Some information about our vaccines, etc.:

We can vaccinate anyone aged 12 and older.

People with a history of Guillain-Barre syndrome, or any neurological symptoms following a flu shot, should not get one.

The shot is given intramuscularly. We don't use nasal or intradermal methods.

We do not use any Latex products.

We do not give Covid-19, Shingles, or Pneumonia vaccinations.

Our vaccines are all <u>inactivated</u> and are licensed by the FDA for the United States.

All our vaccines are preservative free.
