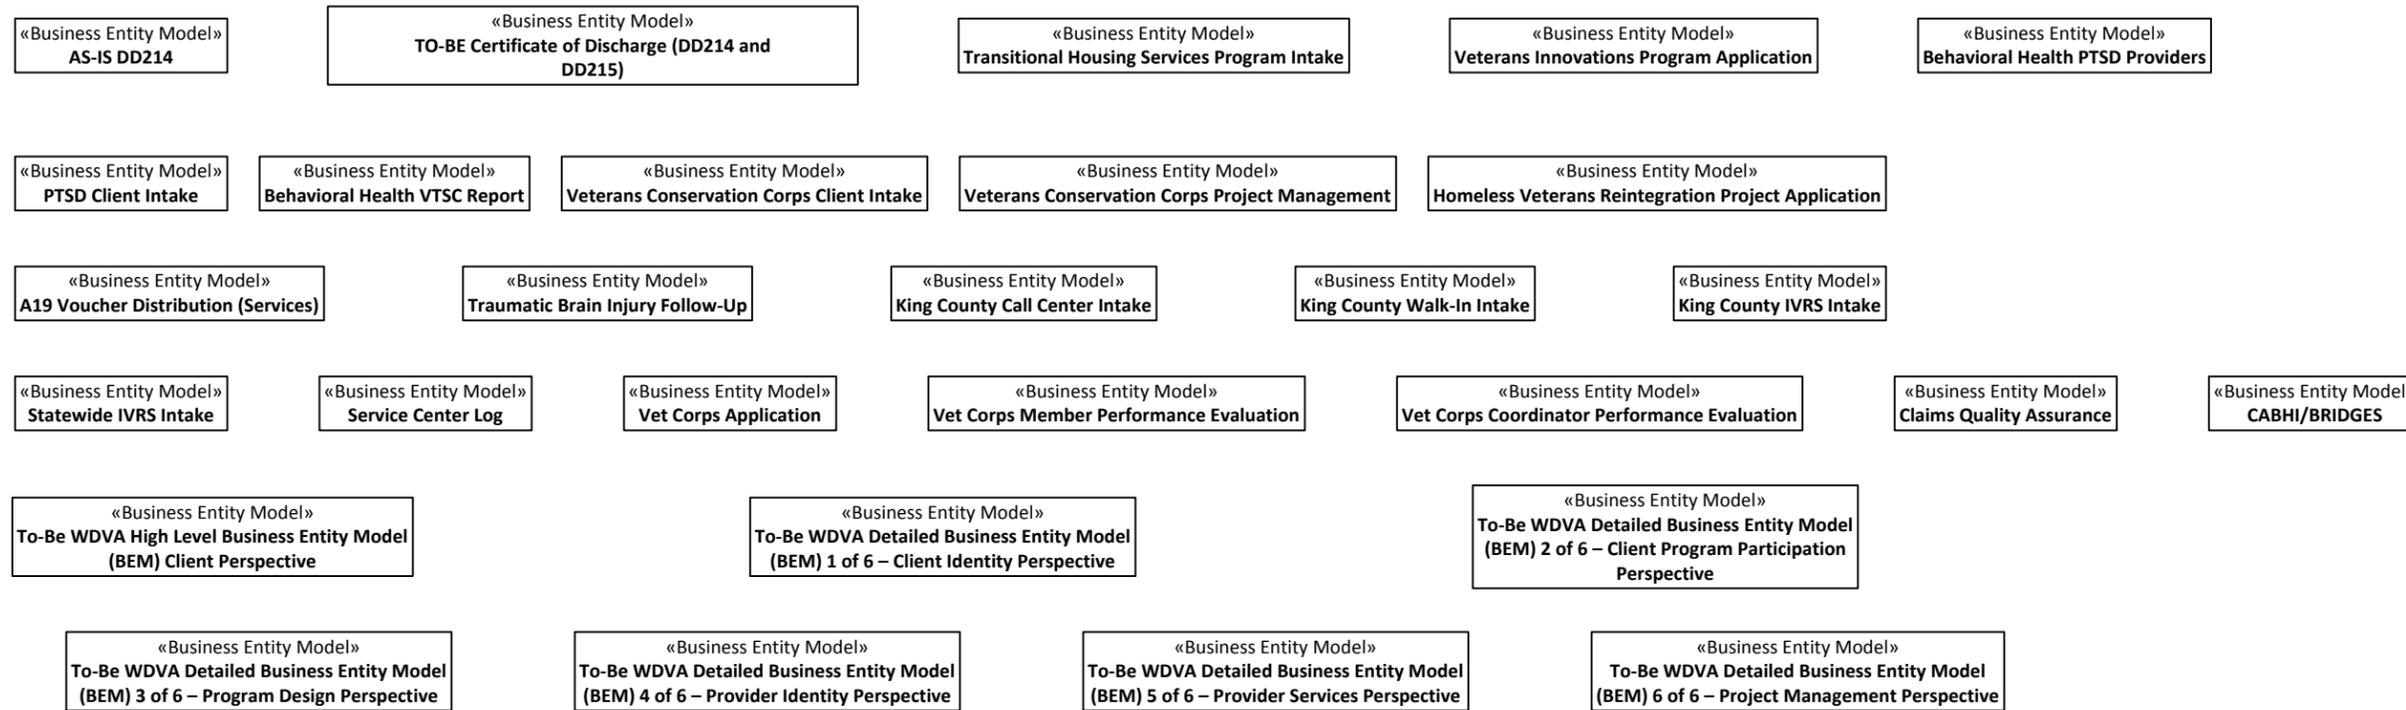

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

Business Process Mapping for WDVA – Analysis Models INDEX:

Purpose: Since there are multiple Visio pages in this UML model, this map should help you see the big picture. Each class below is hyperlinked to the Visio page. Simply right-click on the class and select the diagram listed (typically the 6th item on the pop-up menu). [Note: This functionality works only in Visio, not in the rendered PDF file.]

Business Entity Models

Use Case Model

State Model

Navigation Model(s)

There are no required Navigation Diagrams in this Analysis Model. The nature of this project precludes the use and value of this modeling technique.

Usage Scenario Model(s)

There are no required Usage Scenario Diagrams in this Analysis Model. The nature of this project precludes the use and value of this modeling technique.

APPENDIX B. CERTIFICATE OF DISCHARGE BUSINESS ENTITY MODELS (AS-IS AND TO-BE)

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following business entity models:

- Diagram 1: As-Is Certificate of Discharge (DD214) Business Entity Model
- Diagram 2: To-Be Certificate of Discharge (DD214 and DD215) Business Entity Model

Diagram 1: As-Is Certificate of Discharge (DD214) Business Entity Model (BEM) derived from ERD

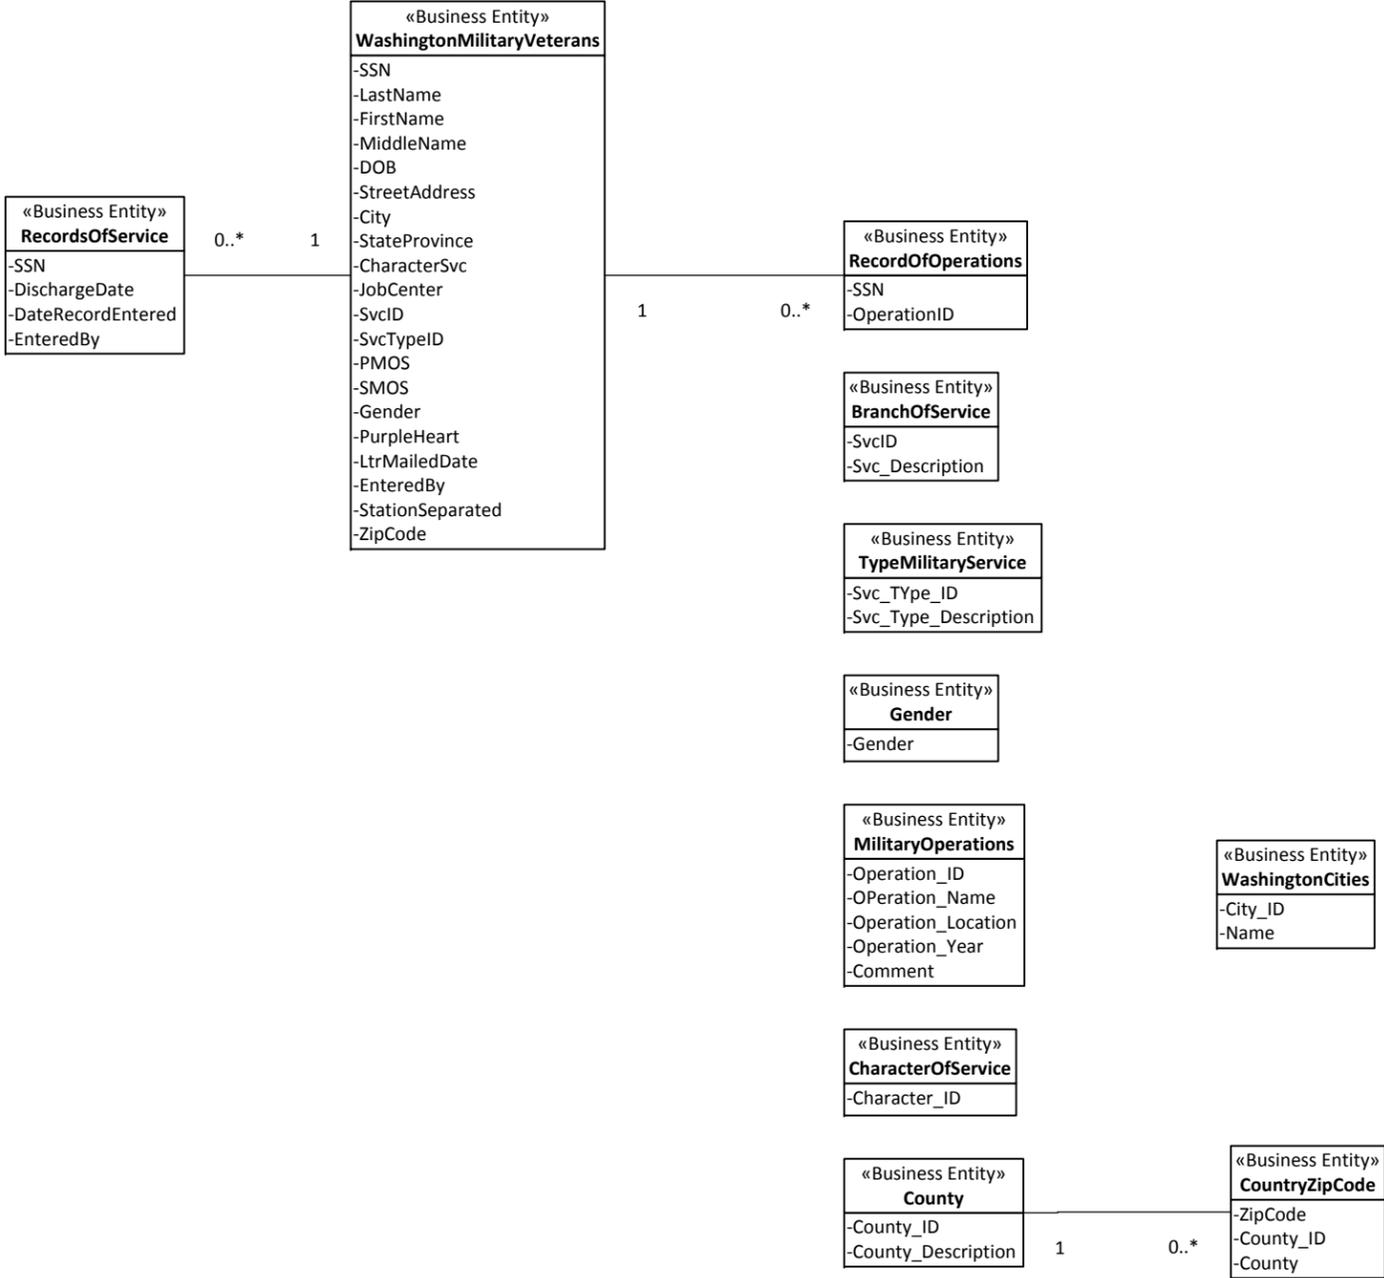

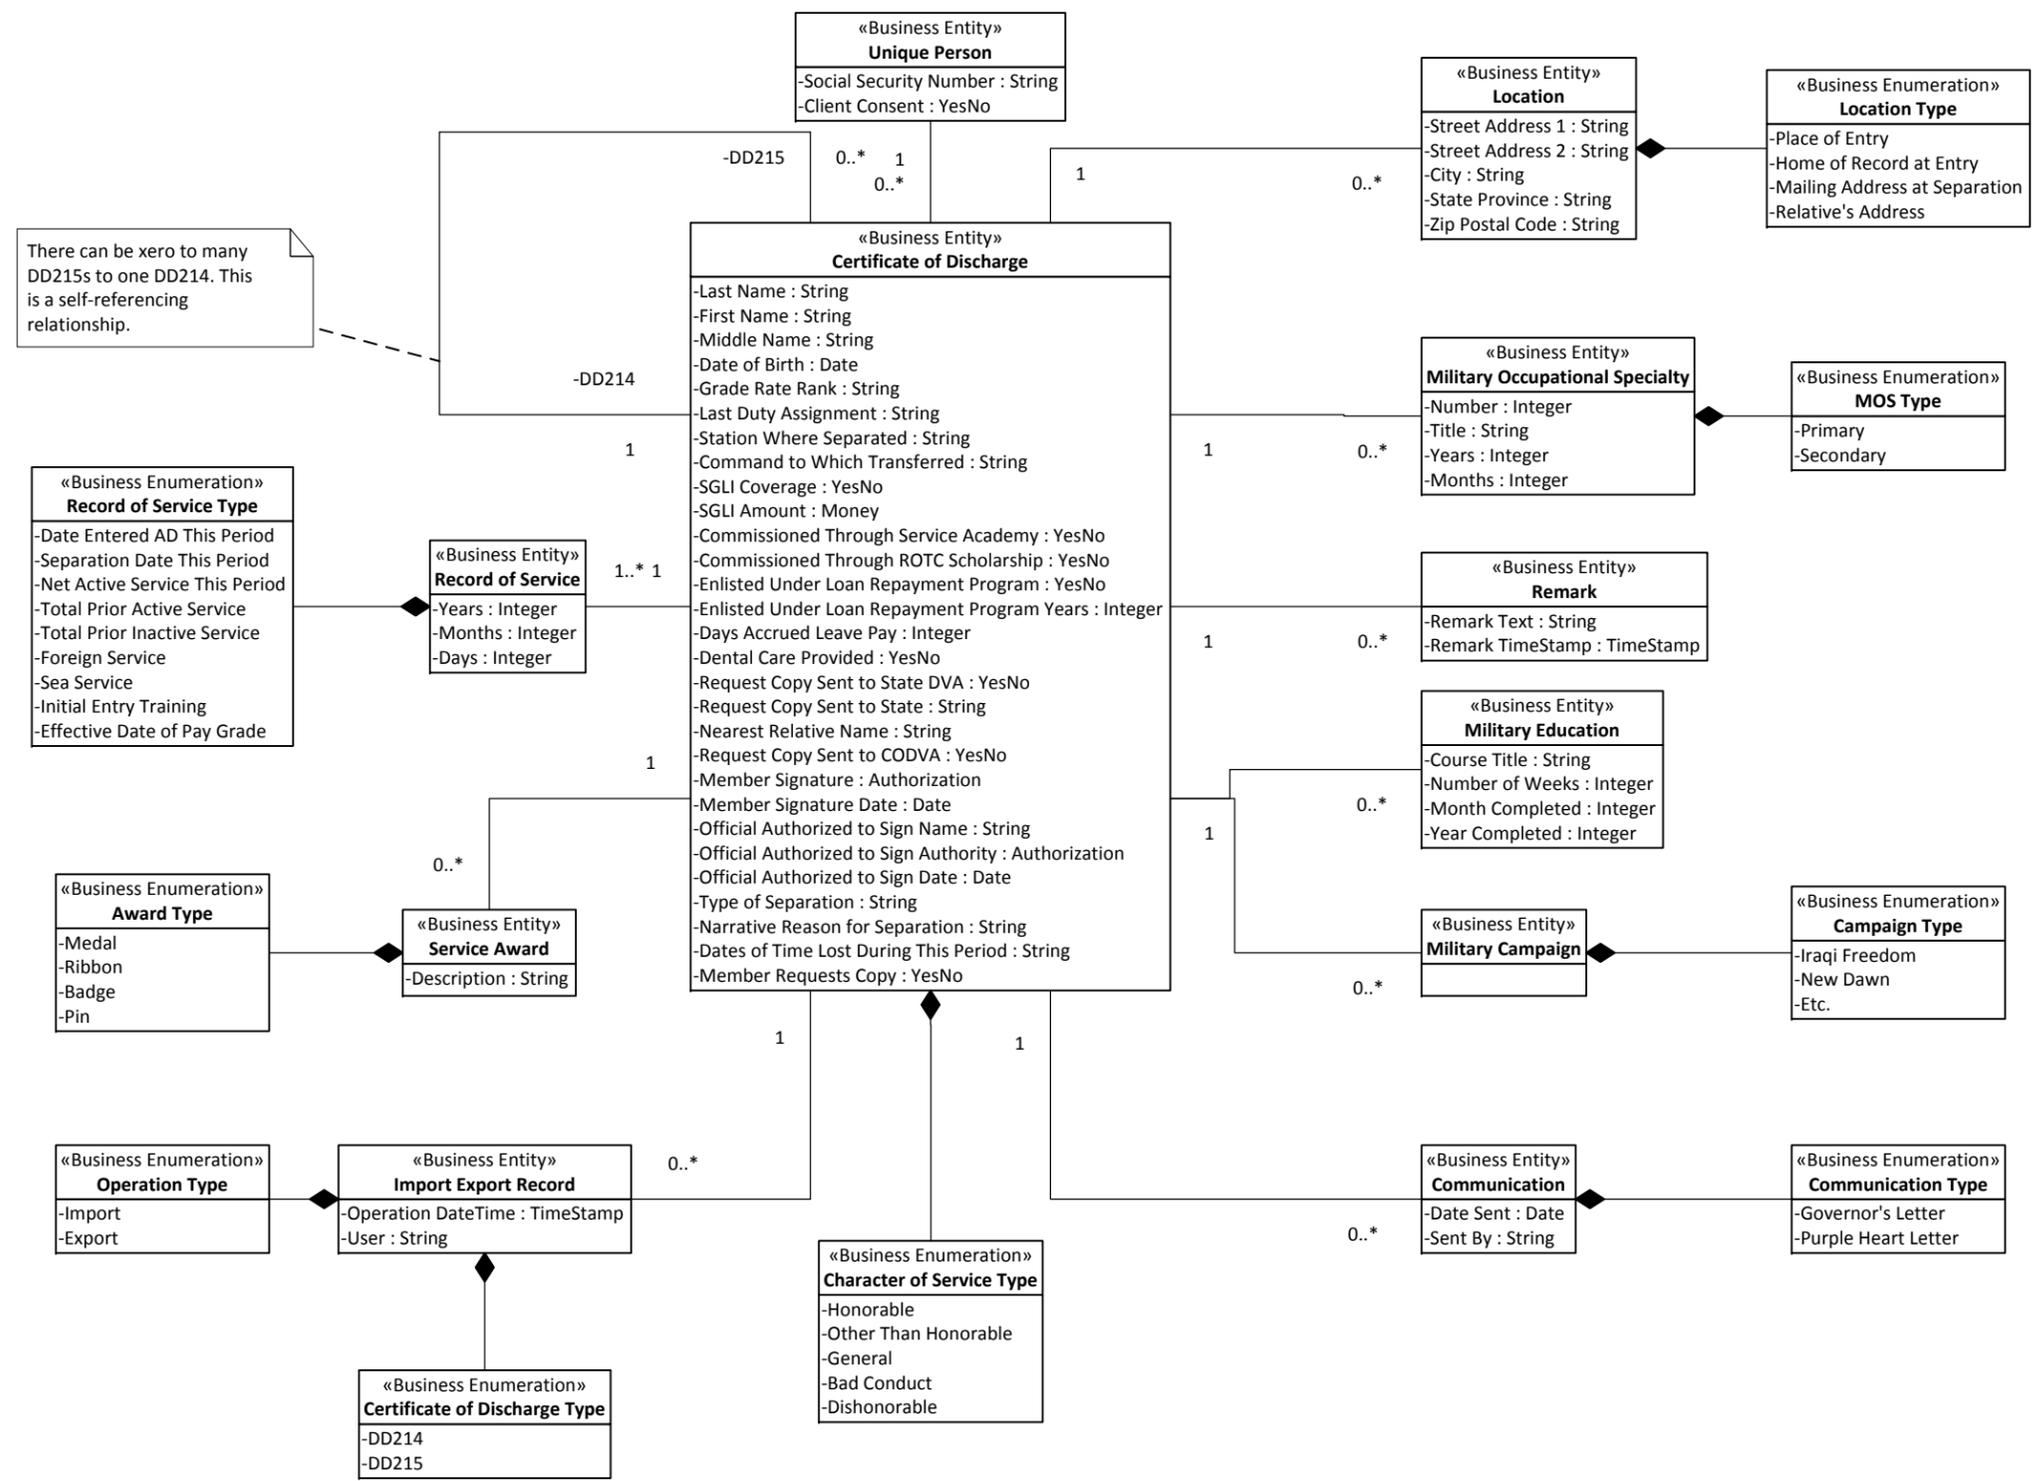

Diagram 2: Recommended To-Be Certificate of Discharge (DD214 and DD215) Business Entity Model (BEM)

APPENDIX C. TRANSITIONAL HOUSING SERVICES PROGRAM BUSINESS ENTITY MODEL

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity model:

- Diagram 3: Transitional Housing Services Program Intake (Building 9) Business Entity Model
- Diagram 29: CABHI/BRIDGES Business Entity Model

Diagram 3: Transitional Housing Services Program Intake (Building 9) Business Entity Model (BEM)

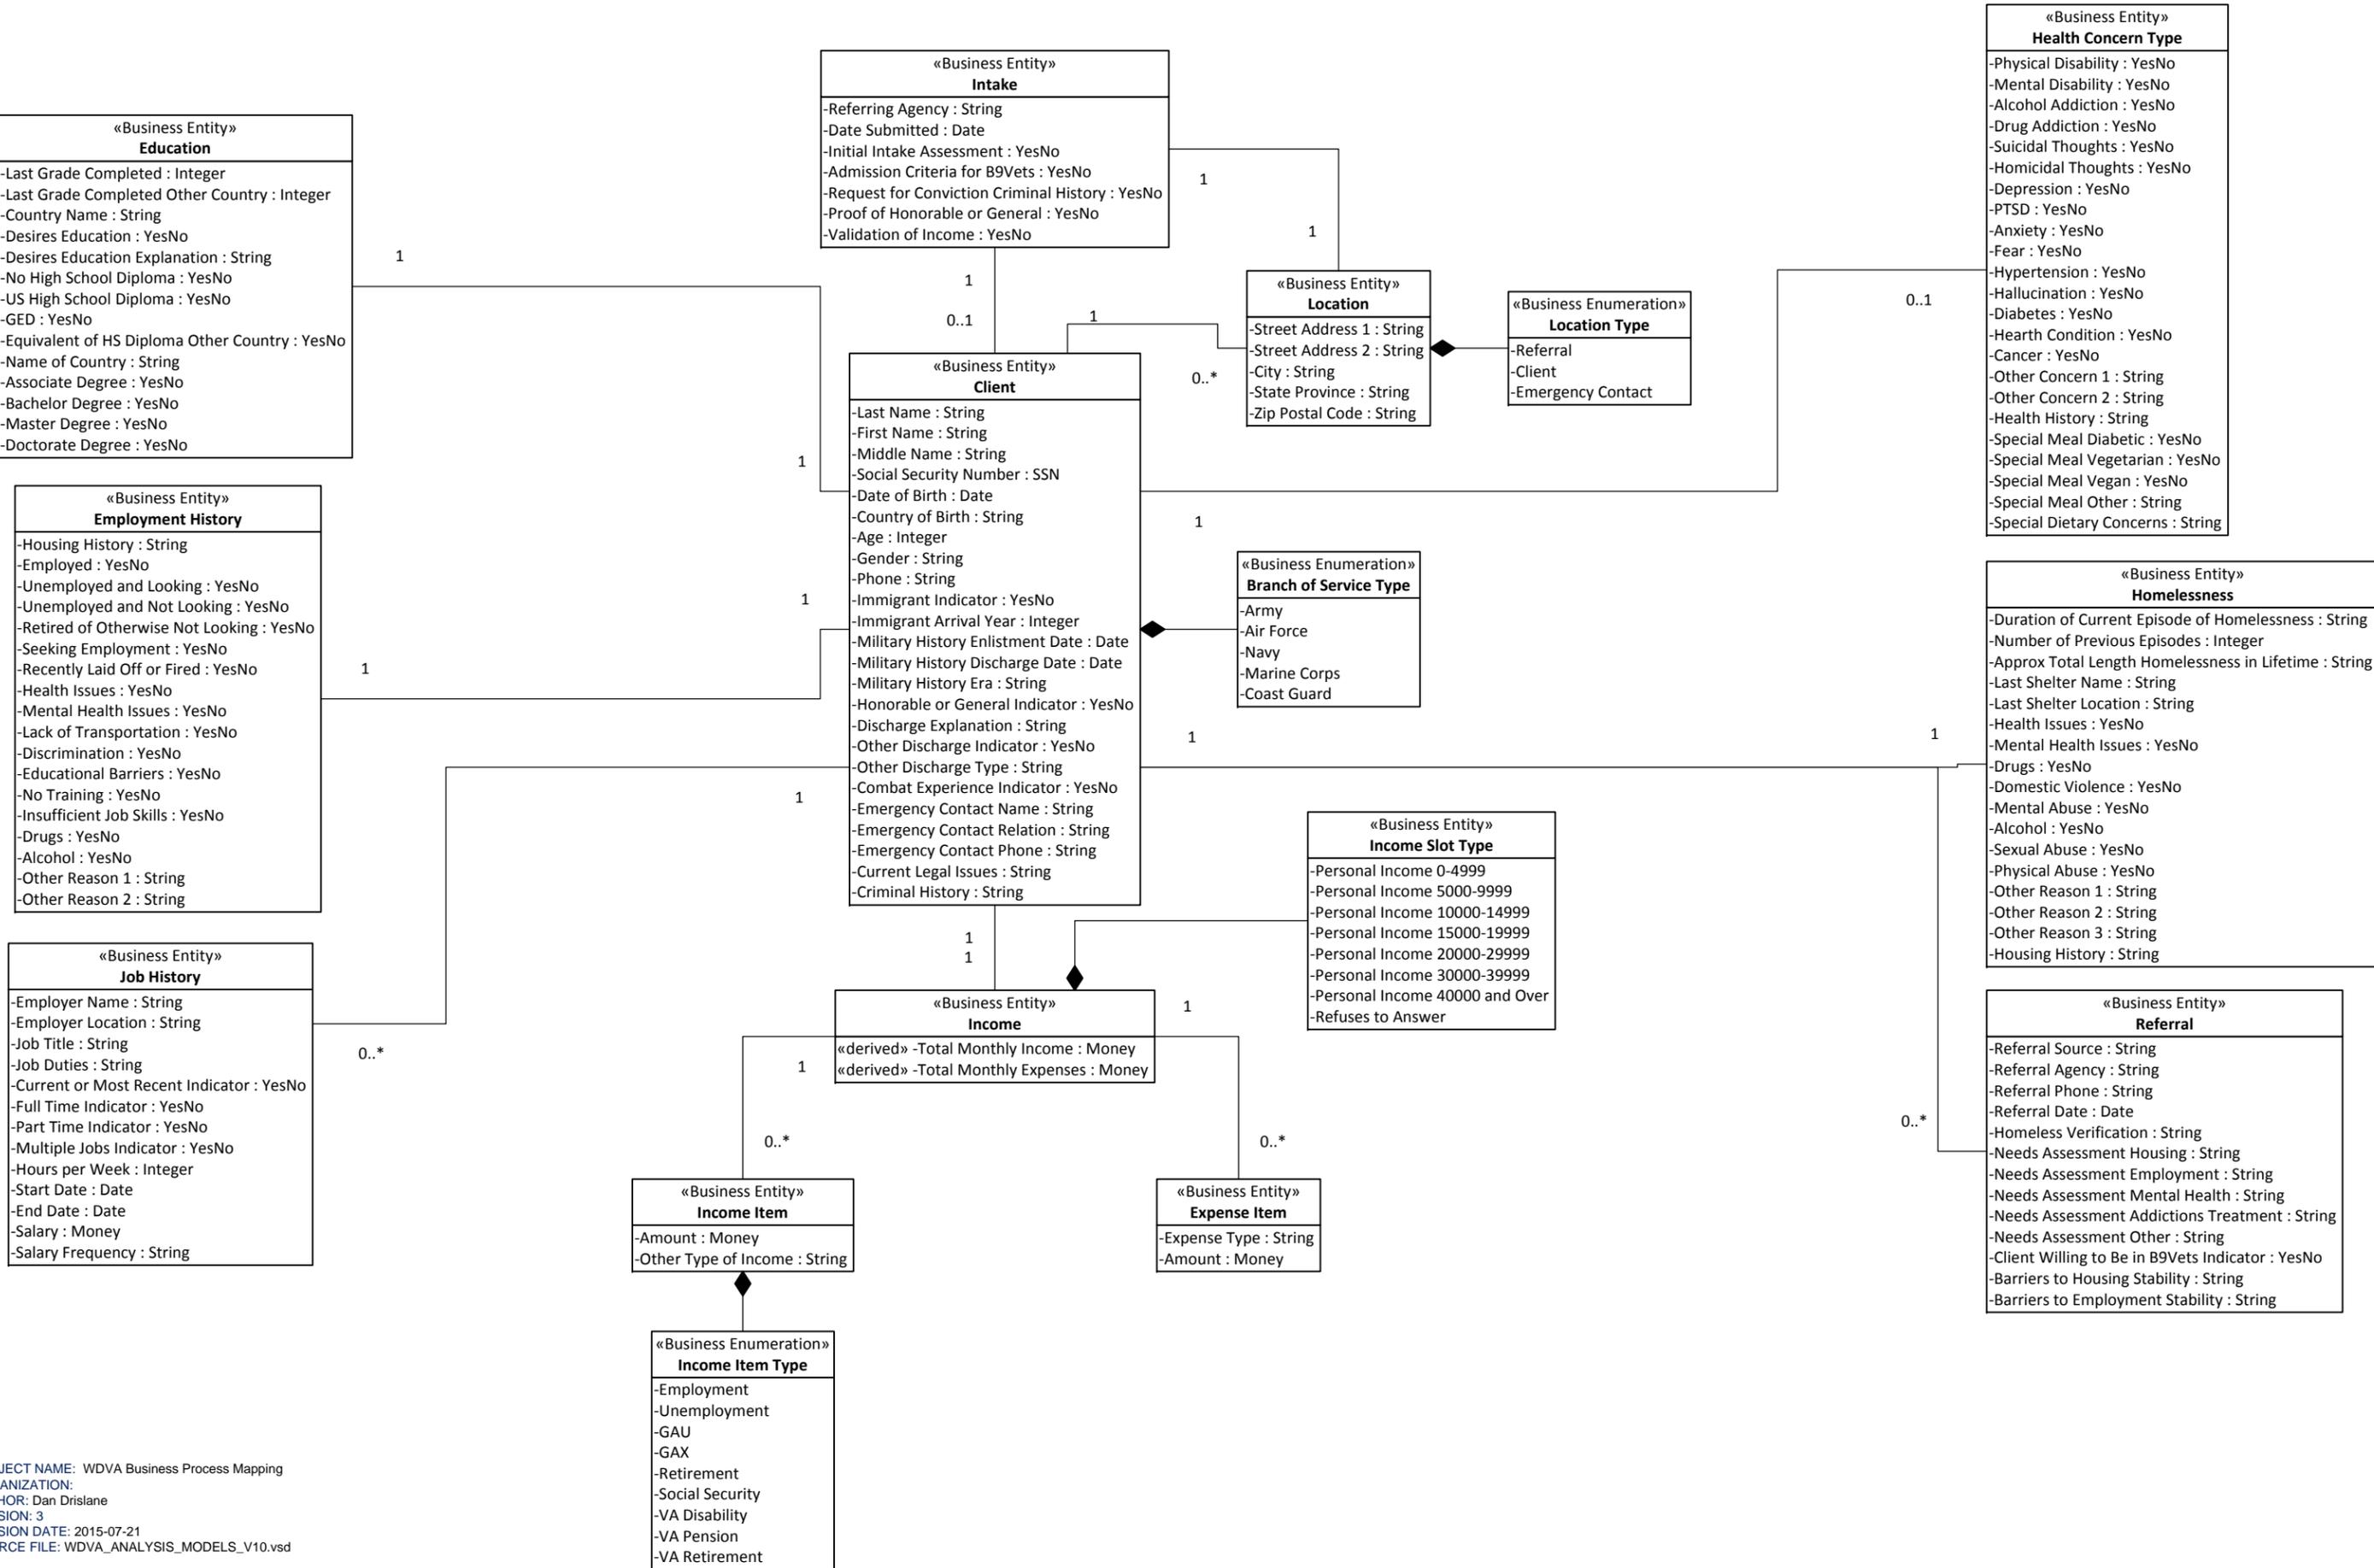

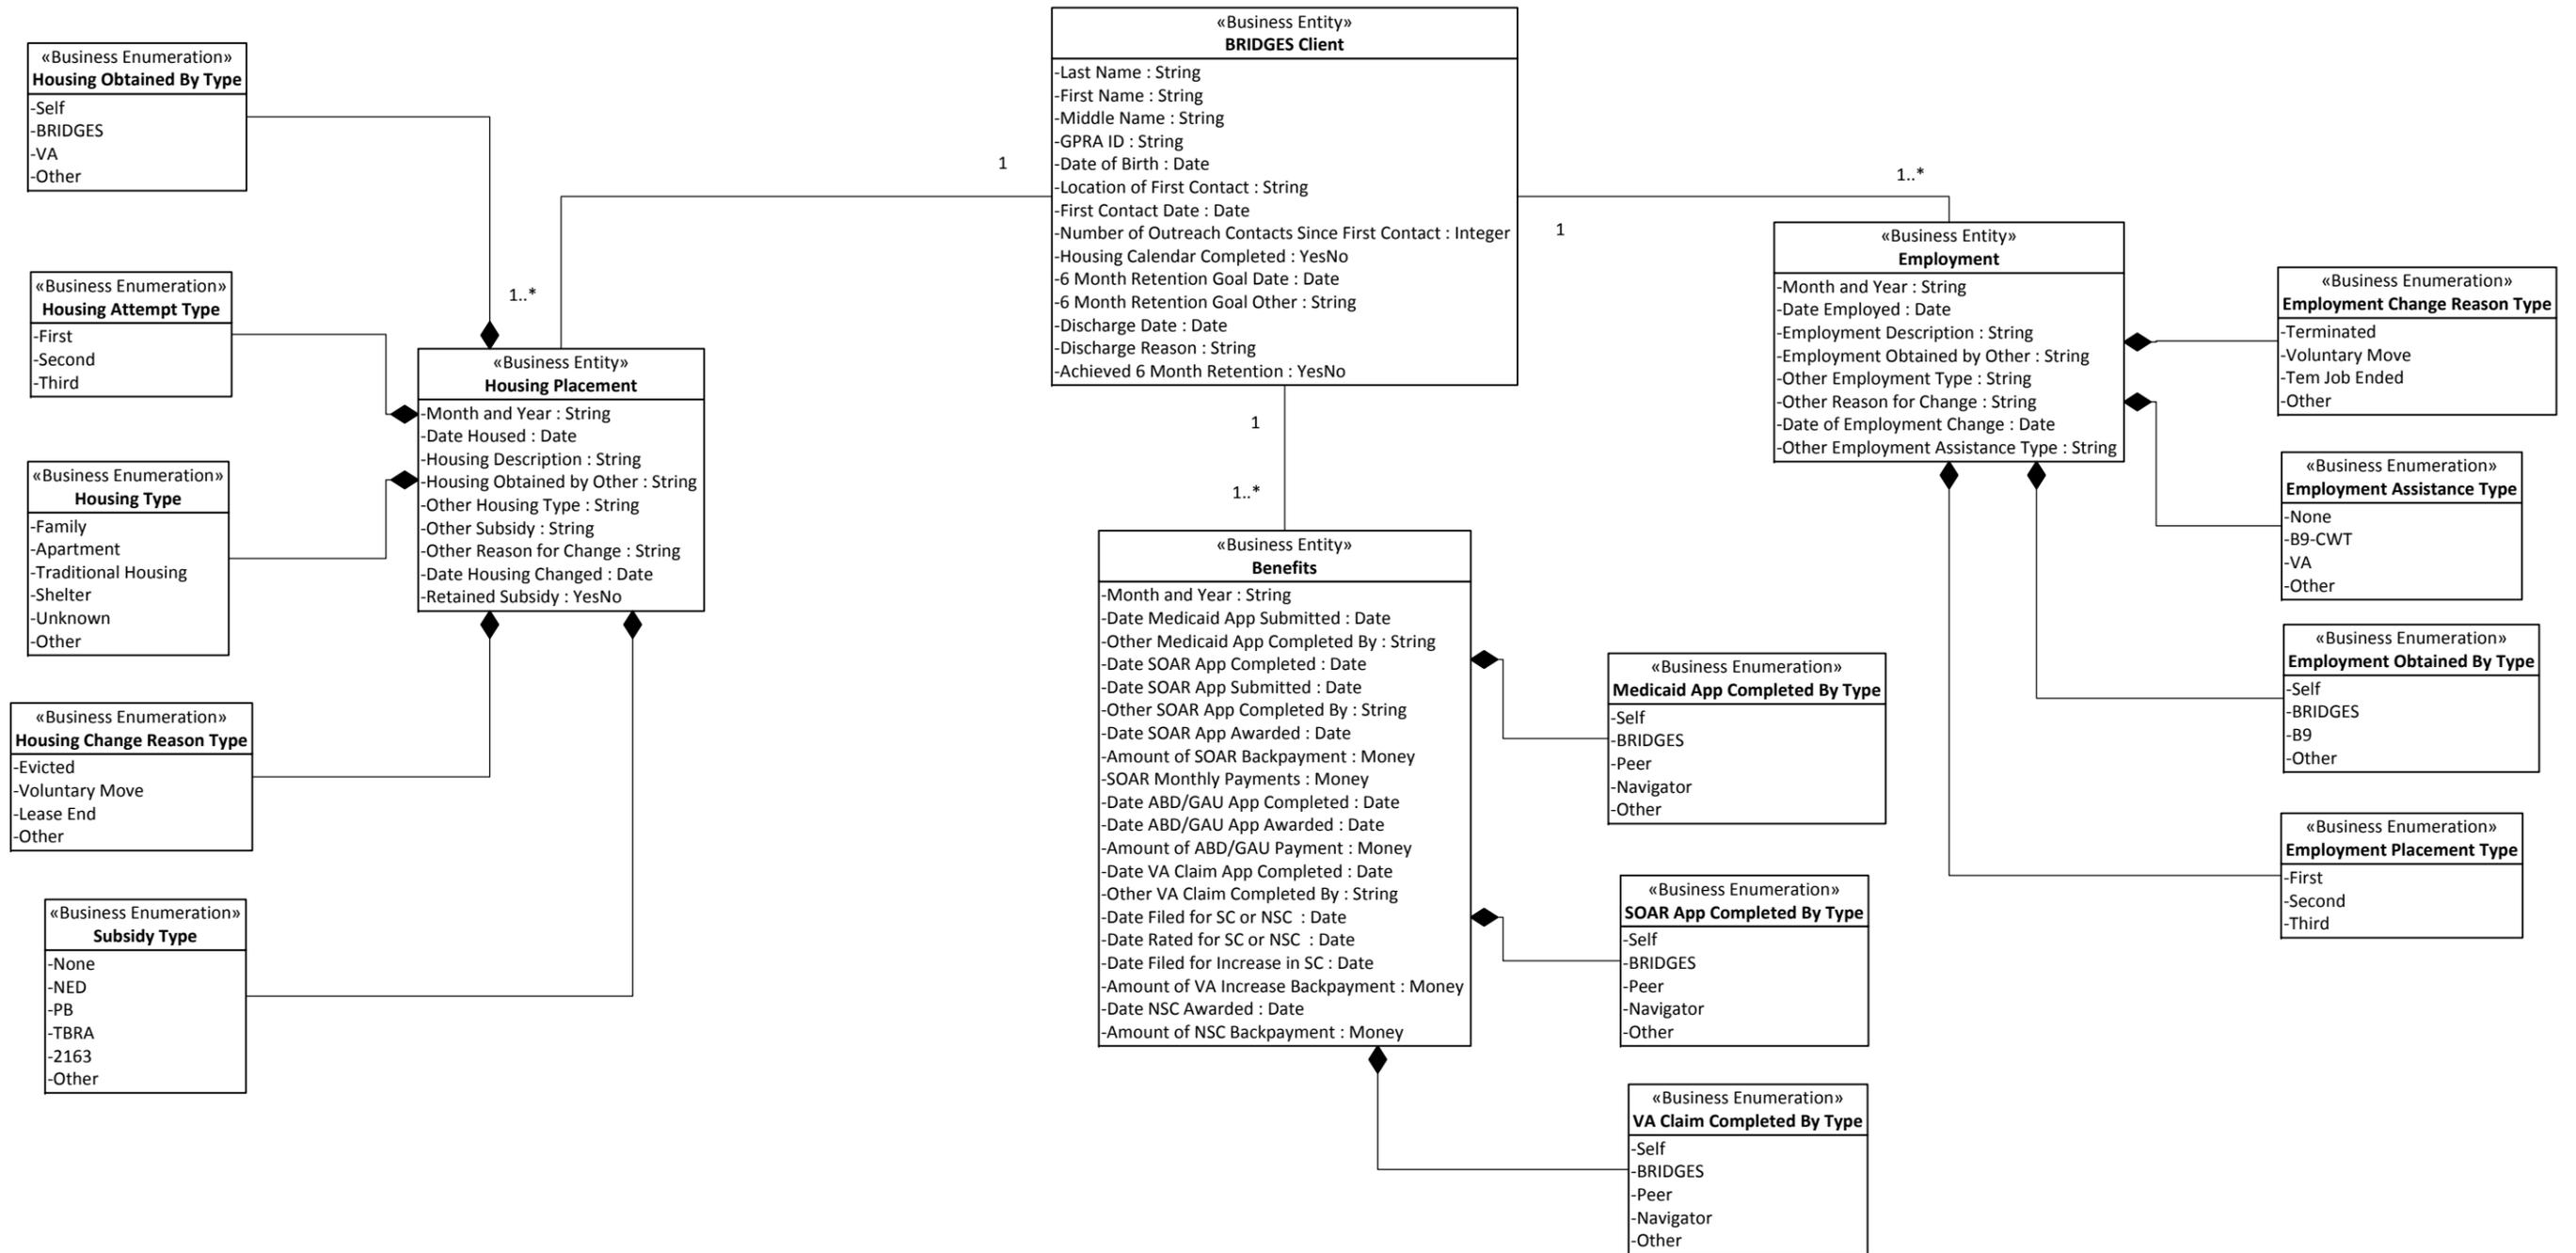

Diagram 29: CABHI/BRIDGES Business Entity Model (BEM)

APPENDIX D. VETERANS INNOVATIONS PROGRAM

APPLICATION BUSINESS ENTITY MODEL

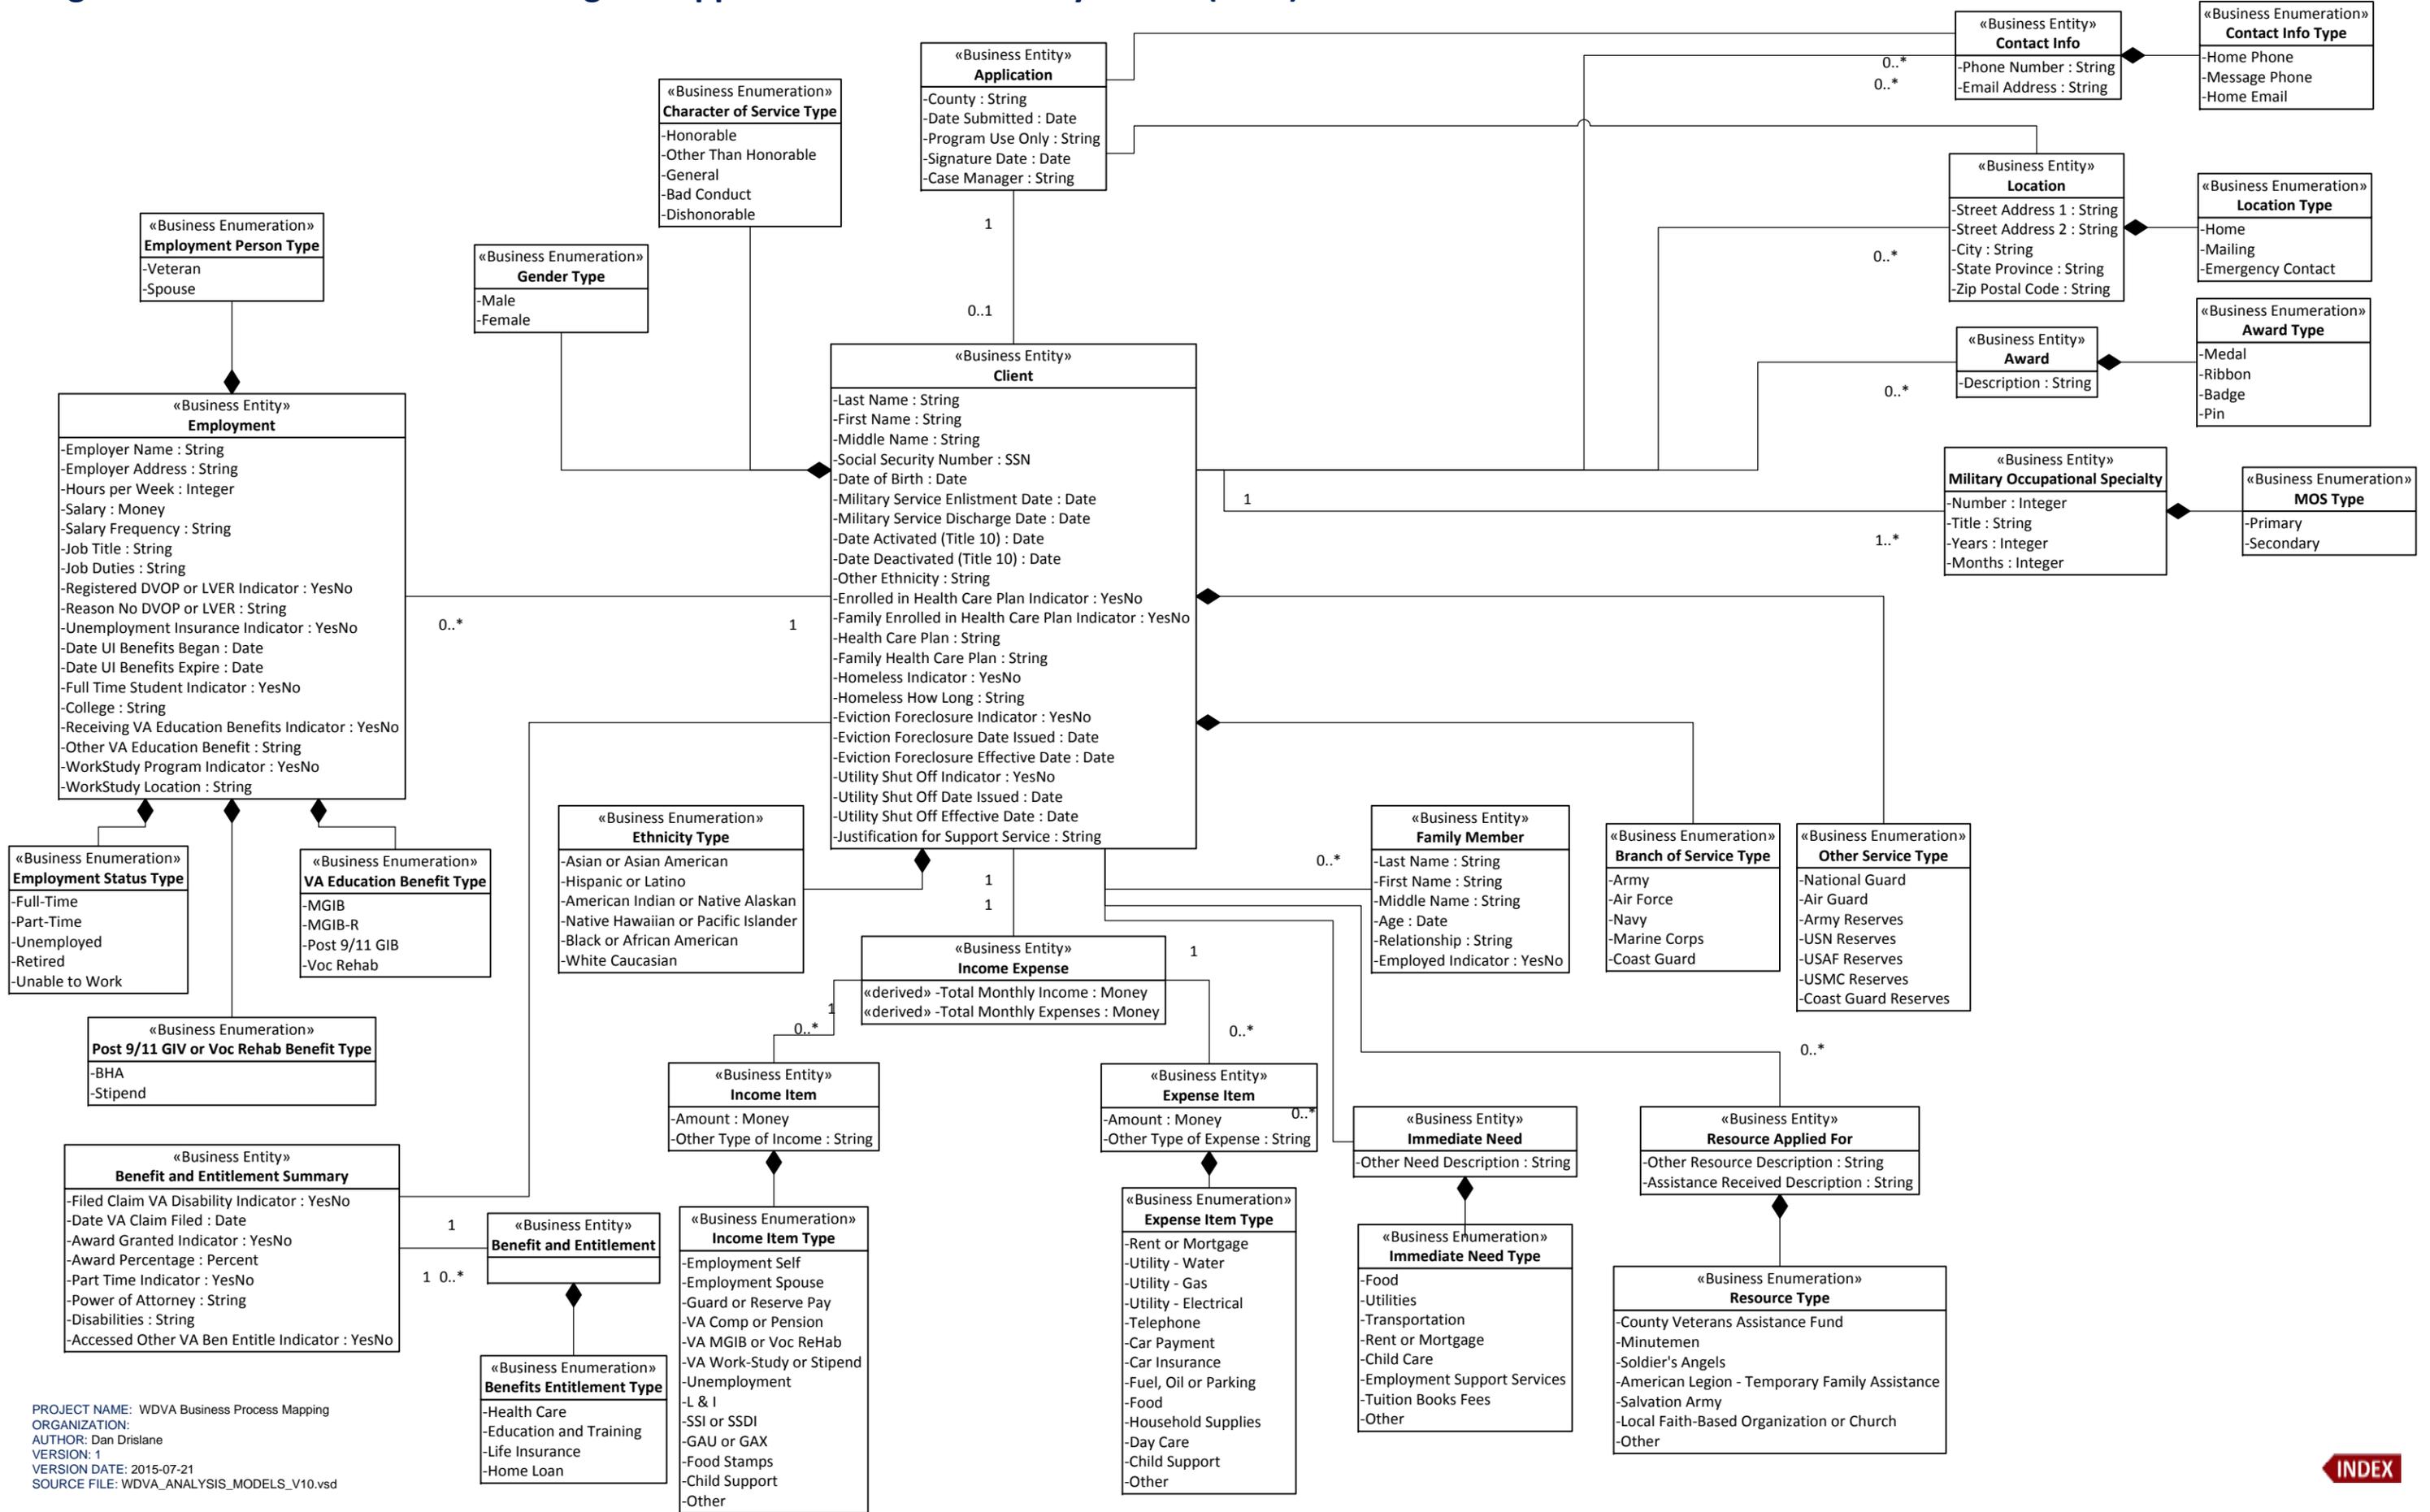

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity model:

- Diagram 4: Veterans Innovations Program Application Business Entity Model

Diagram 4: Veterans Innovations Program Application Business Entity Model (BEM)

APPENDIX E. BEHAVIORAL HEALTH SERVICES BUSINESS ENTITY MODELS

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity models:

- Diagram 5: Behavioral Health PTSD Providers Business Entity Model
- Diagram 6: PTSD Client Intake Business Entity Model
- Diagram 7: Behavioral Health VTSC Report Business Entity Model
- Diagram 12: Traumatic Brain Injury (TBI) Business Entity Model

Diagram 5: Behavioral Health PTSD Providers Business Entity Model (BEM)

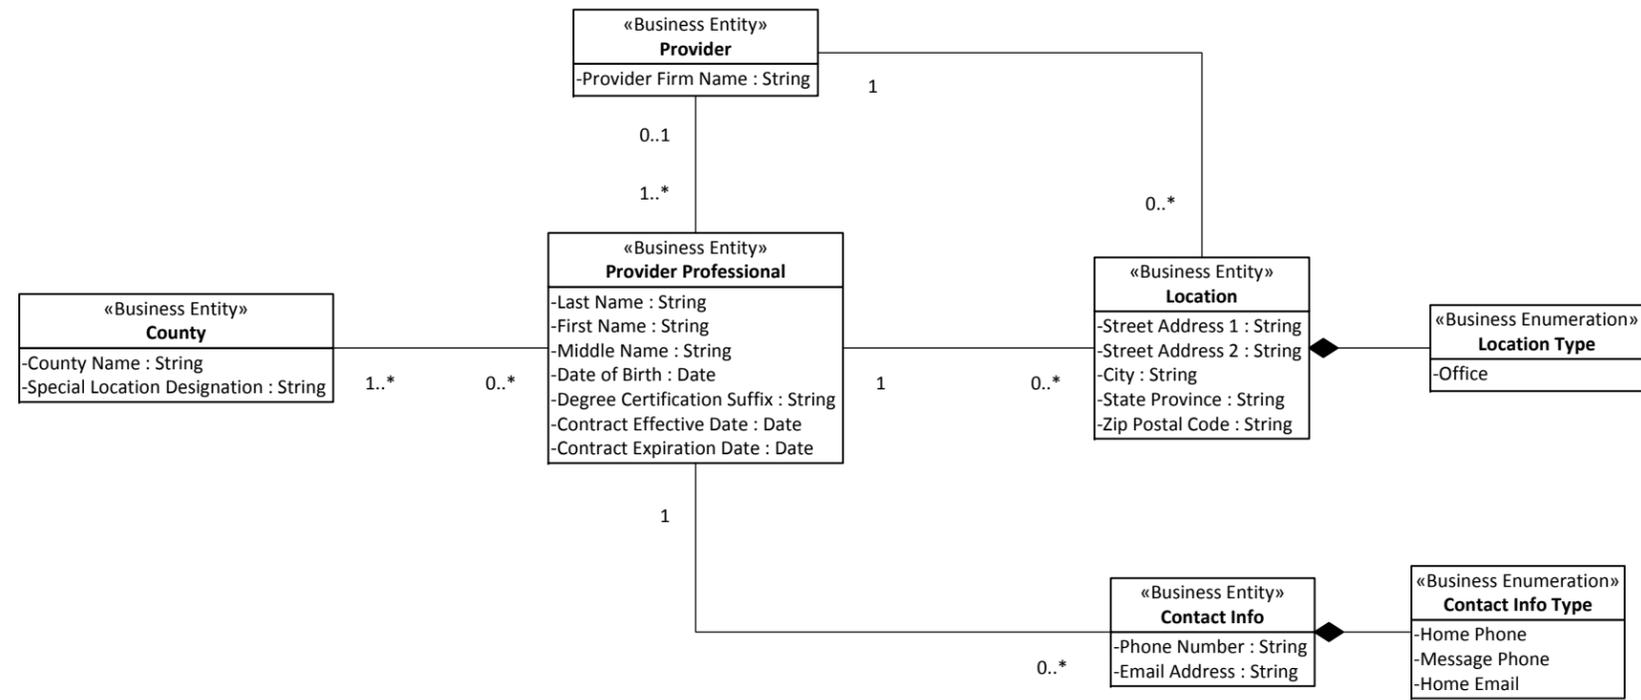

Diagram 6: PTSD Client Intake Business Entity Model (BEM)

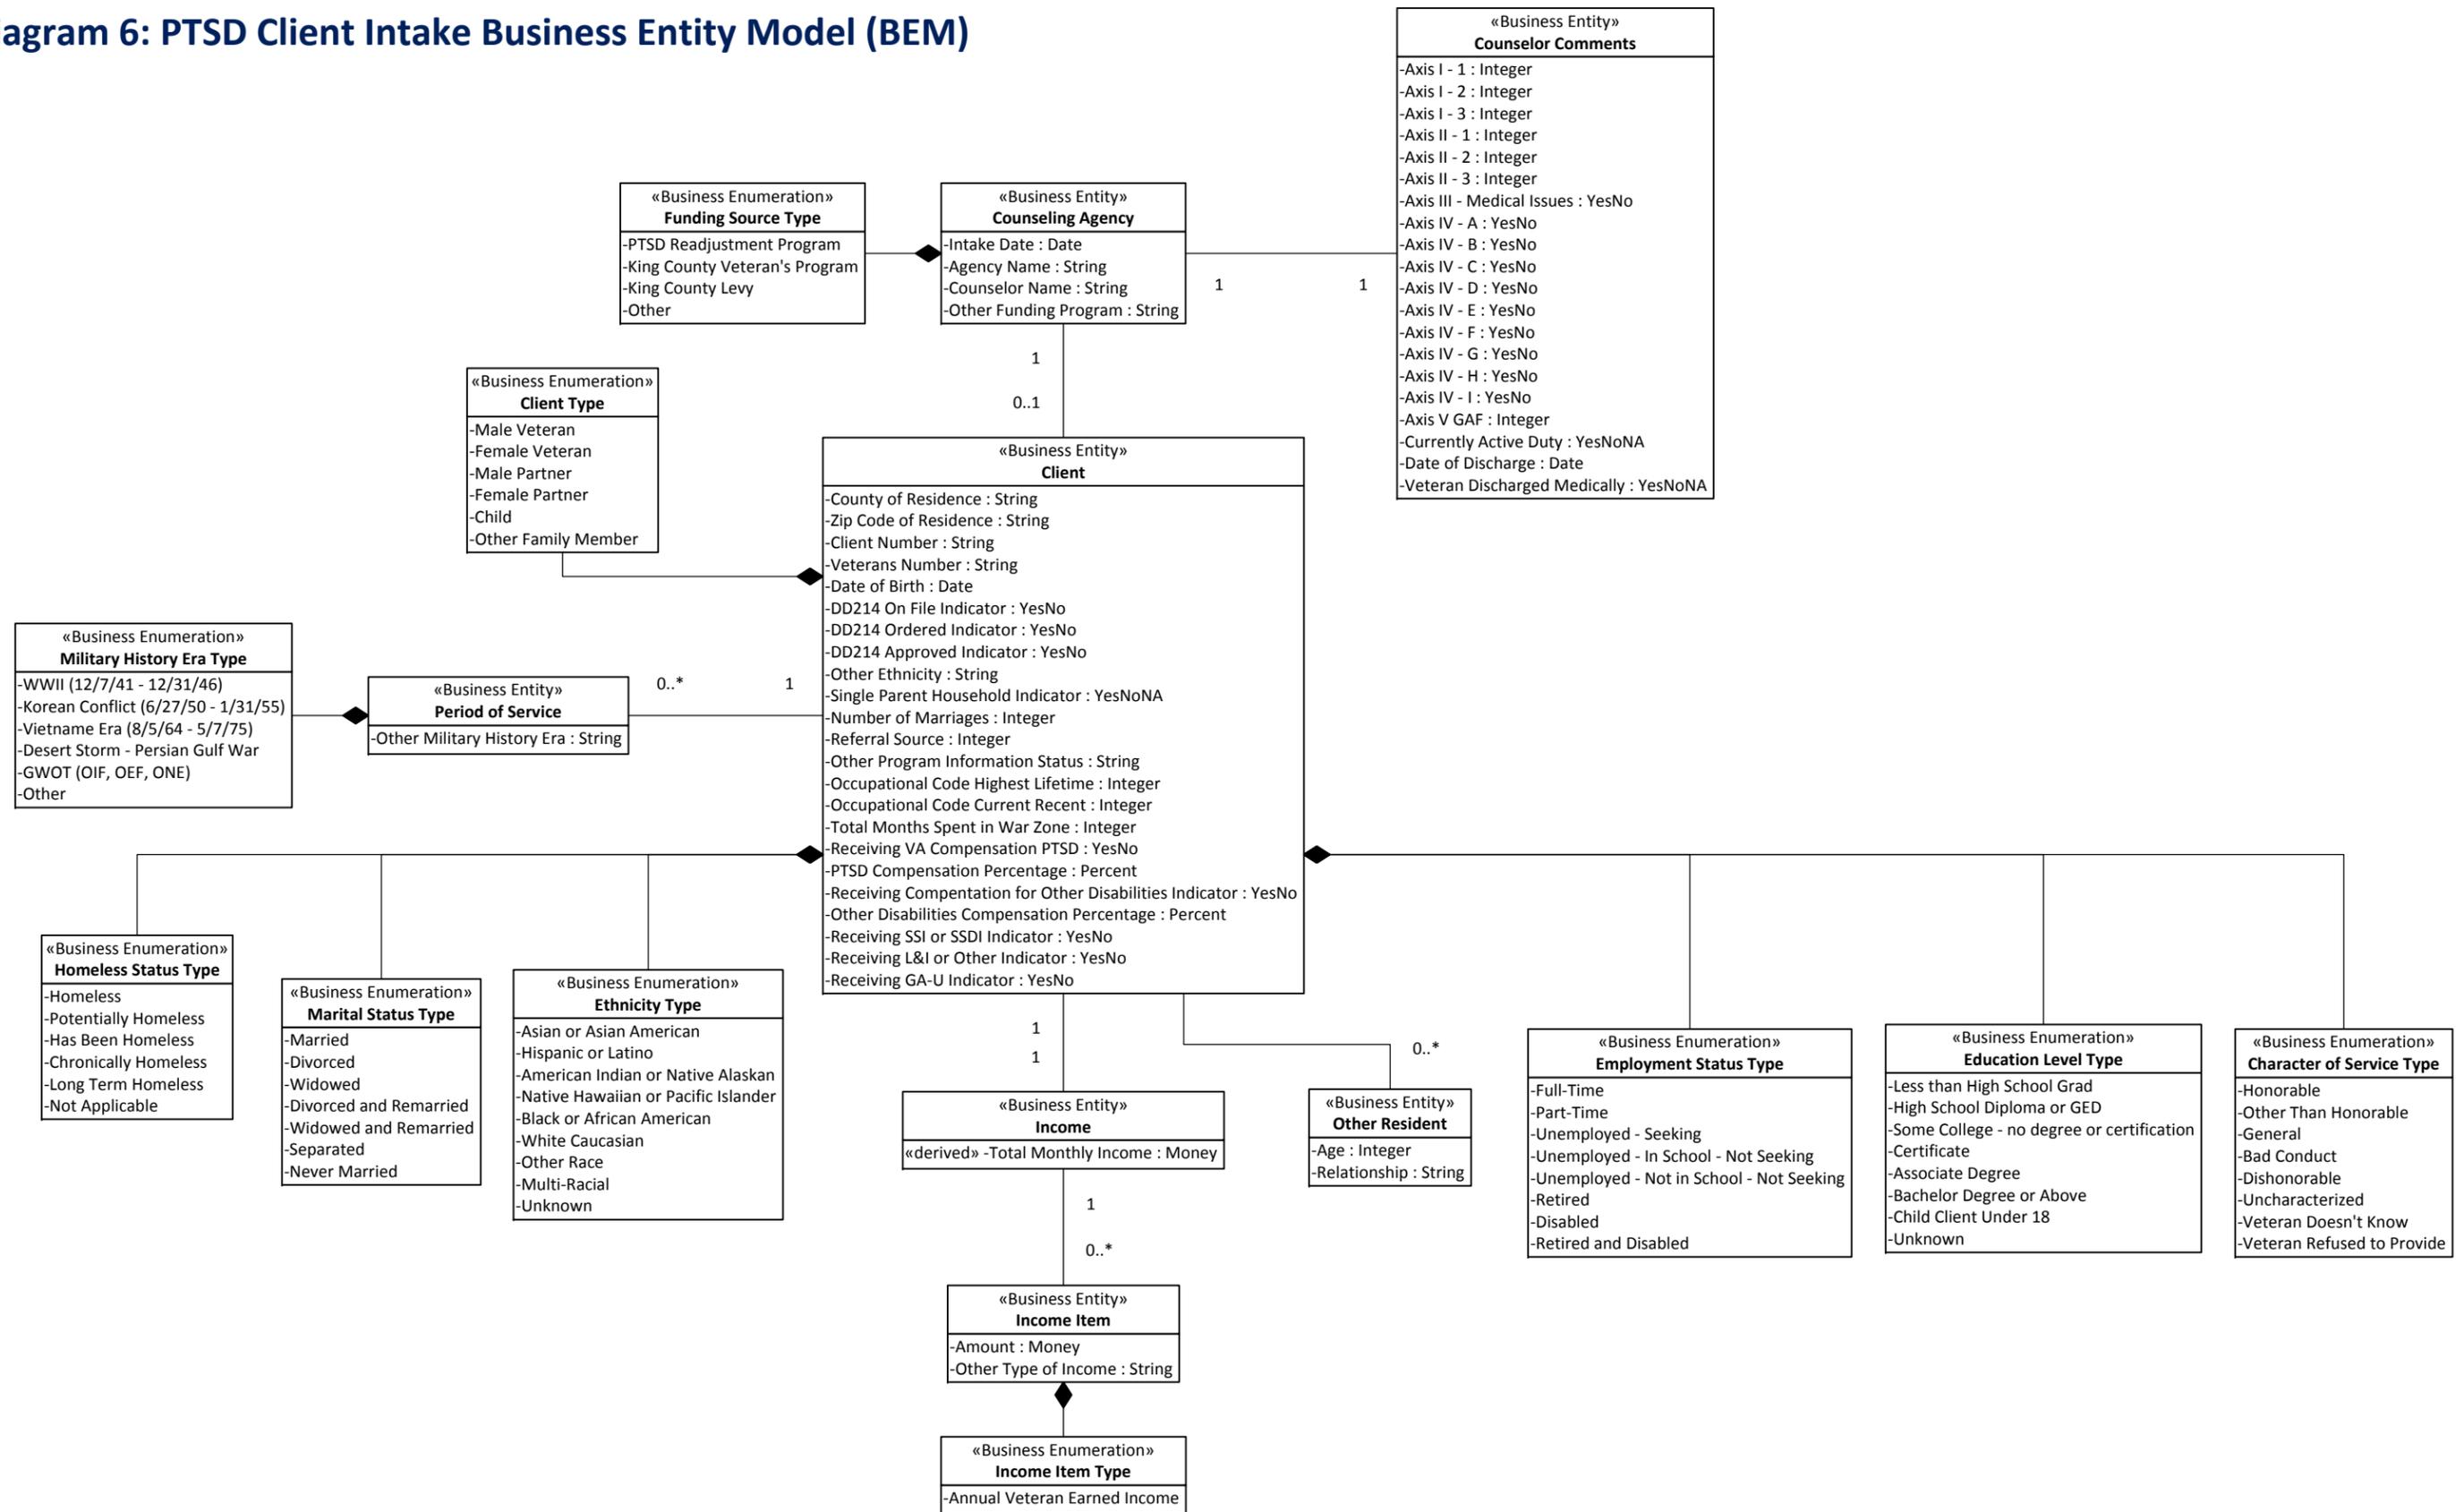

Diagram 7: Behavioral Health VTSC Report Business Entity Model (BEM)

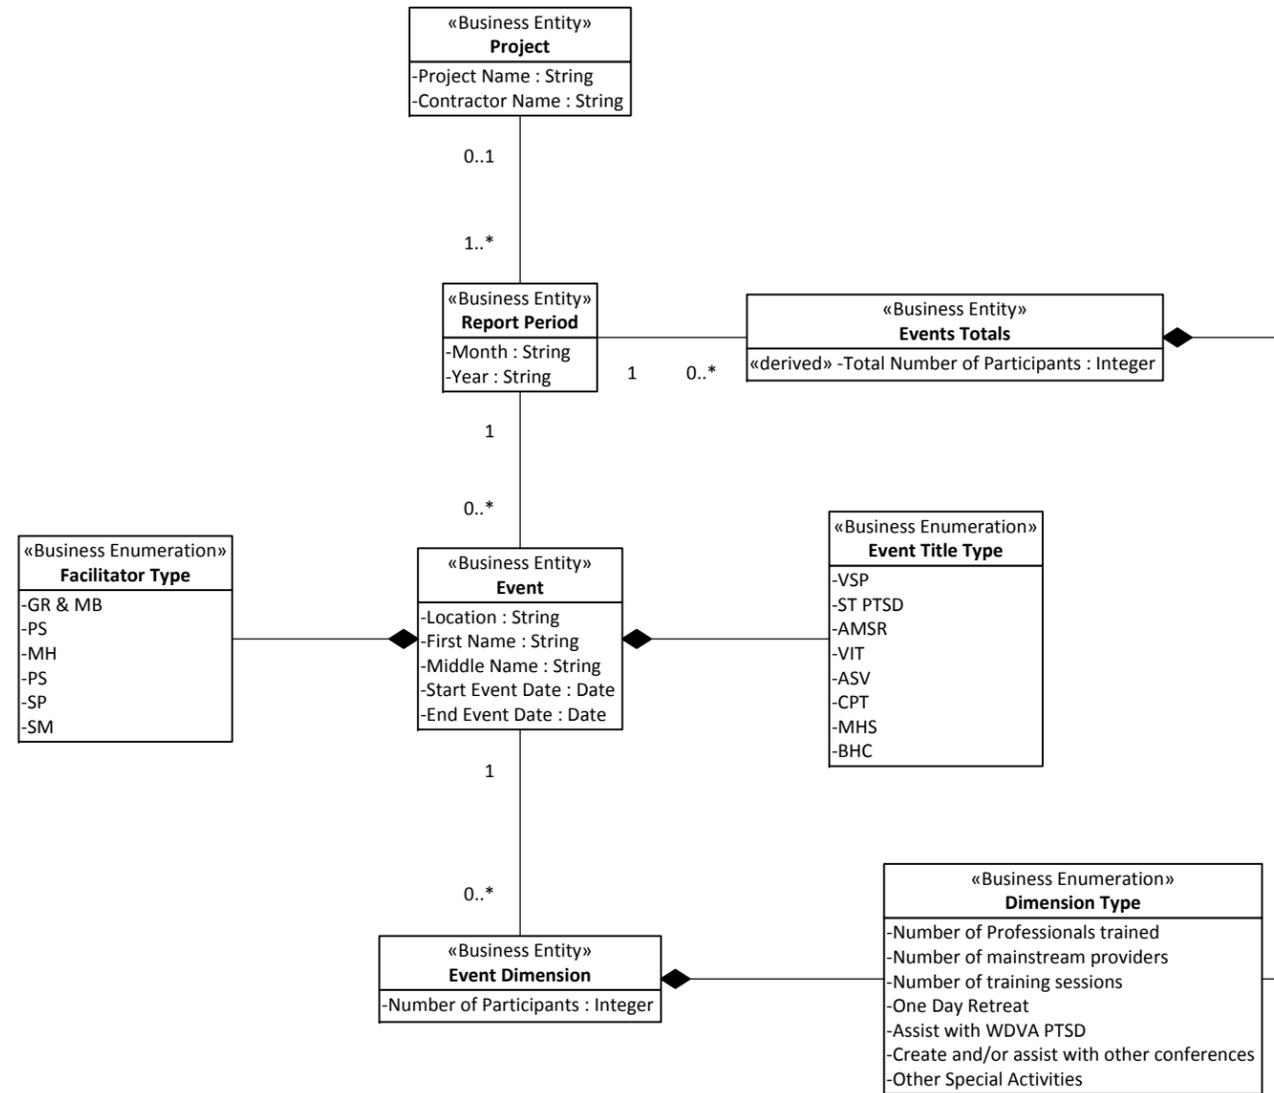

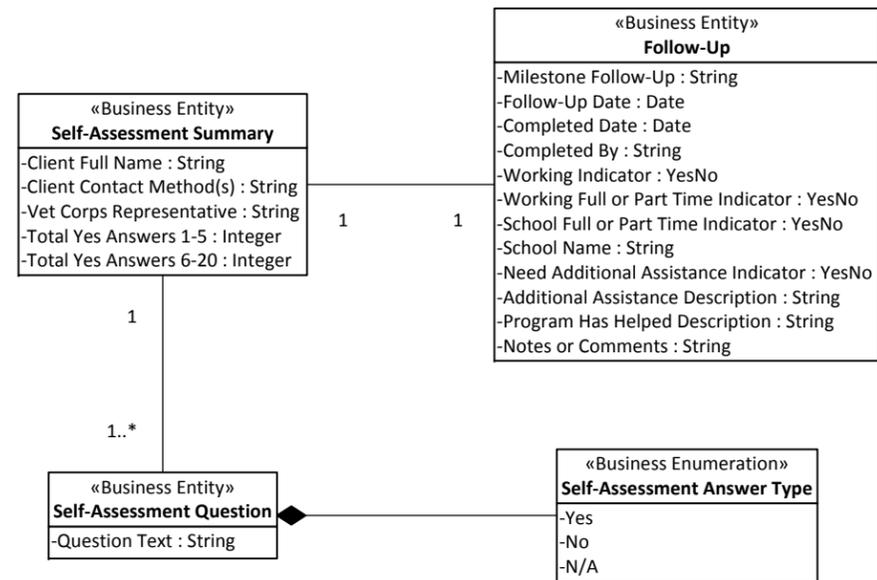

Diagram 12: Traumatic Brain Injury (TBI) Business Entity Model (BEM)

APPENDIX F. VETERANS CONSERVATION CORPS BUSINESS ENTITY MODELS

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity models:

- Diagram 8: Veterans Conservation Corps Client Intake Business Entity Model
- Diagram 9: Veterans Conservation Corps Project Management Business Entity Model

Diagram 8: Veterans Conservation Corps Client Intake Business Entity Model (BEM)

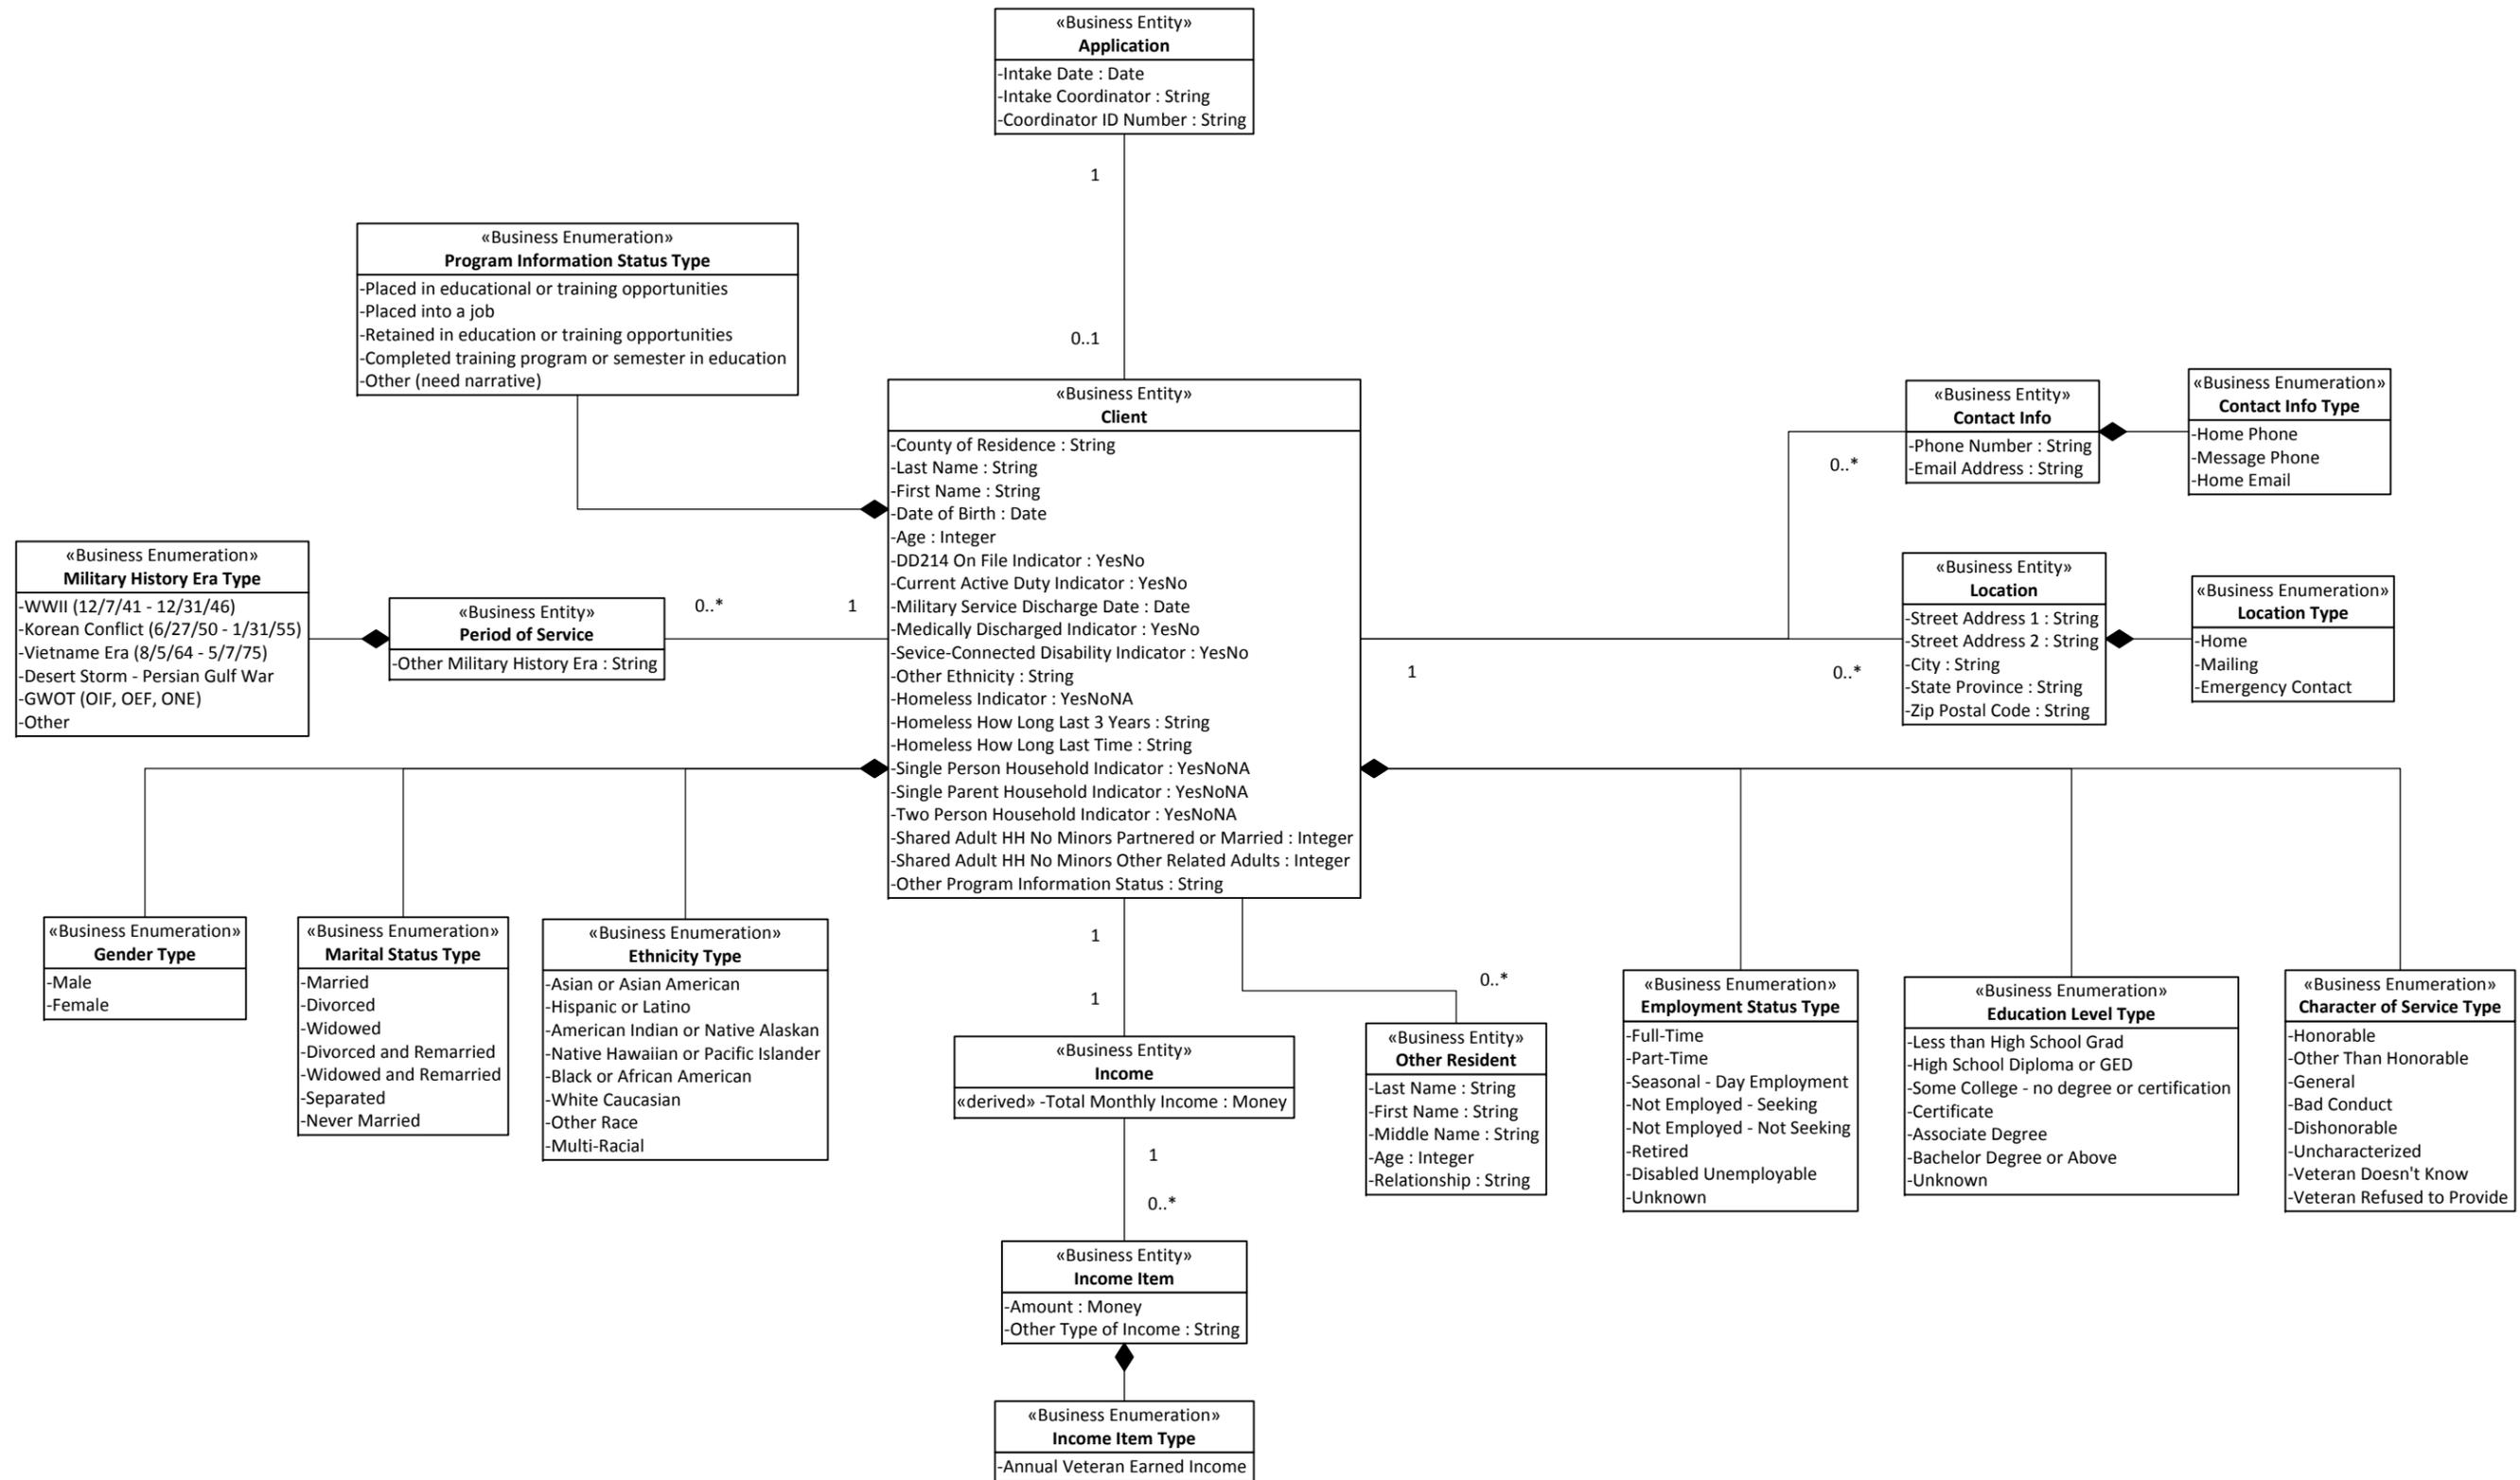

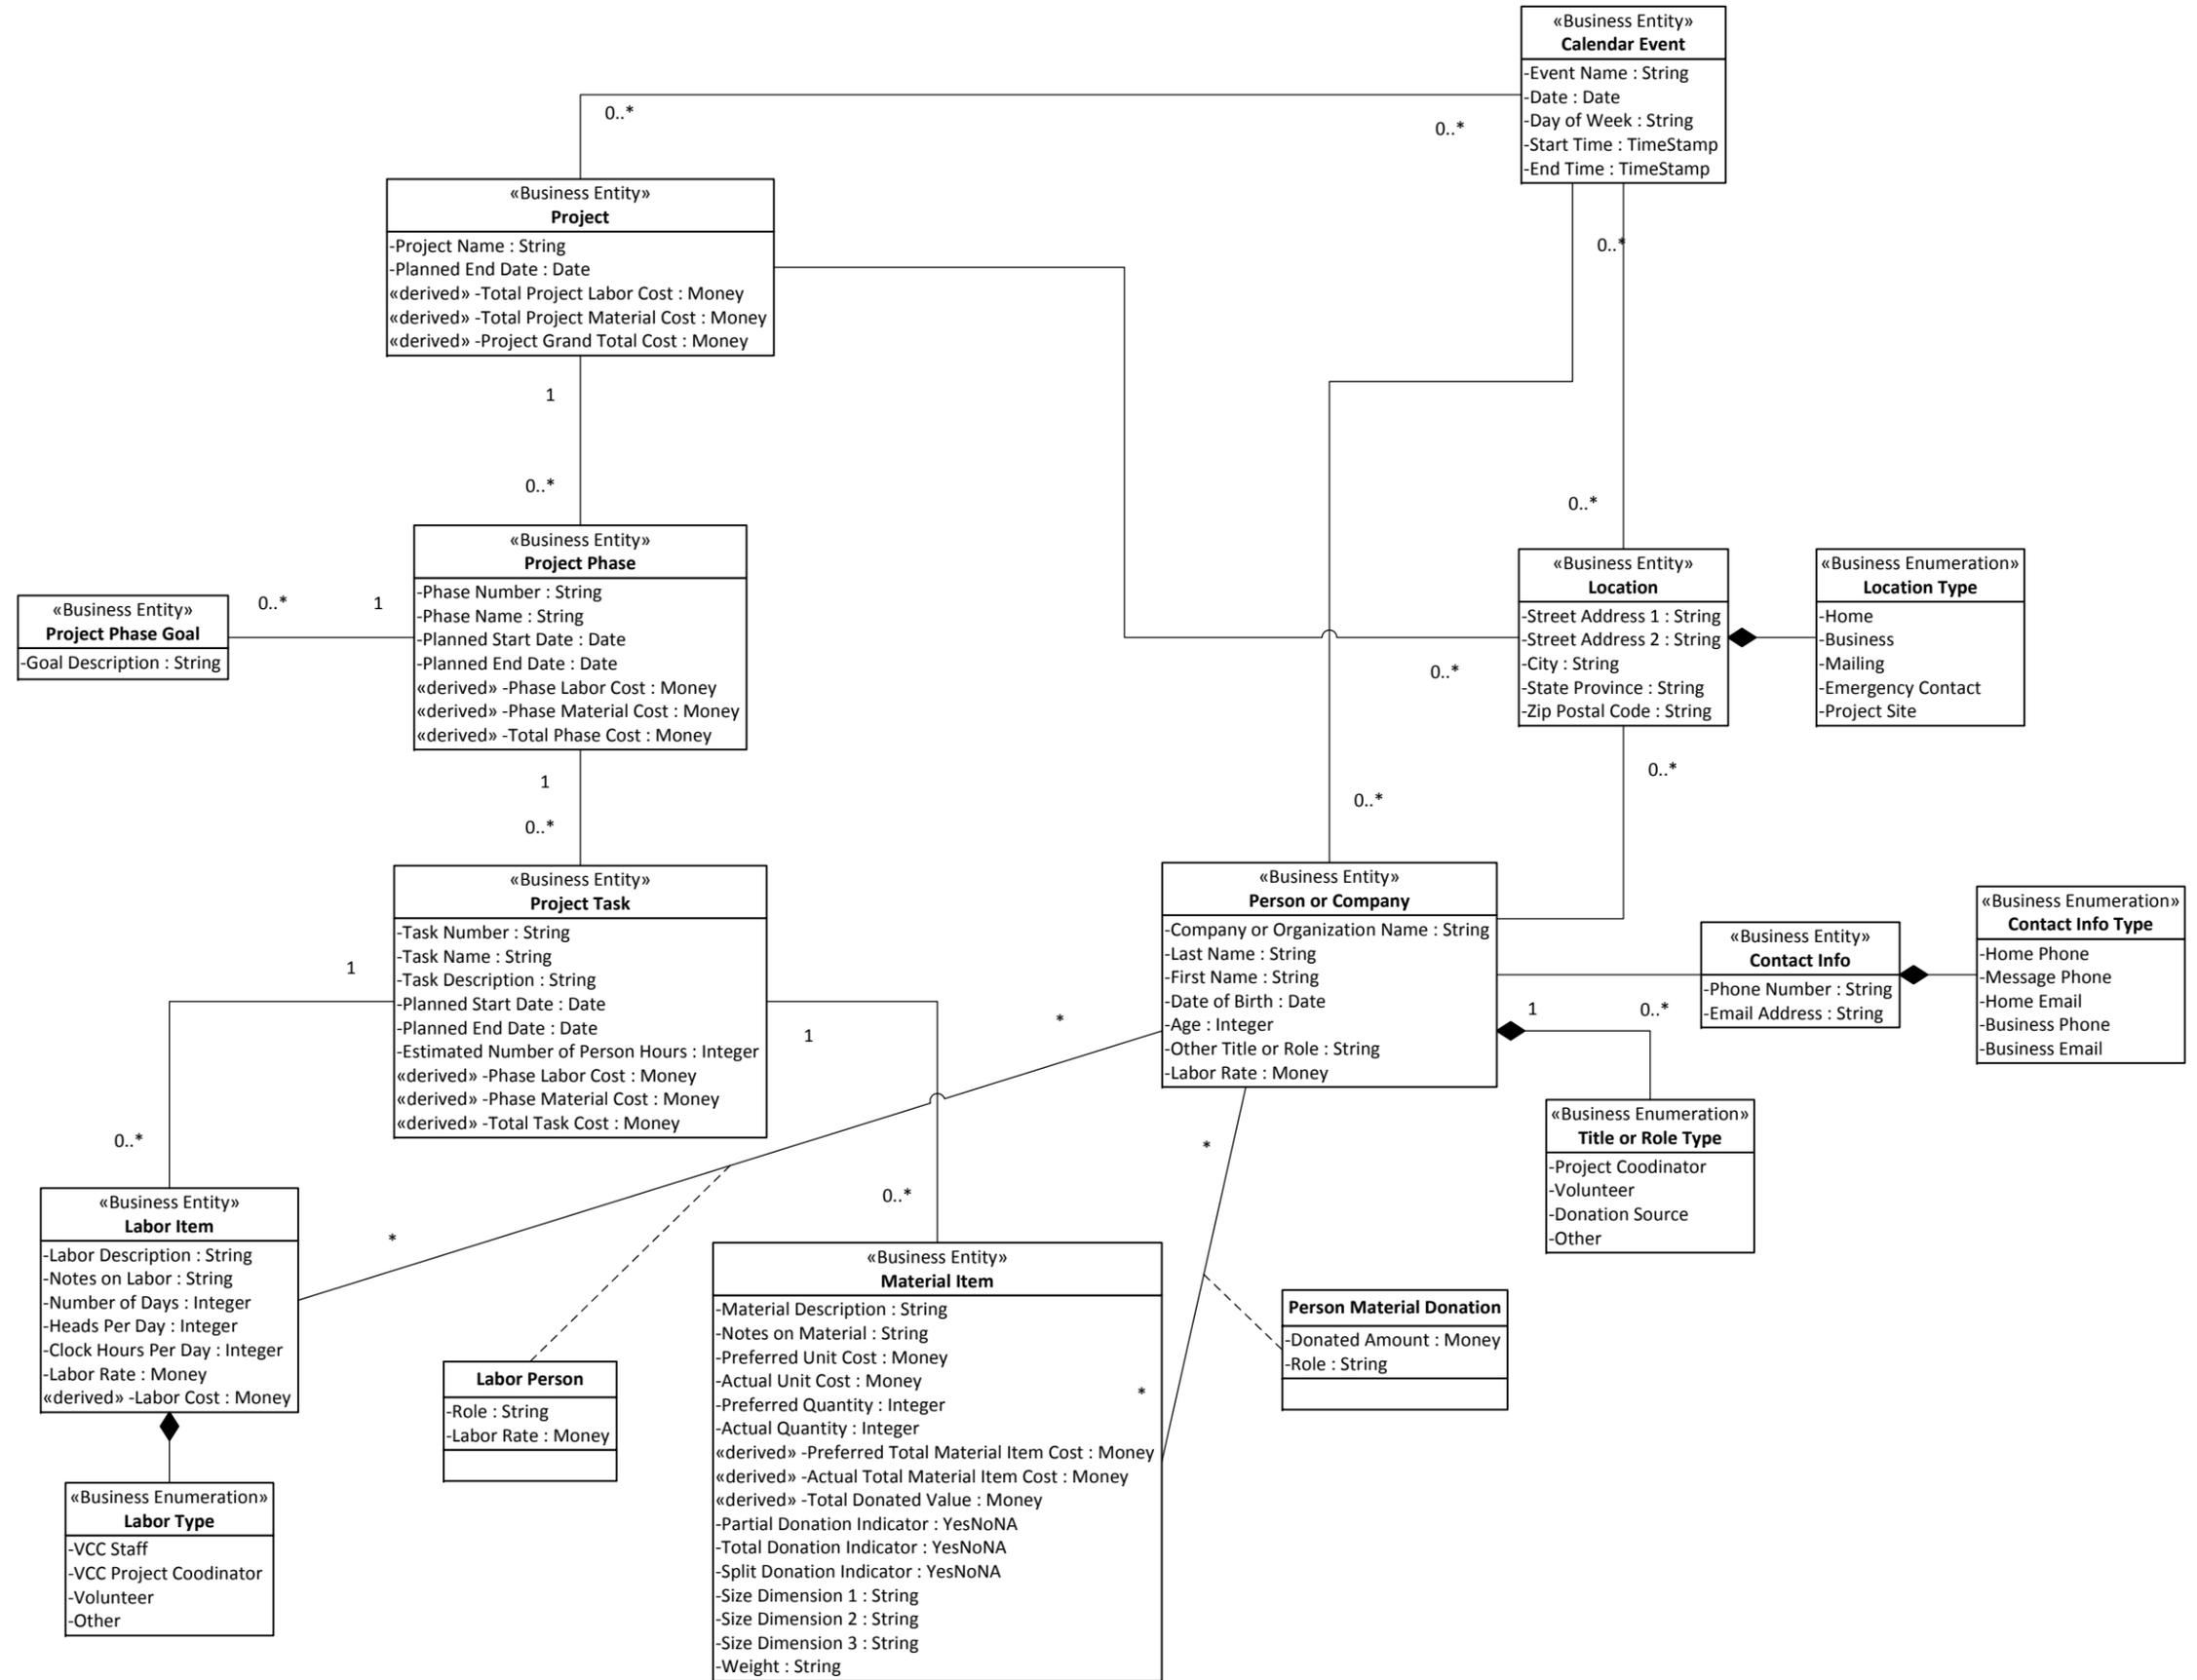

Diagram 9: Veterans Conservation Corps Project Management Business Entity Model (BEM)

APPENDIX G. HVRP BUSINESS ENTITY MODEL

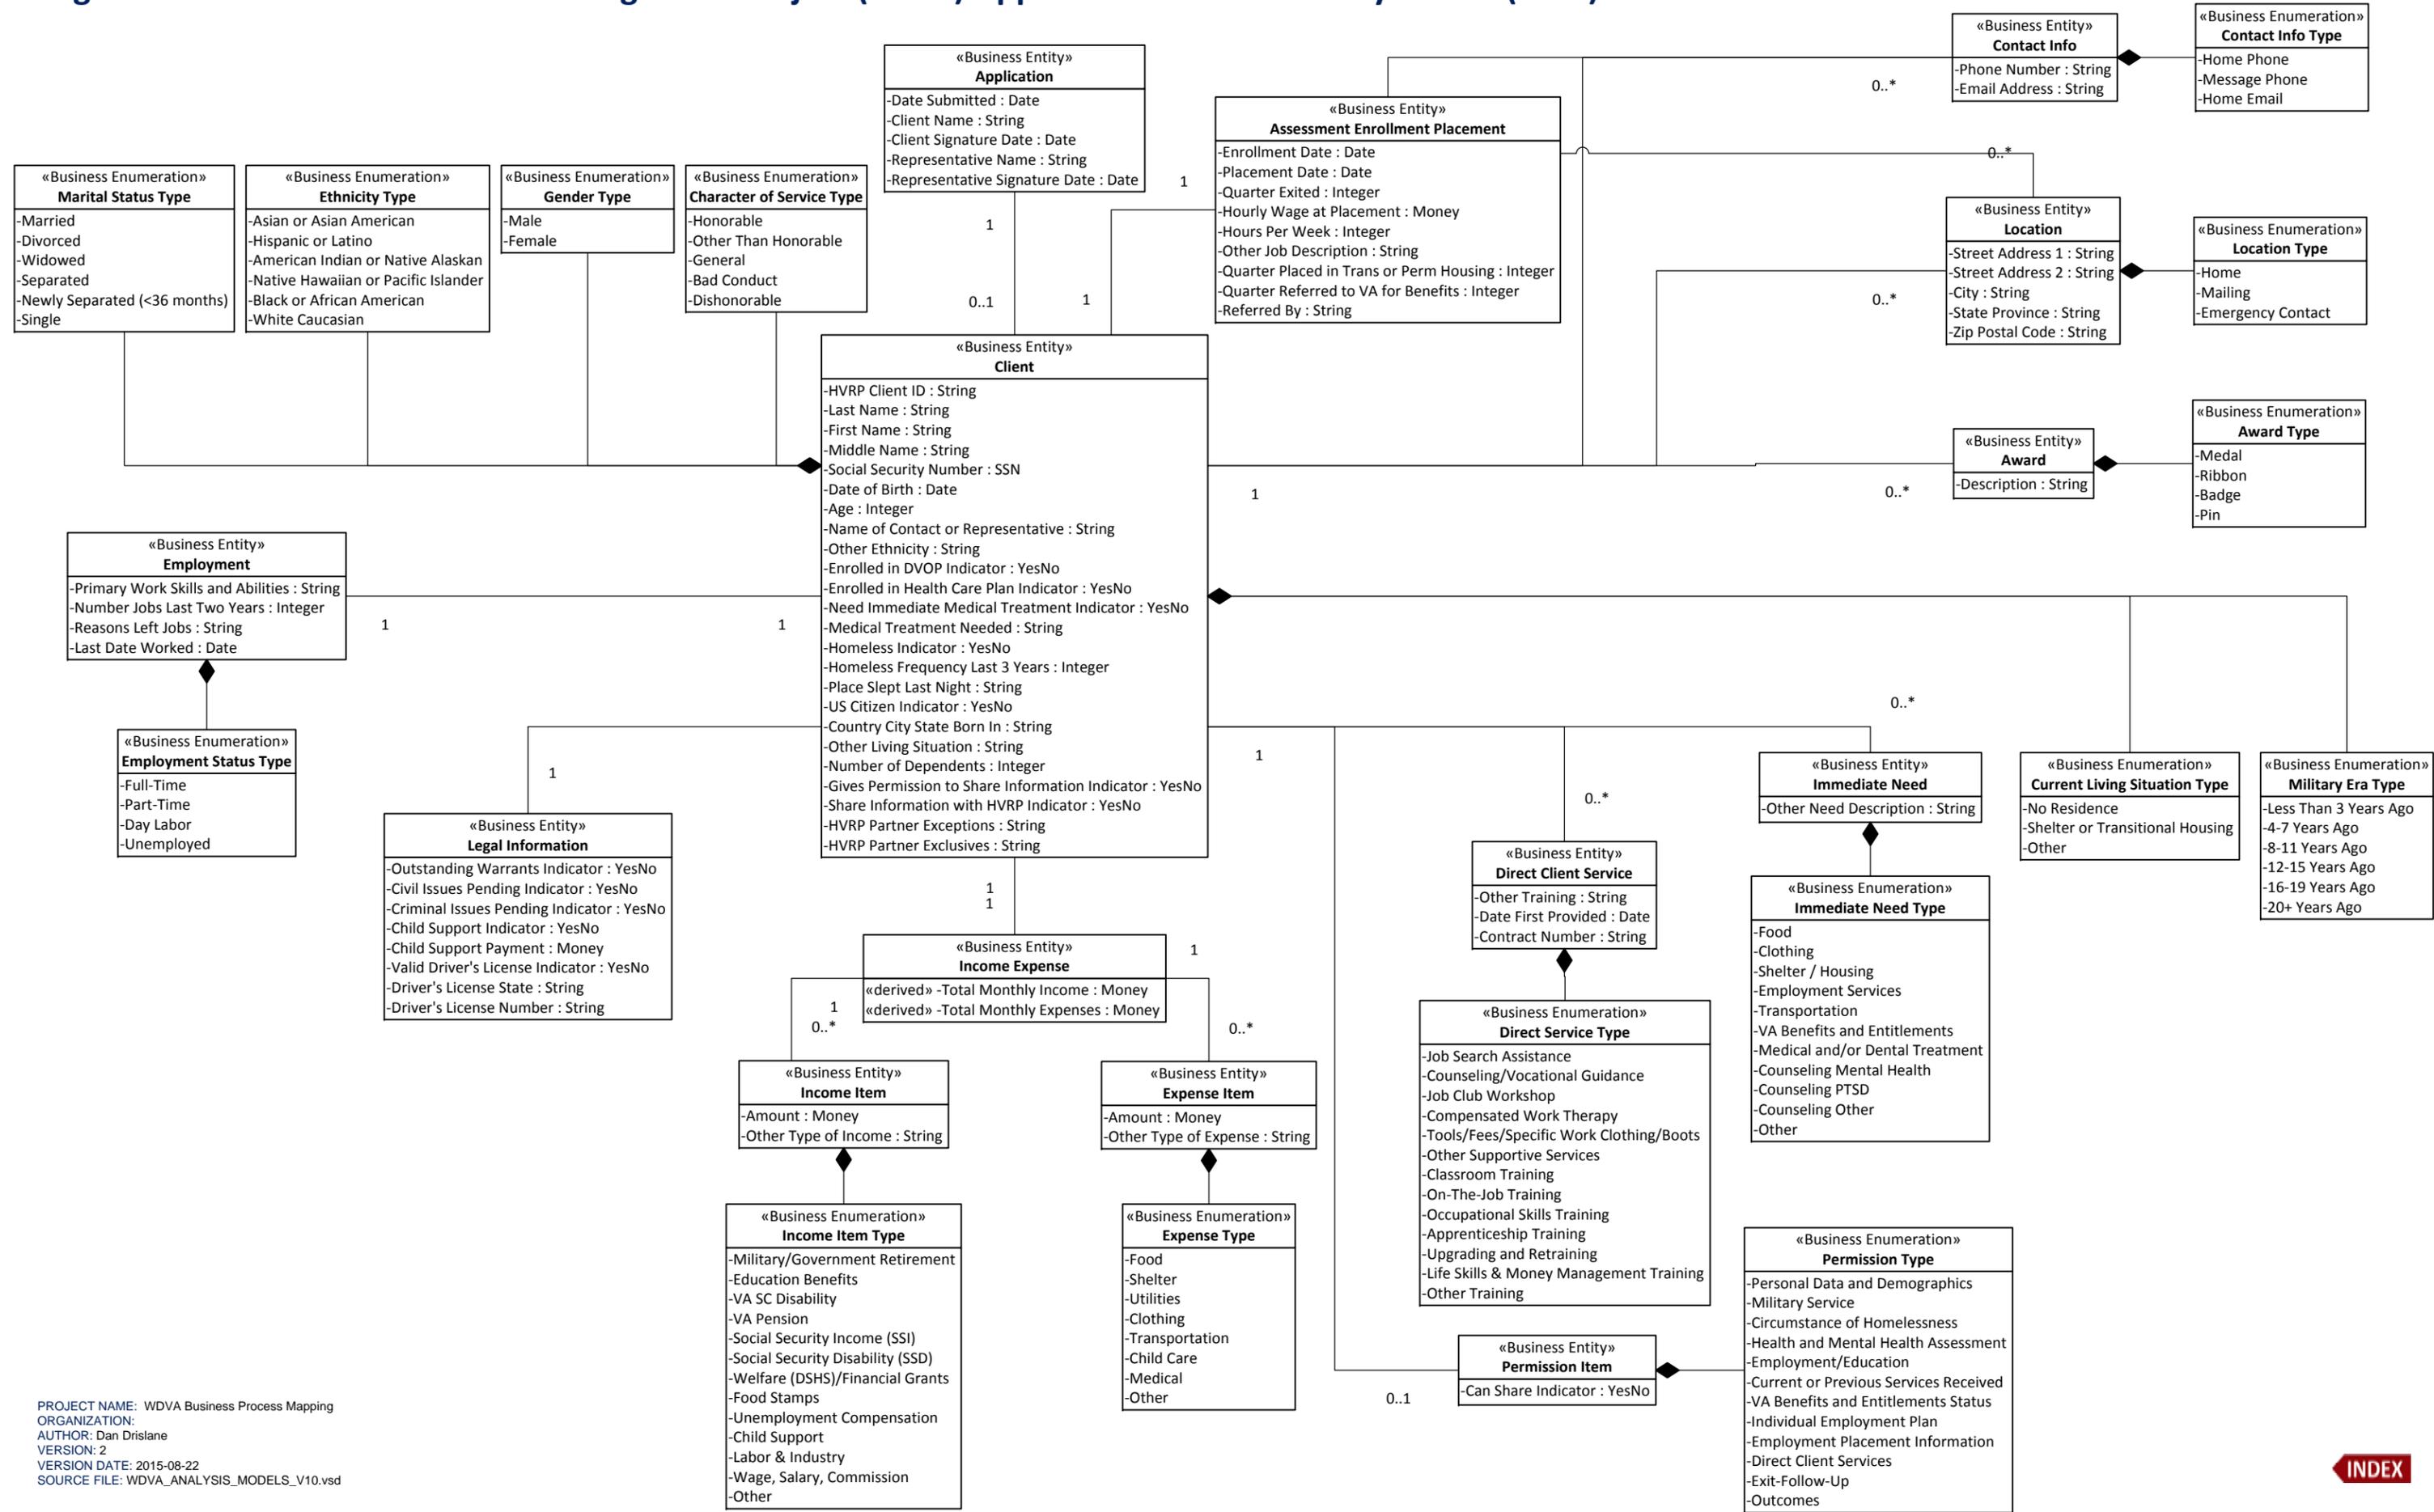

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity model:

- Diagram 10: Homeless Veterans Reintegration Project (HVRP) Application Business Entity Model

Diagram 10: Homeless Veterans Reintegration Project (HVRP) Application Business Entity Model (BEM)

APPENDIX H. A19 VOUCHER DISTRIBUTION (SERVICES) - BUSINESS ENTITY MODEL

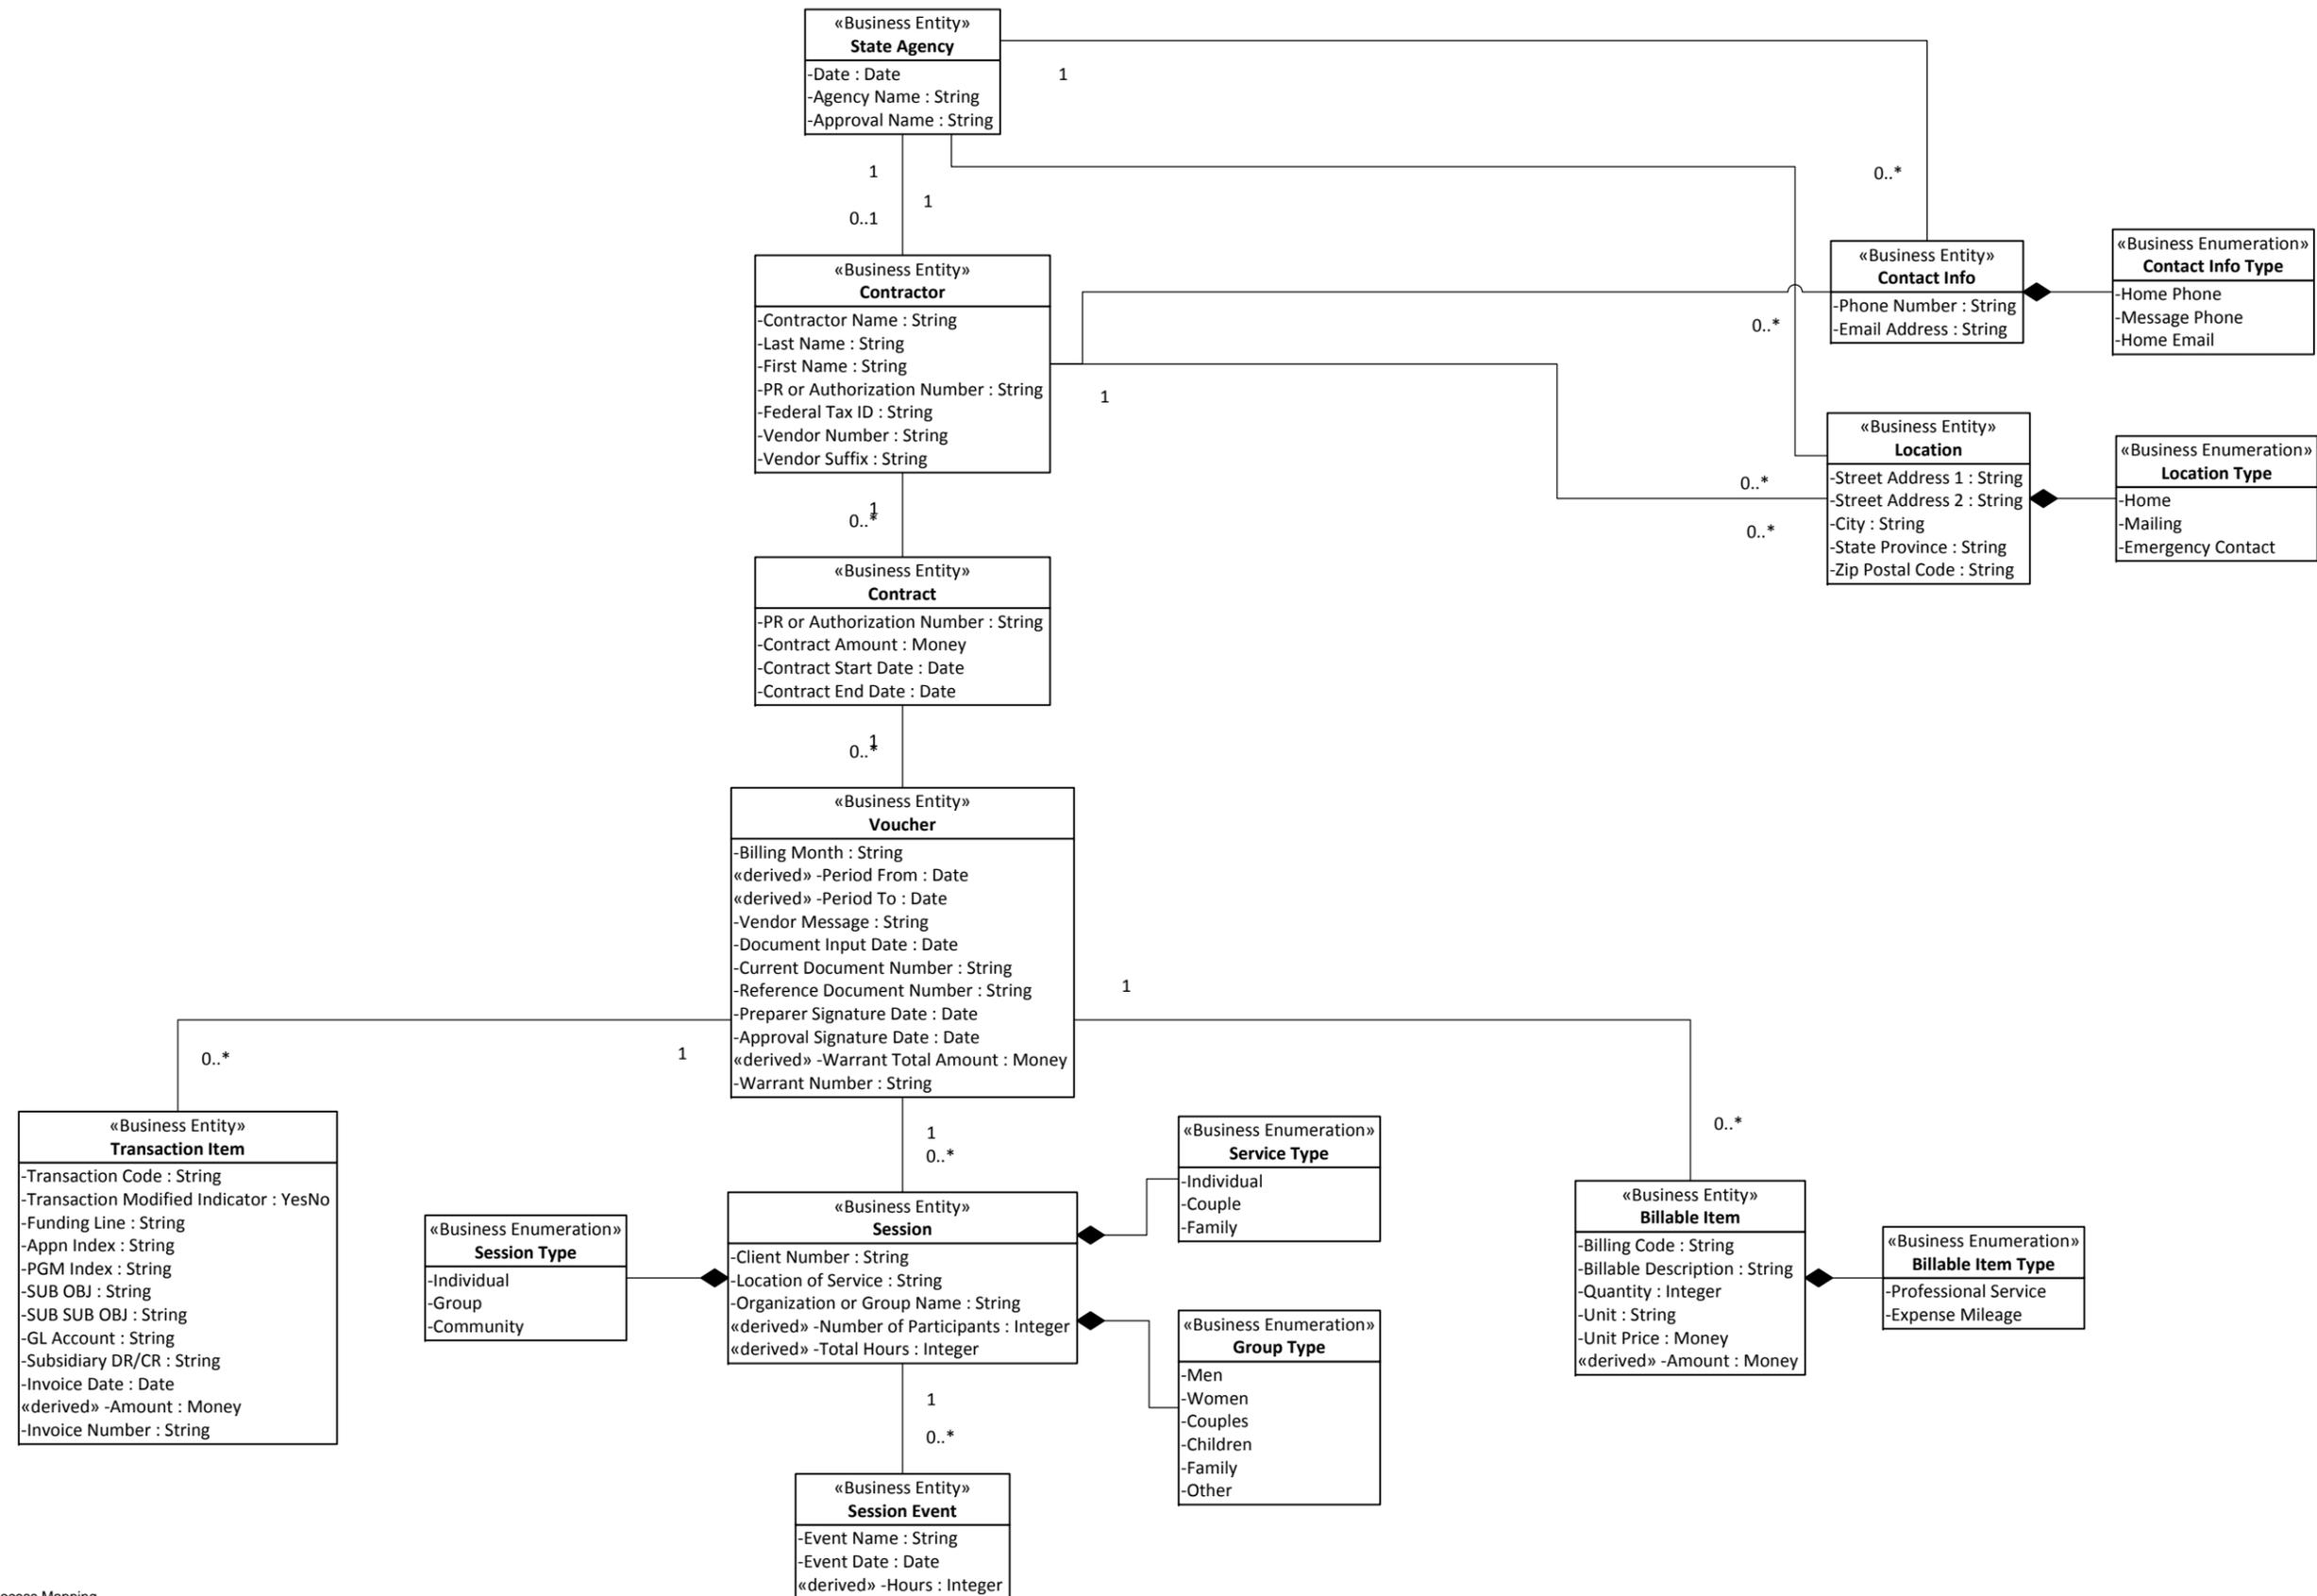

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is processes:

- Diagram 11: A19 Voucher Distribution (Services) - Business Entity Model

Diagram 11: A19 Voucher Distribution (Services) - Business Entity Model (BEM)

APPENDIX I. KING COUNTY WDVA BUSINESS ENTITY MODELS

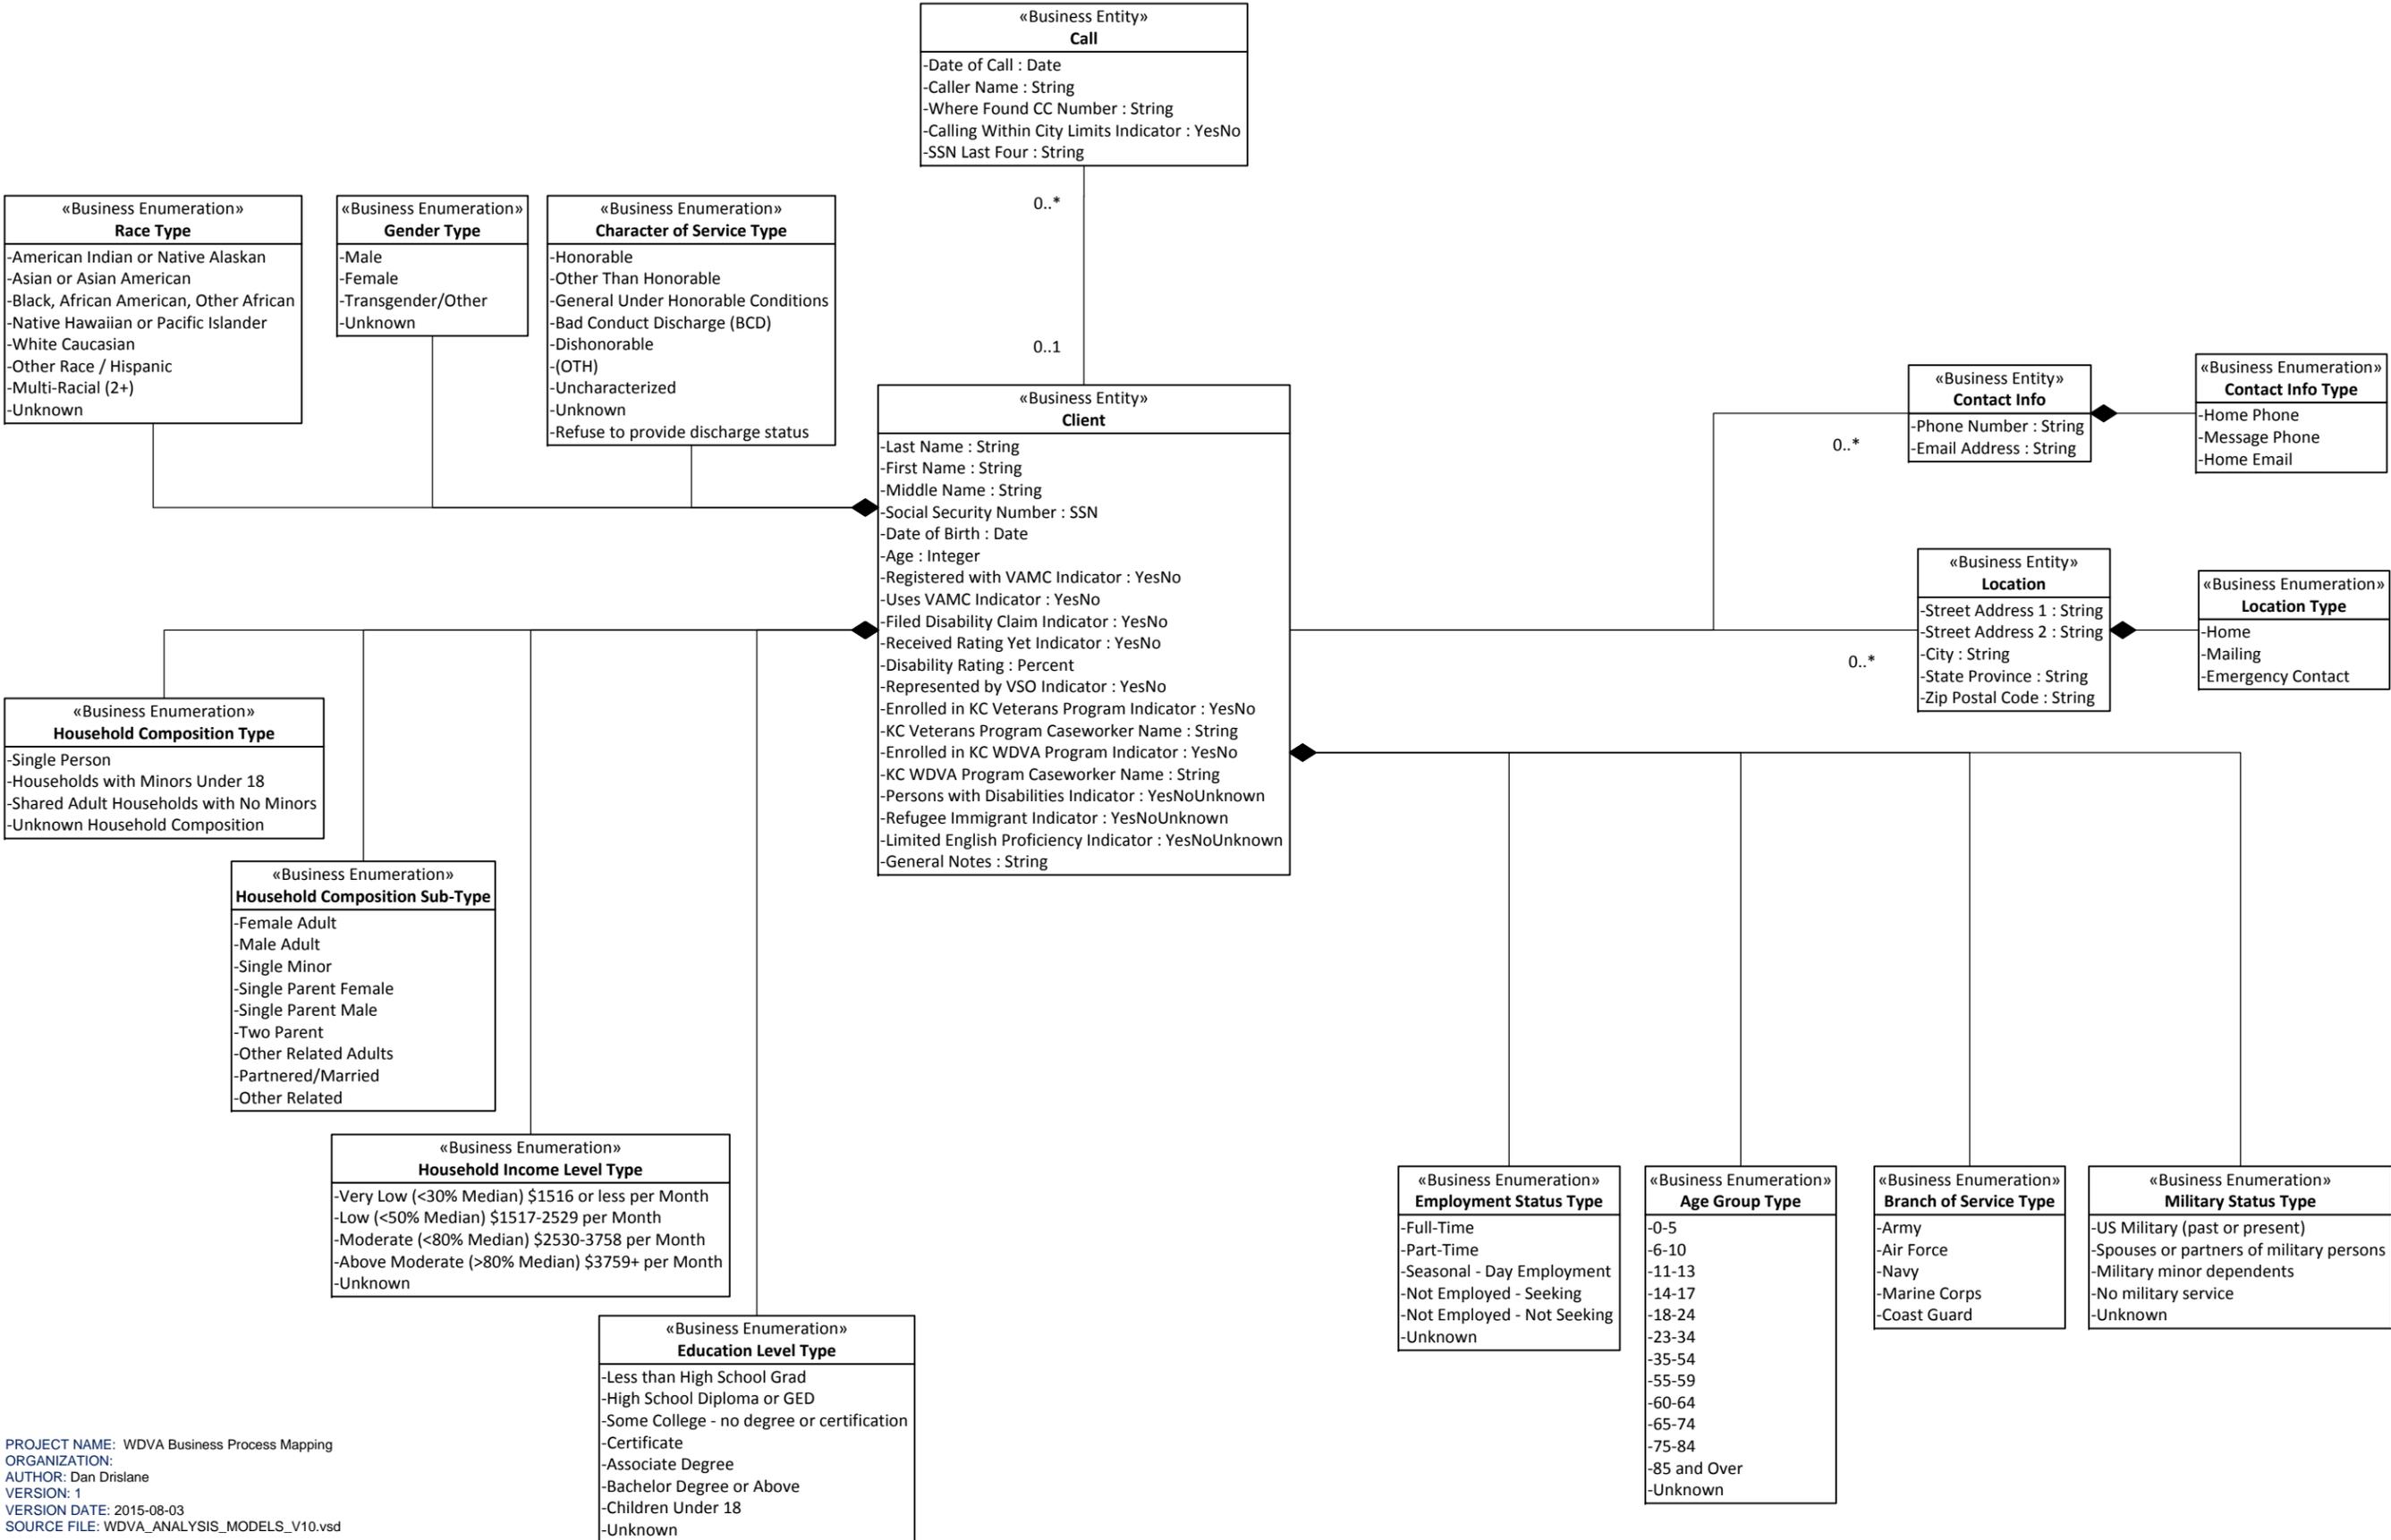

Please turn to next page.

Note: The original native Visio file for this diagram was rendered in tabular size (11" x 17"). For better readability, it is advised that you print the next page onto 11" x 17" paper.

These include the following as-is business entity models:

- Diagram 13: King County (KC) Call Center Intake Business Entity Model
